

Patent Extension or Sectional Ladder.

These ladders are made from the best of maple, white ash and pine with hickory rounds, are securely bolted at the ends, and all rounds are wire nailed. They are made in six foot sections or lengths, each one of which can be joined to the other in various shapes and forms convenient for use. This ladder is one of the most complete articles ever invented for painters, carpenters, paper hangers, house decorators, farmers and fruit growers, in fact every one who is in any kind of business will find this ladder one of the most convenient articles of the kind ever made. We are selling thousands of them, which alone is proof that they are needed in nearly every line of business.

Just What Fruit Growers
and Farmers Want.
