

Twice-a-Week Times Published every Tuesday and Friday by THE TIMES PRINTING & PUBLISHING CO., LIMITED.

Having devoted two articles to the exposure of the sophistries, loose statements and misrepresentations of Mr. A. S. Goodève, M.P., at the Vancouver Conservative gathering last week, the Times proposes to turn its attention to the remarkable utterances of Mr. George H. Cowan, M.P., at the same meeting.

Mr. Cowan is not without a vein of humor in his otherwise insupportable constitution. He told his audience that "eighty per cent. of the products of Canada are consumed at home, while sixteen per cent. of her exports go to Britain, leaving only four per cent. to make all this fuss about."

Mr. Cowan waxed very pious and said he "thanked God that hostile legislation was unthinkable in Great Britain against Canada" and that "he would to God that hostile legislation against England were unthinkable in Canada."

There are three salient features of the Colonist's defence of the government. The first is that these lands did not come under the terms of the order-in-council, as the applications were approved before April 3, 1911.

ported into the United States have to pay a tax of 60 cents per thousand feet and that it is cheaper to manufacture these into shingles in Canada and ship into the United States in the face of a 30-cent duty than it is to pay 60 cents duty on logs and manufacture them in the United States.

The difficulty with the man in the audience at a Conservative meeting—unless he is well informed on the particular phase of a subject under discussion—is that he does not know whether the speaker is telling the truth, suppressing fact or telling lies.

Mr. Cowan is not without a vein of humor in his otherwise insupportable constitution. He told his audience that "eighty per cent. of the products of Canada are consumed at home, while sixteen per cent. of her exports go to Britain, leaving only four per cent. to make all this fuss about."

There are three salient features of the Colonist's defence of the government. The first is that these lands did not come under the terms of the order-in-council, as the applications were approved before April 3, 1911.

Hon. Mr. Ross will not deny that the government does know something officially of lands purchased for the "ultimate vendors" of these lands named by the Times.

To the Times's suggestion that these lands—or the first payment thereon—was made by cheques which were never presented at the banks for payment, the Colonist replies that payment is made to government agents and not to the government. The government, it says, could have no record of this excepting by duplicate receipts issued by the government agent who approved the applications.

Reverting again to the interpretation which the Minister of Lands and the Colonist put upon the words "approved" in respect to applications, the Times charges that this is not the same interpretation which the government or its agents put upon these orders when and after the order of April 3 was passed.

ash might be artificially produced by shutting up fowls for long periods of time in a dark place. He therefore asked the English expert, Mr. Edward Brown, to test this theory.

Experience therefore would seem to indicate that so far from the question of the supply of mineral ash to animals being a minor one, it is of the most vital importance to the stockman. It seems probable that animals can always obtain in the food given them a sufficiency of protels to maintain health, if not to produce the best results for the stockman's point of view.

NOTES ON POULTRY RAISING FOR MARKET

In his last article the writer described the disease known as the poultry sickness in South Africa by the ravages of which thousands of fowls were annually destroyed.

FORT FRASER LANDS

The Times is disposed to exercise a degree of sympathy with the morning paper in the championship of the affair of the Fort Fraser lands. We are quite aware that it must be peculiarly odious to the Colonist, with its widely-known high standard of veracity and its almost superhuman abhorrence of everything that even wears the color of fabrication, to be compelled to so much as refer to impeachments of the government in its sanctified columns.

FORT FRASER LANDS

After twice grandiloquently proclaiming that it would have nothing further to say for itself or the government about the Fort Fraser lands, the Colonist this morning reverses its own order-in-council and devotes its whole editorial effort to an attempt at explanation of the case. The Times knew the morning paper would be compelled by public opinion to do this, and there could be no more complete or satisfactory corroboration of all that the Times has alleged in connection with the Fort Fraser land deal than appears in the columns of our contemporary this morning.

THE CITY MARKET

Table listing market prices for various goods including coal, butter, eggs, and flour.

WHOLESALE MARKET

Table listing wholesale prices for various commodities such as bacon, hams, and produce.

PRINCE OF WALES

While His Majesty was investing his son with the insignia the letters authorizing the Prince to hold the principality of Wales in trust for the King of England were read and later handed to him.

NO MORE TIRED FEET

A trip to our drug store—no further trouble and you need not be worried regarding hot pavements and thought of much walking.

BREAD MERGER HAS BEEN ORGANIZED

Capital Amounts to \$5,000,000—Plans to Extend Operations in the West

Winnipeg, July 13.—The so-called "bread combine" of the leading bakers of Montreal, Toronto, Winnipeg and Vancouver, which has been pending for some months, went into effect today, and is now a chartered corporation with a capital of \$5,000,000.

FOREST FIRES STILL RAGING

Portland, Maine, July 13.—Forest fires in the Maine wilderness and New Hampshire mountains continue to burn unchecked, and are hourly consuming hundreds of acres of valuable timber land.

SEARCH FOR BODIES

Detroit, Mich., July 13.—The fire situation throughout northern Michigan appears to be generally under control, but the threatened fire below ten miles an hour in most sections.

FRUIT WITHERING

Toronto, July 13.—Showers on Tuesday did little to revive the parched land. A heavy shower which passed along the south shore of the lake of the Grimsby district laid the dust, but did not help the berries and small fruits, and damaged the cherries which are matured to a fine quality.

LONG AERIAL JOURNEY

Washington, D. C., July 13.—Harry N. Atwood, the Boston aviator, declares that the long aerial journey from New York to Chicago will be from New York to Chicago.

RESOLUTION AGREEMENT

Resolution Agreements—Rule for Ireland

Yesterday was the occasion of the Bo Victoria, which was the occasion of the Bo Victoria, which was the occasion of the Bo Victoria.

WHEATLEY TAKEN

Wheatley, taken by the finest celebrant ever given in the annals of the Pacific.

SEARCH FOR BODIES
