Dr. Marten's "Walk-on-Air" Soles
Over 40 years ago Dr. Marten Devised the original air-cushion sole to give extra comfort to his patients' aching feet. Using a unique process of honeycombed air compartments and soft cushioning at the ball of the foot these soles gently support to give a degree of comfort never before experienced - like walking on air.

- Resistance to Corrosive Elements
This unique sole is resistant to Oil, Fat, Acid, Petrol and Alkali.
- Softness and Elasticity
A combination of honeycombed air compartments and soft cushioning makes walking like floating on air.
- Anti Shock
Absorbs the shocks on uneven and rough walking surfaces.
- Anti-Slip Special tread pattern designed to limit slipping.
- Insulation The Air Cushion Sole is an excellent insulator against cold which works like double-glazing.
