

five-lobed, with sinuses very shallow. As a whole, the leaf is pentagonal.

CARD-EXERCISE XXXVII.

Gooseberry-Leaf, slightly Conventionalized.

Draw a vertical line forming the midrib and petiole of the leaf, and divide it into thirds. Just below the upper point of division, draw a horizontal line not quite as long as the vertical line. Add the other ribs and the veins, and around the whole draw the margin of the leaf. The leaf is five-lobed, sinuses deep, margin unevenly serrate.

CARD-EXERCISE XXXVIII.

Strawberry-Leaf, slightly Conventionalized.

Draw a vertical line forming the petiole of the leaf and the midrib of the central leaflet. Divide this line into thirds, and, through the upper point of division, draw a horizontal line as long as the vertical line. Draw the midribs of the right and left leaflets, and add the veins for all three. Finish by drawing the coarsely serrate margin of each leaflet.
