

- (b) the present uses of these waters and those uses which may reasonably be anticipated in the future;
- (c) the effects of present water quality on these uses;
- (d) the nature, extent and location of impacts on the quality and quantity of these waters to be anticipated as a result of the proposed completion and operation of the Garrison Diversion Unit;
- (e) the nature, extent and economic cost of such impacts to be anticipated from the proposed completion and operation of the Garrison Diversion Unit on the present and anticipated future uses of these waters; and
- (f) the nature and extent of the impact on commercial and recreational fisheries in Manitoba, particularly Lake Winnipeg, of the possible introduction from the Missouri River system through the Garrison Diversion Unit of foreign species of fish, fish diseases, and fish parasites.

Should the Commission make any recommendations concerning measures which could be taken to avoid or relieve adverse effects on uses in Canada, what would be the approximate cost of such measures?

In the conduct of its investigation and in the preparation of its report, the Commission should make use of information and technical data heretofore available, or which may become available during the course of the investigation. In addition, the Commission should seek the assistance, as required, of specially qualified personnel from both countries.

Both the United States and Canada ascribe particular importance to the views of the Commission on this matter. Accordingly, the Commission is requested to complete its investigation and submit its report in the minimum possible time, consistent with a thorough examination of the subject, but in any case, not later than October 31, 1976.
