## New Millinery

The season's Millinery productions embrace many innovations, all fully exploited in our collection of Model Hats for autumn.

PARIS HATS.  
LONDON HATS.  
NEW YORK HATS.  
OUR OWN HATS.

## SUITS

Complete showing of Metropolitan Model Suits in all the demanded cloths and colors, and every style and trimming.

## CLOAKS and JACKETS

From the everyday knockabout Tweed Coat to the most elaborate Black Velvet or Silk Mantle, our stock runs the whole range. Many of our offerings are single-pattern garments, and their like will not be seen elsewhere. The prices afford extra good value in every class.

N.B.—Coat and Suit Catalogue on request.

## DRESS FABRICS

As usual, we are right in line with all the good things in Dress Fabrics. Many Novelty Single Costume Lengths in our display will not be seen anywhere else. Particular dressers will appreciate the significance of this in preventing duplication.

## SILKS

All the demanded weaves for every kind of dress wear will be found in our splendid stock, amongst which we are showing a very special range of Double-width Foulards of exceptional value.

## OUR MAKING UP DEPARTMENT

For all kinds of Ladies' Costumes in touch with this magnificent stock of dress fabrics, trimmings, silks, etc., and these, combined with the recognized ability of our dressers, insure customers the best that can be made.

## WIND SNAPPED MAST

Two Men in Sailsboat Rescued Off Centre Island.

All day yesterday Lake Ontario was agitated by one of the heaviest gales of the year, which paralyzed all navigation. A strong westerly wind was in evidence early in the morning and as the day progressed it steadily increased in velocity, till late in the afternoon the wind was blowing at the rate of 35 miles an hour and showed no signs of abating.

None of the passenger boats with the exception of the *Macassa* made a regular trip, and very few boats or other boats attempted to weather the storm. One small sail boat was seen on the lake in considerable distress, and after being tossed about for a while a gust of wind snapped off the mast, and overturned the boat. The two men, who were running the boat, were picked up close to Centre Island, where the accident occurred.

As a result of the east gale the water level, which is at present extremely low, will, in all probability, fall still lower.

Considerable damage was done through the wind falling trees and poles, interrupting the electric service for a time on Major-street, Indian-road and Church-street.

A watchman was placed on the latter street by the Hydro-Electric Co. until workmen could make the necessary repairs.

If you are cold at home or your car is frozen, call on us. We are the Toronto Fur Company, 72 King-street East. Phone M. 1007.

## BOY STABBED IN SCUFFLE

Finson Turner, 15 years, 155 East King-street, says that Herbert Dawson, 12 years, 94 1-2 East Front-street, stabbed him in the hand in King-street at 7:30 last night. Dawson says that Turner ran on the knife, which was a wicked looking weapon, and penetrated Turner's hand, which was forced to St. Michael's Hospital, while Dawson was arrested by Detective Leavitt and is held at the shelter.

## Insurance Agent Arrested

With H. Hill, 1148 Dovercourt-road, was arrested yesterday by Detective Croome upon a warrant charging him with theft from the London Life Insurance Co., by whom he was formerly employed.

## ACCIDENTAL DEATH

Accidental death was the verdict returned last evening by Coroner Craig's jury, which investigated the death of William McKinley, who was killed while working in the G. T. R. yard at Bathurst-street and died shortly after reaching Grace Hospital.

The coroner's inquest was held at the residence of Martin J. O'Brien, a brakeman working with Larabee, and several others gave evidence in connection with the case.

Superintendent Farrell and Yardmasters J. H. McCormack and George Grievess, who were on the scene at the time of the accident, gave evidence.

The evidence of the other witnesses standing at the extreme end of the car and lost his balance and fell immediately in front of it.

Another pair make a fine comparison. Bishop Hamilton of Boston and Rev. Henry Haigh of Newcastle-on-Tyne. By the way, the latter was also a member of the same committee.

The speaker, departing from his sentimental appeal to his hearers, provoked laughter when he said: "The crown paid four cents per acre for our great Ojibwa to the Indians. The consideration was to be in money and divers goods. It is said that among the Indians there was a great deal of 'fire water' thrown in, which would

have been much better thrown out." Victoria College's Renown.

During the address, the fact was brought out that Victoria College was the first royal charter ever awarded by the British Empire to a non-conformist institution.

Rev. Dr. Briggs, for the past thirty years has been book steward of the Methodist Church of Canada, having come from Bonbridge, Ireland, where he was born to Canada in 1858. With one exception he has been a delegate to every ecumenical conference held.

World of Frivility.

"We have to face a frivolous rather than a frowning world," said Rev. J. W. Hamilton, D.D., of Boston, in his address of welcome, "and we are here to preach that there is still sin on earth."

Rev. Mr. Hamilton was born in Weston, Va., 1846, and was a delegate to the ecumenical conferences of 1861 and 1869.

Bishop H. B. Parkes, D.D., of Chicago, during his address of welcome, paid a touching tribute to the people of the United States and honored her and she was considered the greatest ruler of modern times.

The Bishop of Chicago, in his speech of colored eloquence, touched on Old Glory and the land of the free. He passed almost in silence the name of King George, and the great United States loved and honored her and she was considered the greatest ruler of modern times.

The Saviour made use of another word as well. It looked contradictory, too. He referred to the multitude as "the lost." But he said that as a judge, but as a Saviour, He had no despair.

They needed to be found, they desired it and were not saving.

A Day of Harvest.

At this point he left his manuscript. His face had whitened with growing emotion and his hands trembled with emphasis. "All of us as Methodists are to-day ready to bring our confirmation to this judgment of Jesus Christ. What is the harvest of the 19th century? What are men saying who preach to the masses? What have I not seen in India? There were faint 'Amen's' in English in the 19th century, but no larger make much noise.

The preacher now seemed to think of other scores than those who quailed before the Master. He was a man who wrote books and question certain parts of the Holy Book. Of these he said with still a whiter heat of emphasis:

"Criticism is the spirit of science. The some of it has been hasty and destructive, yet what it seeks is truth. We have to learn to know the reason of things. But the royalty of truth is also the royalty of obedience. Hence there arises the security that in spite of all the trouble and heart burning of criticism, the end will be that we shall be more loyal to Him who is the Truth."

He then discussed Socialism, showing that here was also a harvest field. The longing at the base of it was that to which Christianity prescribes its ideal. He concluded by deploring the divisions in the church at large and in Methodism particularly. For all should take to heart the words of the apostle: "In the unity of the church, the laborers may be few. The communion service followed.

## GIANTS OF METHODISM BRING MESSAGE OF PEACE

Continued From Page 1.

was the waiting world, the reluctant disciples and the impatient church. But hear Him declare this multitude as a harvest, but in spite of all the temples, ecclesiastical and wealth; the laborers are few.

Thus he began, with a quick eye to his manuscript, yet a glance that also held his audience. His voice is musical and every sentence polished to a finish. "Frankly," he dropped into one of his conversational moods, "this declaration was puzzling."

"To call this a harvest, these hardened scribes and that motley crowd of Jews, Yea, a harvest, and the harvest of his arm as a challenge that the same is true to-day. A young colored brother here stopped the proceedings, and said: 'What is the harvest?'

"The Saviour made use of another word as well. It looked contradictory, too. He referred to the multitude as 'the lost.' But he said that as a judge, but as a Saviour, He had no despair."

They needed to be found, they desired it and were not saving.

A Day of Harvest.

He then discussed Socialism, showing that here was also a harvest field. The longing at the base of it was that to which Christianity prescribes its ideal. He concluded by deploring the divisions in the church at large and in Methodism particularly. For all should take to heart the words of the apostle: "In the unity of the church, the laborers may be few. The communion service followed.

Warmth of Cordiality.

The morning being devoted, the afternoon became fraternal. If the former reached high tide, which it did, the latter surely surpassed it. In the one case, the speaker was congratulating; in the other, most friendly and humorous. Both together will make pleasant memories and good reading in the published reports. And the fault will not be that the first chapters were dull, but that the last chapters were not the reader to the end.

It was not a civic welcome. That will come in due time. It was the glad hand of the young western world, in greeting to both home and kindred in the east. The leaders on both sides were well, and the standard of mankind is not only high but universal.

Twin Stars.

In some respects Bishop Hoos of Nashville, Tenn., and Sir Robert W. Perks of London, Eng., were well, and the standard of mankind is not only high but universal.

Another pair make a fine comparison. Bishop Hamilton of Boston and Rev. Henry Haigh of Newcastle-on-Tyne. By the way, the latter was also a member of the same committee.

The speaker, departing from his sentimental appeal to his hearers, provoked laughter when he said: "The crown paid four cents per acre for our great Ojibwa to the Indians. The consideration was to be in money and divers goods. It is said that among the Indians there was a great deal of 'fire water' thrown in, which would

have been much better thrown out." Victoria College's Renown.

It was not a civic welcome. That will come in due time. It was the glad hand of the young western world, in greeting to both home and kindred in the east. The leaders on both sides were well, and the standard of mankind is not only high but universal.

## TRIPOLI HAS BEEN BOMBARDED

Continued From Page 1.

tempted on this part of the Italians, and it was feared that during the night the town would be pillaged by nomad Arabs, who had been hovering in the vicinity for some days. The admiral knew of the hasty removal of arms and ammunition into the interior.

Palace and Forts in Ruins.

Again, at an early hour this morning, the "first division" of the Italian fleet under Admiral Faravelli resumed the bombardment. The Turkish garrison still occupied a position behind the walls and responded with a few shells, which fell short.

The Italian commander endeavored to demolish private dwellings in the city, but some of them were destroyed, and the governor's palace and the three forts at the entrance of the port are in ruins. The consulate and churches have not been damaged.

The second division of the fleet, under Vice-Admiral Thaon di Revel, has approached close to Benghazi and Derna. A bombardment of these ports is understood to have been ordered to begin on several days ago. It is probable that the landing of blue-jackets will be in the immediate future. Such a landing may possibly be decided upon after the arrival of the first division.

Mines Removed From Harbor.

Before commencing the bombardment, the Italian squadron removed the mines and made a careful revision of the hydrographic chart, in order to insure safety of the coming transports. This operation lasted several days and probably explains the real reason for the delay in the bombardment.

Four Italian officers have come to Djerba, and are proceeding overland in the direction of Tripoli. They are on a reconnaissance expedition, as the Arabs are expected to offer a stubborn resistance to the occupation of the Vilayet.

Rome and London Confirmed.

ROME, Oct. 4.—The bombardment of Tripoli was resumed this morning with the object of compelling the destruction of the batteries. Up to six o'clock this evening, no official confirmation of the surrender of Tripoli could be obtained.

LONDON, Oct. 4.—A Rome despatch from Tripoli says that it is believed that the garrison has suffered very heavy losses and that the governor is wounded. It appears that even after the demolition of the forts the Turkish gunners continued to serve such guns as were available.

It became necessary for the war ships to train their guns upon the ruins. Several private houses were destroyed by fire, but none were struck by shells. The town has been entirely deserted by the inhabitants.

Crack Artillery Shot.

ROME, Oct. 4.—In cautioning Rear Admiral Aubrey, Admiral Faravelli and Admiral Thaon di Revel to limit their action to silencing the batteries at Tripoli and compelling the Turkish garrison to surrender or evacuate the instructions from the ministry of marine told the officers to remember that the previous were about to pass under Italian control and the more damage done by the bombardment the greater would be the expense of repairing later.

A message from Admiral Thaon di Revel says that at times the action appeared to be a bit of strategy work, and that a bombardment. The officers and sailors played wagers on the results of specified gunwork. In one instance an order was given to dismount a particular battery. One of the gunners was heard to say: "If I can knock down the left turret at the first shot." When the smoke had cleared away it was seen that the turret had disappeared. The same voice behind the gun spoke again: "Now the other turret." In a flash the second mark was in ruins.

Correspondents Stung.

The representatives of the foreign governments here admiring the organization of the censorship which, although it is strongly condemned by the press, permitted the government to make all its preparations for war both on land and sea in perfect secrecy.

It appears now that the government executed a bit of strategic work at the expense of the correspondents, who went to Tripoli. These men were permitted to go to the scene of war, some of them being accompanied by a detachment of the fleet. This action was rather a surprise in view of the government's general attitude toward the press.

The correspondents, however, had not been long in Tripoli when upon the pretext that the bombardment was to be continued immediately and the desire of the Italian officers to secure their safety, they were taken aboard the warships, and as the story goes here, bottled up at sea when they were unable to communicate the course of subsequent events.

Deadlock at Sublime Porte.

CONSTANTINOPLE, Oct. 4.—Political difficulties within the capital are multiplying and it seems impossible to form a cabinet. Members of the committee of union and progress are unwilling to take office, as they do not wish to assume responsibility for recent events, while the elder statesmen refuse to undertake the task of government unless the committee retires from the field and dissolves.

A deadlock practically has been reached, and the only solution to serve the best interests of the country is held to be dissolution of the committee and the ending of the war without delay on the best terms that can be obtained. New National Defence Committee.

LONDON, Oct. 4.—The Chronicle's Constantinople correspondent sends the following despatch:

"The antagonism against the committee of union and progress, the members of which are held responsible for the condition in which Turkey found herself at the outbreak of the war, is growing. Many influential people are refusing aid to the government so long as the political away of the committee continues."

"A committee, calling itself the national defence committee, has been formed and is sending circulars throughout the country. The chief cause of complaint against the committee of union and progress are its action in ignoring the warnings of the governor of Tripoli offering the condition of the defenses and the intention of the Italians, and the fact that troops were sent to Yemen in large numbers to quell an insurrection there, the condition of the country was in danger from an outside foe. It is considered that the troops should have been reserved for service in Tripoli."

What Will Britain Do?

"The people, who are grasping every straw, see hope in the co-operation of the Turks and Arabs, who, it is believed, can carry Italy for a long time."

The young man in business sees chances of investment that can be made with a small outlay of cash. With a few hundred dollars he may attain a position that would otherwise require years of patient and hard work.

The young business man should put aside a few dollars each month to provide for such opportunities.

THE TRADERS BANK OF CANADA

CAPITAL AND SURPLUS \$5,650,000.

## PACIFIC REALTY COMPANY, Limited

R. L. Thompson, Manager.

154 Bay Street, - M. 2435

EVERYTHING IN REAL ESTATE.

HOUSES FOR SALE. PROPERTIES FOR RENT.

We specialize on Western Farm Lands.

If interested in Western Townships, we can show A1 investments.

We have a good buy in Calgary lots.

Underground development on both of these Porcupine properties has reached such an advanced stage, which the market has as yet not responded to, that judging from the heavy buying by the insiders in these securities yesterday, we are convinced the proper time to secure a stock ownership in either or both of these mines is now.

So large has become the ore reserve at the Vipond above the 140-foot level in the main workings, the directors have decided to erect at once a mill with a capacity to crush 100 tons of ore daily. The treasury is sufficiently strengthened to defray future developments and install the mill, and already the foundation work has started. We are officially informed that at a depth of 133 feet in the main shaft on the Vipond the vein measures 18 feet, and the south wall of the vein thus far has not been reached. The ore at this point shows an average assay of over 220 to the ton.

The wonderful showing on the Dome Mines, now known as the "Golden Sidekick," has been traced to within a few feet of the Dome Extension line, and, according to Mr. George Montell, there is no longer doubt but that this sensational vein will be found strong and rich on Dome Extension.

Diamond drills are now at work to prove this vein at depth, and from 100 reliable and authoritative sources, the general opinion is that it will be found equally as rich on Dome Extension as on the Dome Mines itself.

It must be remembered that it is not long since the railroad was only a promise to Porcupine. Now it is a reality.

The mills of Porcupine which are to turn out the stream of gold bars that will flow for years from this camp are only promises to-day. Tomorrow they too will be realities.

The fact must not be overlooked that before the railroad was even started, and almost before any underground development was done, these same stocks were selling at prices considerably above the present quotations.

It requires no further facts or arguments to emphasize the great speculative opportunity which Vipond and Dome Extension offer. Now is the right time to buy.

We have prepared for free distribution a detailed statement regarding the latest developments on these two properties. Mailed on application.
