

THE T. EATON CO., LIMITED

190 Yonge Street

Canada's Greatest Store.

Toronto.

190 YONGE STREET, March 21, 1896.

How About Easter?

Never before in all the years we've been anticipating your needs have we had such elegance and excellence in new things to wear. All over the store you'll find the expression of dazzling beauty and extreme novelty in such assortment as you'll see nowhere else in Canada. The several stocks are reaching very near perfection. Test them, and you'll not find them wanting at any proper point. Our preparations for Easter are notable in several ways, including the largeness of stocks, the extent of varieties, the richness of styles and the closeness of prices. We are far out of the crowd in Stylish Cloaks, Millinery and Dress Goods, and you can't imagine a worthy style or quality that we haven't got. New things are constantly coming to us from the leading fashion centres, and a larger intelligence inspires the management to do better and better. It is easy; we're not resting on past reputation. Our ambition, our business, our ideas are progressive, and the best possible values of last season are surpassed by the better possible values this spring. Everything is leaning your way, and those who investigate these goods and prices will fare better than those who don't.

APRAIL FOR ST. LAWRENCE MARKET.
The pavements surrounding St. Lawrence Market have been in a disgraceful condition for several years back. The whole neighborhood should be asphalted, or covered with some material that is impervious to the filth of all sorts that accumulates in and about the market. The pavement on Colborne street, also very bad shape. Of all streets in the city, this is the one that should have a clean, up-to-date pavement. The warehouses are all filled with fruit, vegetables and other perishable produce, and the soaking of decayed matter into the cedar blocks with which the street is paved makes the locality a particularly disagreeable and unhealthy one. The district is much in need of being put in better sanitary condition. A couple of lavatories and such like conveniences are also needed in connection with the market. In addition to making these improvements, the Property Committee ought to see that provision is made for keeping the place clean and respectable.

THE STORM.
The storm that visited this district yesterday morning and the night previous was unexpectedly sudden and severe. There are probably more stalled railway trains in the neighborhood of Toronto this morning than there ever were during any previous storm for 20 years back. In the city the street railway system was virtually at a standstill up till near midday, by which time the sun had solidified the snow and prevented it from drifting. The inconvenience that citizens were put to by reason of the failure of the trolleys to run must be attributed altogether to the raging elements. The Railway Company can do no more than hold to keep the cars in motion. Such a blockade does not occur more than two or three times during the winter, and the inconvenience on such occasions rarely continues more than half a day at a day at the most. On the other hand, the trolleys give a very good service. They cannot be blamed for the inconvenience citizens had to put up with yesterday. No device that we know of could have much falling and drifting snow. The weather Bureau predicts spring weather for to-day. The sun is now very powerful and a few hours' sunshine will dissipate the clouds that are now almost as fast as they accumulated.

THE AMHERST BAY SANDBAR.
Except as a site for a summer cottage, there is no use in it to which the sandbar along Ashbridge's Bay can be put. If sites are required for manufacturing purposes, hundreds of acres can be easily made at the west end of the marsh without interfering in the least with the sandbar along the lake front. There is no reason why the sandbar should remain a waste if it can be utilized to advantage for summer recreation.

THE AMHERST BAY SANDBAR.
The operations for 1895 were more successful than in any past year; policies issued exceeded \$1,000,000, the cash income reached \$31,478 while the sum of \$7,000 was added to the net surplus, now amounting to over \$400,000, after setting aside \$25,000 of the year's earnings as an additional contingency reserve fund to anticipate a change in the basis of valuation. The solid character of the Company's assets is vouched for by the comparatively small amount of interest due, and the failure to find among them any trace of such undesirable items as "loans to agents," "bills receivable," "other North American claims," "higher ratio of assets to liabilities than any other Canadian company," and compares most favorably in this respect with the very best of the American companies.

THE AMHERST BAY SANDBAR.
The proposal to assess vacant city lots on a farm land basis is entirely contrary to the principle that underlies our assessment system. There is only one rule that should be observed in the assessment of property, and that rule is to assess it at its actual market value. If we keep on making exceptions to this rule, there will be no end to the confusion that will finally ensue. The Ontario Assessment Act is already full of glaring inconsistencies and unfair exceptions. Instead of making the act still more heterogeneous, an effort should be made to simplify it by adhering strictly to a few equitable principles that should underlie the structure. If Mr. German's proposed bill goes through, that is now worth, and assessed at, \$1200 an acre, may be rated at \$300, or even less. The city's representatives in the Legislature and Mayor Fleming ought to keep an eye on the schemers who are trying to foist this iniquity on the city.

AN IMPORTANT QUESTION ASKED AND ANSWERED.

"Are you a lawyer, or a doctor, or a clergyman, or are you and your family dependent on some other profession or occupation for an income? How do you intend to provide for the continuation of the income after your death?"
"Delve, plod and contrive as you may to secure comfort and ease to those who come after you, you find nothing so sure as a life insurance policy to do it."
The objecting argument, "I cannot afford to insure," should teach a man the imperative necessity for insuring immediately. If so truly difficult is experienced in paying a small premium now, what a frightful condition the family would be thrown into by the husband's or father's death."
A life insurance policy is the most valuable species of property, because

Sole Agents for the Slater Shoe
Made by the Famous Goodyear Welt.

It is available at a time when all other resources may fail. The company can point to a successful past record, having a low expense rate, large surplus and equitable plans. In respect to these and other important essentials the North American Life stands unequalled. The success which attended the operations of that progressive Home Company during the year 1895 was unparalleled in its history.

The excellent results which have been paid to holders of matured investment policies in the North American Life, combined with the Company's unexcelled financial position, should commend it to the patronage of all classes of intending insurers. Full particulars of the Company's attractive investment plans and copies of its last Annual Report will be furnished on application to William McCabe, F.I.A., Managing Director, North American Life Assurance Company, 22 to 28 King-street west, Toronto, or to any of the Company's agents.

NORTH AMERICAN LIFE ASSURANCE COMPANY.
The annual statement for 1895 of this solid and progressive Company has just been published, the official returns to the Dominion Government having been promptly made on the 31st of December last at the close of its year's business. The report shows that substantial and additional gains have been made to the insurance force, assets, net surplus, the movement of which items from year to year indicate progress or the reverse of a company.

There are four items in a life insurance company's statement from which a very good idea can be obtained of its progress or retrogression. If these items are carefully compared at the end of certain years, the company's record and standing can be ascertained. The items referred to are cash income, assets, net surplus, and insurance in force, and at the end of the last three quinquennial periods of the North American were as follows:

Cash Assets Insurance Income. Net Surplus.
1886. \$183,401 \$313,748 \$4,840,257 \$3,840,011
1891. 324,601 1,424,225 12,442,444 12,114,480
1895. 531,478 2,300,518 15,442,444 14,025,218

During the last quinquennium it will be observed that the cash income has increased by 64 per cent, the assets by 122, the insurance by 53, and the net surplus by 219.

The operations for 1895 were more successful than in any past year; policies issued exceeded \$1,000,000, the cash income reached \$31,478 while the sum of \$7,000 was added to the net surplus, now amounting to over \$400,000, after setting aside \$25,000 of the year's earnings as an additional contingency reserve fund to anticipate a change in the basis of valuation.
