

EFFECTS OF CAPTIVITY.

Color and Structural Changes
Noted in African Lions.

Lions which have passed their lives in the shelter and confinement of a zoological park become radically different both in external appearance and in the shape of the skull, from their brothers roaming free in the wilds of Africa, says Mr. Hollister, superintendent of the National Zoological park under the direction of the Smithsonian institution, in a recent publication of the United States National Museum. Mr. Hollister drew this conclusion after examining fifty-five specimens of lions in the museum, a sub-species of lion from East Africa, preserved in the National Museum, fifty-four of which had been wild-killed and five of which had died in captivity at the National Zoological park. These were captured near Nairobi, British East Africa, and comparisons of skulls and skins were made with specimens of equal age, killed in the same vicinity. All change of error from the use of park animals of unknown origin, which might be crosses of different sub-species bred in captivity, or specimens of wild forms not represented in the museum collections, is thus eliminated. The wild-killed animals were collected chiefly by Dr. W. L. Abbott, John Jay White, Colonel Theodore Roosevelt, Kermit Roosevelt, Paul J. Rainey and Edmund Heller. The specimens from the National Zoological park as young animals by Y. N. MacMillan.

The most conspicuous external characteristics which distinguish the park-reared animals from the wild lions of the same age and from the same region are much darker color, more luxuriant mane and much longer hair tufts on the back of elbows. When the MacMillan lions appeared at

the park, their strange, pale, grayish, buff coloration was remarked as particularly beautiful, as the men at the park had been accustomed to the much darker lions already in captivity. When, after the death of the animals, the skins reached the museum, the great darkening of the general color since their arrival was at once noted. The degree of color change was in direct relation to the period of life in Washington. Two of the MacMillan lions were males and three females, the females averaging somewhat darker in color than the males. The skin of one of the female lions which lived for five years in the park, turned so dark that at a short distance it gave the appearance of a blackish-tawny animal. The manes and tufts of hair on the back of the elbows of all the captive lions were much longer, more silky, and more cinnamon buff in color than in wild-killed animals.

In view of the success of Mr. Beebe's experiments in increasing the pigmentation in birds by confinement in a sun-room atmosphere, it would perhaps seem unnecessary to go beyond the theory that the humid climate of Washington acted in a similar manner on these lions from the highlands of East Africa to greatly darken the color of the skin.

In the skull, the changes wrought by captivity are even greater. The skulls of the captive lions are broader and shorter, more massive and bulky, and show many relative differences which in wild animals would be instantly accepted as sufficient evidence on which to base a new species. The obvious reason for these differences is that the principal muscles operating the jaws and neck (those muscles used by a wild lion in mauling and killing game, biting, gripping and shaking), have had little influence on the shape of the bones during development. In a wild-reared lion these powerful muscles

naturally and in a normal way mould the growing skull, particularly in the regions of their attachment.—Washington Correspondence of the New York "Evening Post."

Storm-Bound.

A great white waste of storm-bound world,
Wherein there is no sound,
Save where the snow-pied hemlock trees
Bend nearer to the ground.

In close embrace the earth is held
By friend, or is it foe?
This subtle, creeping, clinging force
Of softly falling snow?

Strange silences, and yet so near,
The city's thrum and thrill,
When labor turns its thousand wheels
And pleasure reigns at will.

And we who walk the country roads,
And they who turn the wheels,
How little do we ever think
Of what the old earth feels?

Dread silence of the storm-bound world,
And yet far down below,
There's muttering and murmuring,
The sap begins to flow.

Hepaticas begin to yawn,
And stretch beneath the mold,
Protected by snow blankets warm,
From January cold.

Anemones push fingers up,
From out the dark to light
And some day, when the signal comes,
Will end their winter night.
—Frank Fair, in St. Louis Globe Democrat.

If All Played Out,
Try This Prescription

When that overpowering weariness and a never-rested feeling comes over you, it shows some serious disorder is undermining your health. The cure is simple. Build up the system and nourish the body back to health by pure wholesome blood.

The one sure means of doing this is with Dr. Hamilton's Pills. They convert all you eat into nutriment and tissue-building material. Thus a weak body is supplied with new nerve fibre, hardy muscle and firm flesh. Lasting good health is sure to follow. If you really want to get well and stay well, use Dr. Hamilton's Pills, 25c per box at all dealers.

A Table of Fashion Tips.

Gray is a favorite shade.
Waistlines are never in the same place.
Sleeves coats are made with capes.
Yellow is a shade fancied by Paris.
Mushroom sailor hats are with us again.

Ivory white beads make a pretty dangle.
Gray and yellow make a pretty combination.
Small poke-shaped hats are worn.
Satin is used for dresses, suits and hats.

Killed plaids are much in favor for skirts.
Wool embroideries are more than ever used.

There must be a note of contrast in the dress.
Flag blue is combined with gray and chamois.

Sashes are tied at one side under the left arm.
The slip-on coat is one that Paris is very fond of.

Wool hop-backing is to be used for motor wraps.
Printed silk voile is used for some of the spring blouses.

Pointed trains are a feature of the new evening gowns.
Drawn work will be a feature of summer dresses.

Minard's Liniment used by Physicians

She Was Too Radiant.

The elder Swift, founder of one of the great Chicago beef concerns, hated to see women working in bright clothes, according to a man who once labored for the Swift concern, there happened to be a stenographer at the works, however, who bought all the loud raiment she could and looked like a combination of a merry-go-round and a rainbow when she walked through the yards.

One day the elder Swift caught sight of her. He called to his assistant, "Who is that?" he asked.

"Why, that's Mr. Blank's stenographer."

"How much does she get?"

"Twenty-five a week."

"Dock her."

"I'm afraid she'll leave."

Swift cast a glance at his assistant before he answered.

"If she doesn't," he said, "dock her again."—Earl Godwin in Washington Star.

Constipated Children

Nothing will so quickly remove childhood constipation as will Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take; do not gripe and never fail to regulate the stomach and bowels. Concerning them Mrs. Adolphe Noel, Petite Lameque, Que., says: "Baby's Own Tablets are the best remedy for constipation I know of, and I would strongly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

FINDING A COMET.

One Case Where a Blunder Proved a Friend to Science.

Probably the most extraordinary discovery of a comet was that of the one known as "a 1896." It happened this way, as told in Science by W. W. Campbell, of the Lick Observatory. Prof. Charles D. Perrine discovered a comet on Nov. 17, 1895, and observed it night after night till Dec. 20, 1895, when it was lost to sight in the glare of the sun's rays. Prof. Perrine and Mr. Campbell calculated its orbit for 1896, and their computations were published in the astronomical journals.

THAT AWFUL ACHE OF LUMBAGO
RUBBED AWAY FOR ALL TIME

Hoorah! No More Suffering
—Every Ache Goes Quick.

RUB ON NERVILINE

Lumbago is a peculiar sort of rheumatic trouble that affects the muscles about the loins and back. At times its agony is intense. Severe spasms of pain shoot in all directions, and become more severe on stooping.

In treating lumbago or stitch in the back, it is necessary to keep warmly covered to prevent a sudden chill. Attend to this, and then apply Nerviline freely.

Almost instantly you feel its warm soothing action. Right through the cords and muscles the healing power of Nerviline penetrates.

Quick as a wink you feel the stiffness lessening. You realize that a

powerful pain-subduing remedy is curing the pain, is easing your distress, is making you well again.

Nerviline quickly cures backache and lumbago because it has the strength, the power and penetrating force possessed by no other known remedy. Its amazing curative action is due to certain extracts and juices of rare herbs and roots, combined by a secret process, and forming a truly magical medical marvel.

Any sort of aches in the muscles and joints. Nerviline will cure quickly. It eats the pain right up—relieves stiffness, restores the muscles to their wonted elasticity and vigor.

It's the quickest thing imaginable for rheumatism, sciatica or neuralgia.

As for sprains, toothache, sprains, or strains, nothing can excel good old Nerviline.

Get the large 25 cent family size bottle. All dealers or the Cattarhonne Co., Kingston, Canada.

Just before dawn on Jan. 30, 1896, Perrine and Campbell watched it emerge from behind the sun at the precise spot they had predicted. On Feb. 14 a cablegram in cipher announced that Lamp at Kiel, Germany, had rediscovered Perrine's comet that morning, and gave its position. This differed by twenty-four minutes of time from the position in which Perrine knew his comet to be. This was not explained for several weeks, when it turned out that in translating the cipher telegram a mistake had been made and that the cablegram as sent placed the comet just where Perrine had observed it.

Before this error had been discovered, however, and on the morning of Feb. 15 Perrine turned his telescope to the spot indicated in the cablegram and saw a comet. He naturally supposed that Lamp at Kiel had discovered this new comet and mistaken it for the Perrine comet, and not until the error in translating the cablegram was discovered did it become evident that this was not so and that the error had actually directed the telescope to a new comet.

And, stranger still, this new comet was moving so rapidly that had Perrine directed his telescope to the spot indicated at any other time but just that morning he would not have seen it and it might never have been discovered.

RELIEF AT LAST

I want to help you if you are suffering from bleeding, itching, blind or protruding Piles. I can tell you how, in your own home and without any one's assistance, you can apply the best of all treatments.

PILES TREATED AT HOME

I promise to send you a FREE trial of the new absorption treatment, and references from your own locality if you will but write and ask. I assure you of immediate relief. Send no money, but tell others of this offer. Address

MRS. M. SUMMERS, Box 5,
Windsor, Ont.

BAZAINE A TRAITOR?

Surrender of Metz Was Never Fully Explained.

Francois Achille Bazaine was born near Paris in 1811. Determining in youth to seek the humble reputation in the cannon's mouth, he entered the army. Being the son of a wealthy family, he could have readily begun to carve out his career with an officer's sword, but he elected to begin with the musket of a private soldier and earn promotion by efficient service in the ranks. With such a spirit it was easy for him to win promotion, and almost before he knew it he was a general. He performed distinguished services in both the Crimean and Algerian wars, and when the unhappy Maximilian was establishing himself in Mexico, Bazaine, in command of the French troops, conquered and held that country for the ill-starred Austrian prince.

After the early disaster of Sedan in the Franco-Prussian war all France looked to Bazaine to save it from the oncoming Teutons. His name was upon every lip. The fate of a nation was in the palm of his hand.

While the eyes of his countrymen were upon him, Bazaine made a move that caused all France to stand aghast. Retiring with his vast army into Metz, he made only a feeble resistance, which allowed the Germans to surround the city and bottle him up in a siege; and thereafter his defence of Metz showed a weakness that struck terror to the heart of France. Bazaine had with him 180,000 men, including 6,000 officers, 143 generals, three field marshals, and hundreds of pieces of heavy artillery, and the city was defended by a modern fortress that seemed impregnable. Yet on October 27, 1870, before making half a fight, Bazaine surrendered the entire city and this entire force to the Prussians.

He was at once branded as a traitor who had sold his country to the hated enemy. As evidence to the contrary, he declared that his army had been starving and unfit to fight and that he had made a report to the French Government to that effect; but there was no record of such a report.

The most charitable view that any Frenchman took of the catastrophe was that Bazaine was grossly incompetent. But this theory could not harmonize with his past record. Brought before a court-martial on the charge of treason, Bazaine was

convicted and sentenced to be shot, but his old colleague, Marshal MacMahon, when elected president of France, took pity on him, commuting his sentence to twenty years' imprisonment.

Bazaine now treated France to another mystery and another sensation. He was found missing from his cell, and the news was sent abroad that he had escaped through the assistance of his faithful Mexican wife, but the escape could not have been effected without the connivance of some one powerful in the Government. He fled to Spain and after three escapings assassination died suddenly in 1888.

His purpose in surrendering Metz will ever remain one of the secrets of European history.

Minard's Liniment Lumberman's Friend.

THE KETTLE SONG.

I wish the kettle would sing again;
Just as it used to do;
I wish it would sing of a lion slain—
Of a pirate crew on the Spanish main;
Of a clipper ship on the sea-way high,
With a cabin boy and the boy was I—
Just as it used to do.

I wish the kettle would sing again,
Just as it used to do,
Of a little girl in a bonnet red,
And saved by a prince from a hydra-head.
That lurked in the corn that towered high,
And the girl was she and the prince was I—
Just as it used to do.

I wish the kettle would sing again,
Just as it used to do,
I wish it would sing of war's alarms,
The roar of cannon and clash of arms
Of a blue-clad boy where the strife ran high,
With face to the steel and a heart to die—
Just as it used to do.

I wish the kettle would sing again,
Just as it used to do,
I wish it would sing of war's alarms,
The roar of cannon and clash of arms
Of a blue-clad boy where the strife ran high,
With face to the steel and a heart to die—
Just as it used to do.

I wish the kettle would sing again,
Just as it used to do,
The lyrics it crooned and the tales it told—
By the hearth is chill, and the years are old—
The fancies it whispered have taken wing,
And never again will the kettle sing—
Just as it used to do!

—John D. Wells, in Buffalo News.

A SAVING WAR.

Men who have given profound thought to the crisis that has come upon the world unite in considering it unique in many respects and altogether unparalleled in human history. They point out that all the perished nations of antiquity—all the great states that have run their courses and no longer exist—passed through three clearly defined phases or stages of growth between their origin and disappearance. They began with an age of faith in which their religious ideas and conceptions, however crude, cemented the people into unity. From this they passed into an age of skepticism and waning faith in which the old beliefs lost their vitality and compelling power. The next step in due and natural order was into materialism when the objects of sense rather than the things of the spirit were enthroned as the worth-while ends of life. If there is another step beyond materialism, we do not know what it is. Human experience throws no light upon the matter, for all the nations which sank into materialism perished. The civilized states of earth to-day have had their ages of faith, ardor and intense, when their religious beliefs and convictions were the most important facts of life. The skepticism began to gain ground and with it an epoch opened in which material things became, for an ever-increasing

fraction of the people, the most important ends of life. Relative to the spread of skepticism it may be noted as of interest that science has been principally responsible therefor. The reason is plain. The church persecuting science with unrelenting hostility, refused its truths and hunted it down for proclaiming them. Thereupon science in self-protection turned its heaviest batteries upon religion—its churches and dogmas and creeds. So effectively has science struck back that in Germany where "skepticism and materialism made their greatest gains, the critics and scoffers have strenuously attempted to explain every shred and suggestion of the supernatural out of the revealed religion. One fruit of this is the rampant materialism in the empire to-day when so much is heard about the God of forces and battles and so little about the religion of holiness and mercy and love.

But to return to the skeptical and materialistic tendencies of the civilized world as a whole, they were manifestly gaining headway when the war broke out. The nations, our own included, had not fallen into materialism. No great cities were sunk in vice, as Corinth, Rome, Antioch and scores of other ancient cities were at one stage in their lives; but it can hardly be denied that the drift was that way. There is reason to believe, however, that the war has arrested this; and very much reason to hope that the nations will come out of it with their faces turned in the other direction. It is a crucial, terrible experience the world is passing through; and, as in cases of amputations, the real distress, the heavy pain, may come after the work of surgery is done. But if the nations are thus to be saved from materialism and turned back upon the upward path, it will be well worth while. For whenever in the past deterioration into materialism began, it ended only in national death.

Keep's Minard's Liniment in the House

New Spring Wrinkles.

Gay and frilly new silk petticoats, to go under Easter frocks and suits, will delight the feminine eye. They are in any number of new styles, are in delicious colors and of the always-liked taffeta, of shining messaline or the soft, clinging Jersey silk.

Lapin is one of the new spring colors. You will see it quite frequently in the new wraps. It is just the color of a brown rabbit—that soft, tan shade, which is so pretty in fabrics. One lapin colored coat of duvetyne was very handsome with a border of hand embroidery in self color.

Charming new English sports hats are of fine Leghorns with the new high crowns and brims of medium size. They are lovely colorings, quite often have underbrims of a contrasting color, and are adorned simply and artistically with gleaming hand bands and bows.

Ever so many smart new street dresses are of blue serge, combined with spotted or figured foulards. One with a serge skirt had a pleated foulard jacket and a little white satin vest and collar, and was most attractive. Another frock had a panel of the foulard and an overtone of blue serge.

The Long Lived Farmer.

Man armed with axes protects himself from the agencies of death more completely than man with any other life defense weapon. The United States Bureau of Statistics has discovered that important fact by a study of the records of life insurance companies. Then "the hard life of the farmer" is longer, not because it simply seems longer, but because he lives in the midst of protective agencies. The statistics of the entire country show that farmers live longer than all others, fifty-eight years being their average span of life. Bookkeepers and office assistants live the shortest lives, thirty-six years being their average limit of endurance. Among the office workers, tuberculosis is the worst enemy of life, 35 per cent. of them having died of that disease. Among the farmers heart disease causes the most deaths, 16 per cent. of the total.—Worcester Telegram.

PEELS OFF YOUR CORN
IN ONE WHOLE PIECE

Yet, it's a fact, you can loosen your corns, peel them off in one piece, by using PUTNAM'S CORN EXTRACTOR. Nothing else so quick, so simple and easy as PUTNAM'S. Just a few drops makes the corn soft. Best part of all, PUTNAM'S is harmless and costs but a quarter—why pay more when PUTNAM'S Extractor is guaranteed to cure? Sold everywhere.

WHAT IS THE GAME?

(London Advertiser)
"Supplementary letters patent have been issued increasing the capital stock of the William Davies Company, limited, from \$250,000 to \$500,000." Despatch from Ottawa.

Not many months ago an order-in-council was announced limiting the profits of packing companies to eleven per cent. on their capital. They were to be allowed all the profits they made up to seven per cent. over seven per cent and up to fifteen per cent. the Government was to take half, and over fifteen per cent all profits were to go to the Government. So very clear definition of what this capital was to consist of was given, but the general understanding was that it was to be the authorized stock issue of the company.

If this interpretation is correct, the above-quoted letters patent amount simply to a permission given the William Davies Company (or Joseph Flavelly) to make profits not limited by eleven per cent. but by 27 1/2 per cent.

In view of the fact that this company has become accustomed to making something over 50 per cent profit, the sudden drop was probably more than it could endure. It has the ear of the Government, and may have been able to arrange this little transaction in the hope its effect would not be noticed. It is to be hoped that, when Parliament meets, the Government will be forced to explain the reason for the concession just made and its effects.

Trousers.

Mrs. Edward Morton and Miss Mathiel Crandle, of Chicago, who wore trousers at a suffragist ball the other night, speaks very highly of them. But that, we don't believe that the two realize the full importance and worth of trousers; one almost never knows until one has to go without them.—Buffalo News.

ISSUE NO. 12, 1918

HELP WANTED.

TINSMITH FOR SASKATCHEWAN—good furnace and trough man; state experience and wages. J. H. Worsell, Goderich, Ont.

WANTED—PROBATIONERS TO train for nurses. Apply, Welland Hospital, St. Catharines, Ont.

WANTED—LOOM FIXER ON CROMPTON & Knowles heavy looms, running on heavy woollens and blankets; good steady position for right man. Address agent, and full particulars to Slingsby Mfg. Co., Ltd., Brantford, Ont.

FORELADY WANTED FOR COTTON winding, and coning department. For particulars, apply, Slingsby Mfg. Co., Ltd., Brantford, Ont.

MARRIED MAN—FRUIT FARM—wife to board extra help; references. Wm. H. Bunting, Carleton Place, Ont.

SHOE REPAIRER FOR SASKATCHEWAN—state experience, wages. J. H. Worsell, Goderich, Ont.

TINSMITH WANTED, WITH KNOWLEDGE of plumbing; steady job. E. A. Button, Stouffville.

WANTED—SHIP CARPENTERS AND Caulkers, apply personally or by letter. Toronto Shipbuilding Company, Ltd., Foot Cherry Street, Toronto, Ont.

TWISTER TO TWIST WARPS IN looms. Oriental Textiles Company, Limited, Oshawa, Ont.

FOR SALE.

RIGLET CABINET AND WOODEN used. Will be sold very cheap. Apply to M. E. Tangney, Lindsay, Ont.

FOR SALE—4-6 HUDSON ROAD—sterile; wire wheels; new top; newly painted; new tires \$1.50; step quick. Herman Lippert, Kitchener, Ont.

BUSINESS CHANCES.

FOR SALE, FIRST-CLASS FURNITURE and undertaking business. Apply to M. E. Tangney, Lindsay, Ont.

BAKERY BUSINESS FOR SALE—only one in small town; store and dwelling rooms in connection. Walter Bates, Lantz.

FARMS FOR SALE.

FARM BARGAINS—WRITE FOR NEW free catalogue of 750 farms for sale. Willoughby Agency, Department 556, Georgetown or Guelph, Ont.

FOR SALE—23 ACRES—25 UNDER cultivation; 2 farms of 20 acres; 1 farm of 100 acres; good buildings and implements; 100 acres good land and buildings. Write for particulars to William Martin & Son, Box 8, North Bay, Ont.

FOR SALE—20-ACRE FRUIT AND early vegetable farm, in Essex county; yields \$500 to \$600 per acre; fine buildings; three greenhouses; excellent water, etc.; place for man with means to acquire one of the best places in Canada, owner retiring; price \$25,000; terms, Winter & Williamson, Limited, Windsor, Ont.

TWO THOUSAND ACRES ADJOINING the town of Alliston, Ont.; brick house 32 x 32, kitchen 16 x 30; barn No. 1 60 x 12, on cement wall; equipped with iron stable and horse barn; buildings lighted by electricity; barn No. 2, 36 x 66; driving shed 30 x 76; hen house, pig house, calf house, all separate; cement silo and feed house; 100 acres under cultivation; this is an ideal dairy or pure-bred stock farm or grain; stock and implements and grain will be sold together if purchaser desires; \$20,000 for everything, \$15,000 cash, balance arranged to suit purchaser; write or phone Wilfred J. Wilson, Alliston, Box 107; phone 34.

300 ACRES—GOOD CLAY—LOAM—Haldimand county; Cayuga township; three miles from Cayuga; good frame house, two large barns; two large sheds; driving shed; well; drilled well; windmill, running water; 30 acres bush; good grain, hay, pasture. Apply, Thomas Savage, Cayuga.

50 ACRE FRUIT FARM—3 in bearing; fruit, best varieties; good building; a beautiful place, on Cayuga near St. Catharines; close to lake and boat; \$10,000, half cash, or might consider some exchange; 100 acres of land; \$4,000 required; this is a wonderful chance for a city man to own or have half interest in a profitable fruit farm; don't delay. Write, J. H. Godwin, Cayuga.
