Water Question Is Taken | WORK AMONG GIRLS

Commissioners To Be Asked to Furnish Cost of Schemes to Increase Supply.

The city council last night took up regarding the water supply. the question of increasing the local water supply.

A motion introduced by Ald. Matthews, as follows, was the means of bringing the matter to the front:

'Moved by Ald. Matthews, seconded by Ald. Booth, that His Worship Mayor Judd be, and is, hereby instructed to request a special meeting of the board of water commissioners to take up and consider the question of furnishing the citizens of London with an adequate supply of water, and at an early date to place before the council estimates of the cost of securing such necessary supply, according to the following suggestion, viz.:

"1. A second system of waterworks, drawing its supply from the Thames River, said system to cover the congested area of the city, the main to extend easterly to Egerton street, for fire, manufacturing, street watering and other than domestic purposes.

"2. A direct and exclusive system from Lake Huron to London for all purposes. "3. A trunk system from Lake Huron to London, having in view

the supplying of municipalities contiguous thereto. "And, further, that if considered advisable, his worship the mayor be instructed to call one or more special public meetings of ratepayers and citizens, to consider and

discuss the various plans and esti-

mates, so that the question may be

Time To Be Doing.

In introducing the motion, Ald. Matthews said it seemed to him that it is time for the city to be doing something

"The scarcity of water has reached a stage which cannot longer be ignored," he said. "The city is in a position where it is liable to be burned down at any time. People are being charged year after year for water they are never supplied with. In the summer time the streets are so dusty they can scarcely be used. I feel that it is time the council and the citizens had something to say on the subject, and for this reason, I have asked for the special meeting of the commissioners."

Ald. Wyatt said he was agreeable to the motion, if artesian wells were added as an alternative
