To DESTROY CANADIAN THISTLES. Mr. J. L. McD., Chemung, N. Y., gives directions to the Rural New Yorker to destroy Canadian thistles. He says :--

It is known to many farmers that ploughing will destroy Canada thistles, though there is some difference in the mode of operation. Most generally the ground is ploughed four or five times during the summer, which will nearly or quite exterminate them, but my treatment of these customers I think better still.

Five years ago I purchased a farm on which were a number of patches of Canada thistles. On one field, of four ucres, they were from two to four feet high, and so thick that neither grass nor anthing else could grow with them. About the 1st of Jane I harrowed down the thistles and ploughed them under, and the first week in July ploughed the field again, and sowed buckwheat; harvested a good crop and some thistles; thrashed the buckwheat on the lot, and burnt the straw and chaff. I trent this field in like manner for three years in succession, seeding down with glover and timothy the last year, and have completely eradicated the thistles. By sowing the buckwheat, the farmer will not only be remunerated for his labor, but there is no kind of crop so good as this to free land from daisies, and other noxious weeds. To subdue patches growing in corners of ways, mow them of according to the (Dutch rule) in July and August. I have tried this rule and have exterminated many patches in this way.

REMARKABLE METEORIC PHENOMENON IN ILLINOIS.

An extraordinary spectaclo was visible in the heavens on the night of the 15th inst. At a quarter past eleven o'clock p.m. a streamer of pular light was observed, starting at about three degrees above the herizon in the course N. 66 W., and rising to its culmination a little below the zenith on the West, still held its general course in its descent, becoming thinner and less distinctly defined, until about 12 or 16 degrees above the horizen, and 66 degrees to tories, &c. the East of South, it terminated. It formed a beautiful and almost perfect somicircluar arch, running N.N.W. and E.S.E. and rising to within 2 or 3 degrees of the zenith. It was mistaken by many persons who observed it at the time for a lunar rainbow. From 5 to 25 degrees above to the horizon on the North-western end, it exhibited the greatest intensity of light, considerably tinged with red. As it extended on it hecame more thin and diffuse, though no where having a greater breadth than about 50 minutes of a degree. Throughout the greater part of its length it consisted of a white hairy light, like the tail of a comet. though upon a minute observation the flickering streams always observable in the Northern lights could be seen.

At about thirty degrees above the horizon, on the north-western and, it made a slight angle, bending more into the East, toward the zenith, and near its termination in the south-east, it curved still more into the east.

The streamer was observed to maintain its position and intensity, almost unaltered, its position and intensity, almost unaltered, dressed (postpaid) to the Rev. H. C. for about half an hour, when it began to be Cooper, or Miss Couper, St. George's Hill, agitated, and rapidly-almost suddenlyit disappeared.

The Churchman's Friend, FOR THE DIFFUSION OF INFORMATION

RELATIVE TO THE United Church of England and Ireland Her Doctrines and Her Ordinances.

Edited by Clergymen.] [Published Monthly PARIS, 1st OCTOBER, 1855. PROSPECTUS

The Churchas's Friend is intended to supoly a want, which, we believe, every Canadia Clergyman must have often and painfully experienced. We cannot perhaps be surprised that in a land where the number of the min isters of the Church is so disproportionate to the population and extent of the country. there should be a la mentable degree of ignorance respecting the history of the Church, Her doctrines, and Her orlimances. Yet it is plainly impossible to bring there subjects prominently forward from the pulpit; there we must needs speak on more glorious themes, and preach the glad tidings of our common redemption. The Churchman's Friend has been projected to meet this difficulty: it is incended literally to fulfit the promise made in the title; namely, to convey information, rela-

the time; harmony, to convey information, to a tive to the subjects sud-cated.

The Theology which we wish to impart is a ptive and honestly expressed in the first motio which we placed at the head of our publication, "Quod semper, quod ubique, quod ab omnibus, creditum est, tenemmus, "Lot us hold fast that, which always, which every where, which by all has been believed," for that only is the faith of the Catholic Church. White the tenper and spirit in which we desire to couvey these truths, is with equal simplicity and convectness indicated by our second monto, In necessariis Unites, in dubits liberates, in omnibus caritas. "In necessary things unity, in doubtful things liberty, in all things charity."

With this object in view, we purpose to issue, for the present, one number monthly, commencing on the 1st October; but we hope con-siderally to enlarge, or to publish more fre-quently, as soon as we receive the requisite amount of encouragement. A large proportion of each number will be filled with original matter in the form of short tracts, dialogues, and tales; w'ich, with anecdotes, scraps of information and other selections, all strictly tending to illustrate the principles we wish to advocate, will make up the contents. While we hope to offer matter sufficiently interesting as to make it not without value even to the more highly educated, it will be our endeavour to clothe it in such plain and simple language, as to render our little publication a welcome visitor in the farm house and the cottage, and a source of pleasure, as well as profit to both young and old. For the young especially, some portion of our space will always be set apart; and we venture to suggest to clergymen and superintendents of Sunday Schools, the advantage of encouraging their elderly scholars to avail themselves of the reduced terms offered to those who subscribe for a number of copies.— They vill thus be furnishing the young persons committed to their charge with a supply of reading, at once sound in its teaching and attractive in character, and at the same time be lightening

their own labor. We beg particluarly to call attention to our terms of publication, from which it will be seen that eight copies will be forwarded to one address for fifteen shillings, currency, a year, and fifteen copies for £1 five shillings. But as these sum copies for £1 five shillings. But us these sum are so small that they will not pay for the trouble of collecting, it is absolutely necessary that all subscriptions be paid in advance. All communications to be addressed (Post Paid,) to the 'Eduors of the Churchman's Friend,'

Ten lines and under 3s. 9d. for the first insertion, and 1s. 3d. for every Associant insertion. Above ten lines, 4 per line for the first insertion, and 141.

per line for every subsequent insertion. Advertisements, with cash, must be sent by the 10th of each previous month. Prico-Two SHILLINGS AND SIX PENCE a Yoar, always in advance Clergy men and Laymen acting as Agents, or tak-ing a q antity for Distribution, will be supplied with Eight Copies for 15s. or Fitteen for £1 5s.

A LTHOUGH these works are distin-guished by the political shades above indiatted, yet but a small portion of their contents is devoted to political subjects. It is their literary character which gives them their chief value, and in that they stand confessedly far above all other journals of their class. Blackwood, still under the fatherly care of Christopher North, vaintains its aucient celebrity and is, at this time, unusually attractive, from the serial works of Bulwer and other literary notables, written for that magazine, and first appearing in its columns both in Great Britain and in the United States. Such works as Britain and in the United States. Such works as "The Caxtons" and "My New Novel," (both by Bulwer, "The Green Hand" "Katio Stewn," and other serials, of which numerous rival aditions are issued by the leading publishers of this ecuatry, have to be reprinted by those publishers from the pages of Blackwood, after it has been issued by Messis, Scott, & Co., so that Subscribers to the resting of the Messis greater and the formula of the Messis of the territy of the Messis of the territy of the Messis of t scribers to the reptint of that Magazine may always rely on having the earliest reading of these
