

The large mill at Angus, Que., in which Hon W. D. Ives and Messrs. G. Vandyke and J. H. Pope are interested, is nearly ready for work. It has one modern saw, with ample power, and will be run night and day, producing 65,000 feet every 24 hours. The slabs and edgings will be ground up and made into paper at a pulp and paper mill nearby, which belongs to the same parties. This mill will help to develop the spruce interests of the Eastern townships.

## Patent Rossing Machine

Why you should use this Rosser. ....

It will do double the work of any other.  
It is the only machine made that will peel Cedar Shingle Blocks.  
It will peel dirty blocks without taking the edge off the knives as they cut from the clean bark or block out.  
It is a self-feeder, and very easy to operate.  
It requires less power than a face wheel.  
All iron and steel, very simple and durable.  
It will ross knotty and uneven timber without waste.  
It occupies about the same space as an ordinary planer.  
You can have a chance to try a machine before buying it.
