BELGIUM SEEKS HUSBANDS FOR HER YEARNING WOMEN

A "Matrimonial" Celebration Arranged to Bring Together Affinities by a Walloon Society That Has Fostered Some 20,000 Marriages in the Last 20 Years.

Paris, June 1.—Faced with a population problem almost as great as that of France, Belgium is taking unusual measures to find husbands for yearning young women. Invitations have just been sent out in the Walloon region to all eligible men to attend a "matrimonial celebration" in Brussels next month, at which every effort is to be made to discover affinities for those as yet unemployed. Candidates have been requested to send their names in advance to the president of the society organizing the celebration, and will be provided with cards of introduction to scores of comely young Belgian girls, with chaperoned visits to lonesome roads and leafy forests, or, if temporarily inclined, to the noisy places of amusement, affording opportunities for kissing and love making, and pertinent discussion of the ways and means of raising a greater Belgium.

POLES FOUND WAY TO MAKE MONEY

Bought German Newspapers and Resold Them for Waste Paper at Profit. Berlin, May 16.—(By Mail.)—It was observed recently in a small station on the German-Polish border that the people were buying very large quantities of German newspapers. This was attributed at first to a desire to absorb the German point of view on the part of the Poles, but some sceptics insisted upon an investigation. The fact was brought to light that a group of ingenious Poles was purchasing German newspapers at curiously low prices and reselling them as waste paper with nearly 100 per cent profit. The paper is pulped and resold in Russia, where it is again used as news print. It is said the originators of the idea have made much money.

RAN STILL 40 YEARS THINKING IT LAWFUL

West Virginia Ancient Gets Into Police Clutches After Long Career.

Petersburg, W. Va., June 6.—"I've been making whiskey since on forty years and this is the first time I know there was any law against it," said Henry Hours, a veteran resident of the Smokehole district, located in Grant and Pendleton counties, when visited by State police and arrested today. A native of the district proffered information that "Old Man" Hours was running a still and was done so ever since he could remember. Corporal Briner, who led the State policeman, said that the episode was the beginning of an educational campaign in the Smokehole region.

Motor Car Deaths Growing Monthly In New York City

Col. Cornell Believes Number for State for 1922 Will Be 2,000.

New York, June 5.—In presenting statistics of the number of persons killed by automobiles for the first five months of this year, Col. Edward S. Cornell, president of the National Highway Protective Society, yesterday predicted that the death rate from automobiles in this State alone would exceed 2,000 persons for 1922. "In other States adjoining New York," he said, "automobile deaths have been kept down by intelligent legislation and efficient administration, but in our own State the 'killings' month steadily every month. We need an entirely new code of laws to cope with this growing menace, and it is useless to keep on adding one amendment after another to State laws which are obsolete in the light of the increasing motor traffic."

TURKS PROPOSE HUGE MASSACRE

Greatest Slaughter of Christians in History Forecast—Urgent Warning.

Paris, June 5.—The greatest massacre in history was forecast today by Dr. Mark Ward, head of the Near East Relief hospital of Harpoot, Anatolia, who has recently been deported from Anatolia by Kemalists, and today passed through Paris on his way to Washington to lay the case of the Christians of Asia Minor before the State Department.

"There are approximately 2,000,000 Turks and 1,000,000 Christians in Asia Minor," Dr. Ward stated. "Indications are such as to leave no doubt that the Turks are planning the extermination of this Christian minority. I have practically been warned that if we continued the work of helping Armenians and succeed in putting them to massacre the whole Armenian population. We have been too easy in the past. We shall do a thorough job this time, an official told me."

"Official actions justify these declarations. Soon after coming into power the Kemalists appointed a liaison officer to work with us at Harpoot. And orders were sent to me that we could not admit any persons or give the poor relief without his consent. When we refused they ordered the deportation of all Near East officials in Harpoot who spoke Armenian."

"The condition of the Greeks is as bad as that of the Armenians. There are approximately 500,000 of these people in Turkey. They have retained their religion. They are now being indirectly massacred by the thousands. They are not permitted to leave the country and are being deported from the coast to the extreme interior under conditions which they cannot survive. During the winter one band of 20,000 was driven through Harpoot. From Diarbekir our last station only a hundred miles further. I learned that only 10,000 passed there. Probably not a thousand reached their destination. These deportations are going on constantly."

"The attitude of the Kemalists can be seen in the fact that in the Harpoot district, where a population of approximately 100,000, there are 1,000 Christians who have received passage money from relatives in America, but are not permitted to leave. There are also 200 American citizens by marriage, naturalization, etc., who are being held. Two naturalized American citizens, carrying passports, were refused permission to leave."

"The situation is tending daily toward a general massacre which the Turks have proved they are not averse to and which can only be prevented by strong action by America and the other world powers."

War on the tent caterpillars continues with all the persistence orchard-owners are capable of, and as a result of the millions slain by sprayer, poison, paraffine, shingle and hand-picking, the orchards will come through the caterpillar season in much better shape this season. A species of black fly has also been very numerous around the apple trees this spring, attacking the apple blossoms, and buds, destroying them with great rapidity and leaving twigs and branches brown. Despite the many insect pests, the apple trees presented a lovely appearance this week, particularly down through Lower Greensboro, where the orchards at the Crosser Farm and at W. P. and F. L. Fox's rivalled anything to be seen in the Annapolis Valley. Unfortunately, the high winds, accompanied by the unusually hot weather of Wednesday and Thursday, have scattered nearly all the blossoms, and some fruit growers think that some of the fruit may be damaged from this cause.

Advise Tonic For Girl As Best Broken Date Cure

Magistrate Lectures Maiden Who Took Poison Because Date Wasn't Kept.

Philadelphia, June 5.—After remarking sympathetically that he had been "stood up" a time or two himself, Magistrate Perri today suggested to Frances Ittinger, an 18-year-old girl, that there were available young men in the world and that it was folly to take poison when one of them failed to keep an appointment.

She was arraigned before the Magistrate on a charge of having attempted suicide.

The Magistrate suggested further that if suicidal ideas ever overtake her again when some one breaks a date with her she take a tonic instead of poison.

"In such cases," he said, "it's generally your liver and not your heart that's out of order."
