

## MARKET REVIEW AND FORECAST

Toronto, Monday, June 12th. — An improved feeling due to favorable crop prospects is evident in trade circles. Dealers, however, are not putting full faith in

optimistic reports but are inclined to wait until they are on the eve of being realized. Reports indicate a good harvest in the northwest; the largest in history.

The dairy season is now fully opened and while receipts of cheese are not so large as last year to date they are rapidly making up for lost time.

A review of market quotations for this week as compared with last shows Manitoba wheat stronger, oats strong, other grains firm, but steady, cheese much improved, and cattle and hogs decidedly up on the up grade. The cattle and hog market from the farmer's point of view is the most pleasing feature of the week. Sheep have suffered a further decline. Call money here rates at 5 1/2 per cent.

**WHEAT**  
Conditions have been favorable for a sharp advance in quotations on Manitoba wheat this past week and an advance of 2 1/2 cents is recorded. Crop killers have been at work. It is now generally conceded that the unfavorable reports of the work of the Hessian fly which caused a sharp advance at the first of the week were exaggerated. More favorable reports and the fear that reciprocity might go through at an early date brought prices down somewhat at Chicago but the general result of last week's operations shows an advance. Quotations at Toronto are: No. 1 Northern, \$1.03 1/2; No. 2, \$1.01; No. 3, 90 1/2c. Ontario wheat as mentioned. A few odd car loads are changing hands at 85c. Quotations outside mills are 85c to 86c. On the Farmers' Market wheat is 85c to 86c; goose wheat, 85c.

**CORSE GRAINS**  
Oats are the most active proposition on the market. Quotations on other grains remain firm but there is a slight decline. Quotations are as follow: Oats, Quotations are as follow: Oats, Canada Western No. 2, 41 1/2c; No. 3, 40 1/2c; Ontario No. 2, 37c to 38c; No. 3, 36c to 37c; No. 4, 35c; No. 5, 34c; No. 6, 33c; No. 7, 32c;
