Rippling Rhymes

NO HELP
In older times I paid out men to have my chores and errands done. I paid one man to mow the grass and hoe the growing garden sassa; another came to prime the pump and take the dirt cans to the dump; I paid a man to wash my car, and dope the kitchen roof with tar. While there were men who worked for hire, I just sat around and paved my lyre, with hands as white as driven snow—no sort of labor did they know. And I had lost my appetite, and couldn't get much sleep at night, and I was fat and short of breath, and looking for an early death. Then all the fellows went to scrap and shoot the Prussian of the map, and now would come to do a chore or piece of errand any more. I was obliged to shake my slosh, and as a topper, out a swath. I milked the cow and groomed the men, and mowed the lawn like other men, and when my car was out of which I lay beneath it on my back, and tried to remedy the wreck, white slimy grease ran down my neck, and my clothes were green and blue, and found a hundred things to do; and now my health is out of sight, and when I go to bed at night, my slumber is so calm and deep it shows new curves in balmy sleep, and evanets come from miles away to see just how I get the lay. Three women cook, and might be night to enter to my appetite. A lot of old fat boys like me are learning wrinkles two or three.

FOR SALE!

STUBBORN COUGH
Loosens Right Up
This home-made remedy is a wonder for coughs, colds, whooping cough, croup, etc. Ready and cheaply made.

Here is a home-made syrup which millions of people have found to be the most dependable means of breaking up stubborn coughs. It is cheap and simple, but very powerful. Under its healing, soothing influence, chest soreness goes, phlegm loosens, breathing becomes easy, and you get a good night's restful sleep. The usual cough and chest colds are cured by it in 24 hours or less. Nothing better for bronchitis, hoarseness, croup, whooping cough, bronchial asthma.

To make this splendid cough syrup, pour 2 1/2 ounces of Pinex (10 cents worth) into a 16-ounce bottle and fill the bottle with plain granulated sugar syrup and shake thoroughly. If you prefer, use clarified molasses, honey, or corn syrup, instead of sugar syrup. Either way, you get 16 ounces—a family supply—of much better cough relief than could be had for the price of \$2.50. Keeps perfectly and children love its pleasant taste.

Pinex is a special and highly concentrated compound of genuine Norway pine extract, known the world over for its powerful healing effect upon the membranes.

To avoid disappointment ask your druggist for "Pinex" with full directions, and don't accept anything else. Guaranteed to give absolute satisfaction or money promptly refunded. The Pinex Co., Toronto, Ont.

For Sale

New two-story Red Brick House, in East Ward, easy distance to the Motor Trucks, Ham and Nott's, Buck's, Barber-Ellis, Plano Case Co., etc., etc. Conveniences; splendid furnace, coal or gas; 3-piece enamelled bath; hot and cold water; soft water; fine electric fixtures, etc.; 3 bedrooms; clothing closets. Yes, Winter's coal in cellar.

Price \$8,975. Terms \$1,475 cash, balance mortgage.

S. G. READ & SON LIMITED
1129 Colborne St.

WINTER HOME FLOWERS

Brightening the Windows When Bloom is Most Welcome.
Cleaning and Grading Grain—How a Good Fanning Mill Properly Operated Will Greatly Increase the Yield of Field Crops—Every Farmer Should Have One.
(Contributed by Ontario Department of Agriculture, Toronto.)

It also assists the sieves because it removes part of the grain which would otherwise have to pass through them and it prevents clogging in the sieves by light seed. The two most important sieves are those of the top and bottom. The top sieve should be just large enough to let the grain pass through and keep back the larger and heavier seed. The bottom sieve should be of just sufficient size to keep back the good seed. The utility of many fanning mills is impaired by the owner not possessing a full assortment of sieves and by his using poorly-fitting sieves, many of which allow weed seeds and grain to lodge in the mill. The efficiency of many fanning mills too is often lessened by the operator being in too much of a hurry. To obtain the best results, grain should pass slowly over the lower sieve. When the fanning mill is turned too rapidly or the lower sieve has too much slope, many of the smaller impurities will not be removed.

Well cleaned and well graded grain is not only free from weed seeds, but is stronger, dirt and chaff but is larger in size, has greater uniformity, weighs heavier, is of better quality and is of stronger vitality than grain not so cleaned and graded. No farmer can afford to be without a good fanning mill and there are many farmers who would be much better off if they extended its use. Dr. C. A. Zavitz, Ontario Agricultural College, Guelph.

When the soil is moist, but not sticky, the drag does the best work. The road will bake if the drag is used on it when it is wet.

Repairs to roads should be made when needed, and not once a year after crops are laid by.
