. . .

cerning the navy. This is largely due to the fact that they have been fed chiefly upon news emanating from Conservative sources in Canada, and that they were misled by Mr. Borden and his colleagues who visited England last year. They evidently did not stop to think that the whole population of Canada could not change its views with as much facility as Mr. Borden and his colleagues, who in 1909 and 1910 were entirely in favor of a Canadian navy incerning the navy. This is largely due to upkeep and depreciation of a single motor the fact that they have been fed chiefly car." with as much facility as Mr. Borden and his colleagues, who in 1909 and 1910 were entirely in favor of a Canadian navy instead of a contribution. Now that they have found out the truth about the matter, the people of the old country express regret that the admiralty should have taken any course seeming to bolster up the cause of one political party in this Dominion.

SUNDAY, MARCH SIXTEENTH.

Lieut.-Col. Lenox Irving, late commanding officer of the 42nd Regiment of Canadian militia and a prominent resident of Pembroke, was born on this date in the year 1863. He was educated at usen's University where he was captain of the championship football team and a member of the celebrated Queen's hockey team. He took up the practise of law in Pembroke in 1900.

the naval question in Canada, and yet the political parties in the mother country are the political parties in the mother country are the measurement of the Liberal members of parliament.

Such attempts are merely another illustration of the fact that the government is afraid to go to the country.

DUE.

In but a few short weeks she'll say; "My darling, grab thy mace afraid to go to the country.

Housecleaning's taking place." political parties in the mother country are government has gone too far. Some think it has not gone far enough. There is also Hon, Mr. Morrissy said things fear expressed that Germany, which, about the New Brunswick highway act through Admiral Tirpitz, recently gave expression to most concillatory sentiments, which opponents of the government were pression to most concillatory sentiments, saying not so very long ago, and for which would not take kindly to the British naval they were roundly denounced by members

"Pardon me, madam."

"For what?"

"I inadvertently jabbed my eye is your jewelled hatpin."

They were roundly denounced by members the present of the government were pression to most concillatory sentiments, saying not so very long ago, and for which they were roundly denounced by members.

It is impossible either in Canada or the old country to keep out of politics a question involving enormous and for which is the government. The whirliging of time brings its revenues. old country to keep out of politics a question involving enormous expenditures of public funds. Of one thing, however, the people of the mother country may be fully assured. All parties in Canada, with the possible exception of a small group of Mr. Borden's allies in Quebec, are heartily in favor of Canada taking her proper place and doing her rightful share in providing for the navel defense of the Empire. Polifor the naval defense of the Empire. Poli-

for the naval defense of the Empire. Political differences begin when the manner in which this should be done is under discussion. There would be no difference in this regard if Mr. Borden had not abandoned the policy which he supported in 1999. The Liberals are today where they were then, and are vigorously upholding the true Canadian policy. Mr. Borden and his colleagues know very well that there is no emergency, hence there is no excuse for a gift of \$35,000,000 to the Admiralty at a time when English ship-yards are full to the limit with work, and new ship-yards could be established just as well in Canada as in the old country. Moreover, the proposed contribution would have to be followed by other contributions from year to benefit from the establishment of a great ship-building industry at its ocean ports. If Mr. Borden will go to the country he will soon learn that he has wholly misinterpreted the feelings of the Canadian people.

The news that Conservative papers in Canada get from the old country must be prepared by correspondents who have a dimension. The Standard's Lord don cable this morning tells of people who done they write only a few and Germany to be at war within two months. Only a joker, and not the party for which he is having it washed.

A DIFFERENCE.

The Sunday school teacher asked his class to give him the definition of a "pillgrim" on the pilgrim is a man who travels a great deal."

This did not exactly suit the teacher, so the matter and demanded a withdrawal. A long wrangle ensued. It appears to be very difficult for some members of the government to adhere to the principles of our town the contribution would be deprived of benefit from the establishment of a great ship-bulleding industry at its ocean ports.

If Mr. Borden will go to the country he contributions from year to be matter and demanded a withdrawal, A long wrangle ensued. It appears to be very

NEW BRUNSWICK AGRICULTURE

terpreted the feelings of the Canadian peo-

An interesting bulletin issued at Ottawa and relating to agriculture in the province of New Brunswick shows clearly the need of greater effort to increase farm producof greater effort to increase farm production in this province. One is surprised to learn how greatly the orchard industry fell off between 1900 and 1910. The figures show that there were 456,115 apple trees bearing in 1900, compared with 393,862 in 1910. It is true that there has been a notable increase since 1910, but it is obvious that there is room for very great expansion of this industry, even when we compare it with the figures of a dozen years ago. Summing up the tables which are given, the bulletin says:

"The area under wheat is very little more than half what it was ten years ago;

An old lady on her way to church the

"The area under wheat is very little more than half what it was ten years ago; oats, hay, potatoes and roots are the only crops which show increases in area and production. Horticulture indicates that the number of trees and production of fruit is less than it was in the last census. The area under vegetables and small fruits has materially increased."

While there was a dight increased.

while there was a slight increase in the CURE YOUR number of horses during the ten years from 1900 to 1910, there was a decrease in the number of milch cows and other horned cattle, and a decrease of 13 per cent. in the number of sheep. The production of wool fell off 30 per cent. There was, however, an increase of 70 per cent. in the number of swine. While the price of number of swine. While the price of horses sharply advanced during the tenycars, that of milch cows and other cattle declined, and the like was true of sheep, while the price of swine remained almost stationary. The bulletin says that the average of farm wages has increased nearly 50 per cent. in ten years. The land area of the province is placed at 17,863,266 acres, of which only 25.3 per cent. was occupied as farm land in 1911. The forward movement in agriculture in the province has certainly not come too soon.

OVER 1,000 CHILDREN

More than 1,000 children have been rescued by the Children's Aid Society of Ottawa and placed in good homes. As the Ottawa Journal points out, this does not fifty thousand boxes are offered free to find the price of swine remained at the back have been cured, in the real meaning of the word, by a little Stillingia, Iodide of Potassium, Poke Root, Guaiac Resin and Sarsaparilla. Any person can take these remedies in any reasonable amount with perfect safety, and the results have been found to be astonishing. It has been proven that this combination makes up the best rheumatism remedy in existence, having actually cured many stubborn cases of over 30 and 40 years standing—even in persons of old age.

The five ingredients mentioned above prepared with great accuracy and skill not only in regard to proportion, but also in selecting the best material, have been put up in compressed tablet form, and are called

Ottawa Journal points out, this does not mean merely the betterment of 1,000 chil-introduce it dren, but of the increasing number of their descendants. And yet the Journal says the whole revenue of the Society during any one of the nineteen years since it was organized would hardly enable a citizen to keep up an average automobile for a year. The Journal says:

"It is astonishing when one reflects how little in the way of money can effect so bination ready for use.
