

How many hairs? has a Bear?

We doubt if there is any person in Canada who is not interested in Furs, and who does not admire their beauty, softness and warmth; but how many have ever thought of the great number of hairs required to cover a skin to produce this warmth and softness?

The actual number of hairs on any given skin can be actually determined by mathematics and an abundance of patience.

We have cut a pony out of a black bear skin, one inch square in size—have weighed and depicted it with the bank and are giving

\$3000.00
IN PRIZES

to the 64 persons who are nearest correct in their estimate of the actual number of hairs on that one square inch of black bear skin.

This contest is entirely free to every one who complies with the conditions, and we might frankly state that the sole object of this contest is to familiarize as many people in Canada as possible with the wonderful bargains they can secure in stylish, guaranteed Furs and Fur garments, through Hallam's system of dealing direct. "From Trapper to Wearer."

Just send today for a copy of the 1916-17 Edition of

"Red Wing" Thresher Belts

Deliver the Service
As well as the Power

You know how threshing takes it out of a belt. To stand the weather, the side-strains from the wind, the staking, and the frequent putting on and off, a belt must be specially made, with extra strength and durability.

Our "RED WING" Stitched Canvas Thresher Belt has these qualities built right into it, and as a result it has taken first place with Canadian Threshermen.

In making a "Red Wing" Belt, heavy specially woven Sea Island cotton duck is folded to four or more plies of the desired width, after being spliced diagonally to make an endless strip. The layers are stitched together at quarter-inch intervals with Sea Island cotton yarn, with double stitching at the edges and for several feet at the splice.

Thorough impregnation with a special oil provides permanent lubrication of the fibres, preventing friction and wear from the bending over the pulleys. This oil is kept in the belt, and the surface protected from the weather by a red paint which blends with the oil and forms a protective coating. A powerful machine then takes out the excess stretch, leaving just enough elasticity for satisfactory service.

After several months "seasoning," this "Red Wing" Thresher Belt is ready to give you more service per dollar of cost than you can get from any other belt.

If you prefer a Rubber Belt, give our "Star" or "Lumber King" a trial. Our nearest branch is equipped and ready to give your belting needs prompt attention and service.
