

2 to 15 horse-power and are used for wood-sawing, feed-chopping, water-pumping, and other numerous purposes, to replace man, wind- and horse-power on the farm. In 1918, at the Weston Works, the firm commenced the manufacture of agricultural tractors in a newly equipped plant.

Two other acquisitions may be mentioned: In 1893 the firm by acquiring the Corbin Disc Harrow business of Prescott, Ont. commenced the manufacture of this implement, and in 1904, mechanical manure spreaders were added to the Massey-Harris "line" through the purchase of the Kemp Manure Spreader Co., of Stratford, Ont.

Although there has never been an organic connection between the Massey-Harris Company and the Sawyer & Massey Company of Hamilton, Ontario, the two firms were informally associated for a number of years through the persons of Mr. Hart Massey and his sons, during which time the former company managed the sale of Sawyer & Massey goods—traction-engines, and threshing-machines—in Western Canada. This arrangement ended some years ago.
