

COSMOS: A PHYSICAL DESCRIPTION OF THE WORLD.

By Baron Alexander Von Humboldt.

Translated under the Superintendence of Lieut.-Col. SABINE, R.A.

Vol. 1. Post 8vo. 12s.

ARCTIC VOYAGES OF DISCOVERY.

FROM 1818 TO THE PRESENT TIME:

By Sir John Barrow, Bart., F.R.S.

With Portrait and Maps. 8vo. 15s.

REMARKABLE CRIMES AND TRIALS.

TRANSLATED FROM THE GERMAN OF RITTER VON FEUERBACH.

By Lady Duff Gordon.

8vo. 12s.

"Lady Gordon possesses in a high degree the rare faculty of translation, to which she has a hereditary right. She has skillfully pruned the luxuriant details of some of the cases, and omitted the disquisitions on evidence and other legal topics, which, however valuable in themselves, would be uninteresting to general readers. The present collection of criminal cases forms, as far as we are aware, the most interesting specimen existing in our language."—*Law Magazine*.

THOUGHTS ON ANIMALCULES.

A GLIMPSE AT THE INVISIBLE WORLD, AS REVEALED

BY THE MICROSCOPE.

By Gideon A. Mantell, D.C.L.,

With Coloured Plates, and Woodcuts from the Author's Drawings.

Crown 8vo. 10s. 6d.

"The object of this volume is in the highest degree commendable, and the name of the author is guarantee sufficient for its correct and agreeable treatment. There is no branch of science more interesting, none whose revelations are more wonderful, than that which unfolds the forms and nature of minute creatures which people every stagnant pool, inhabit the leaves of every forest, and which take up their abode even in the fluids and tissues of other living beings. Dr. Mantell's idea is a happy one."—*Chambers' Journal*.
