OF IMPORTANCE.

Never butter your pie plates, but dredge them lightly with flour. Cedar chests for clothing and divers articles are handy and ornamental too. Damascus blades and very old war relics and armor are prized for decorative purposes.

The person afflicted with large pores must take the greater pains with her baths. Put a little household ammonia on

a rag and clean off the rolls of the wringer before putting it away. Never put a knife into hot grease, as it destroys its sharpness. Have a kitchen fork for turning meat or fry-

ing potatoes. If kerosene is rubbed with a flanner cloth, on steel knives that have become rusty, and they are put aside for

day or two, the rust will be loosened and they may be very easily cleaned. Handkerchiefs bordered with black are no longer considered obligatory for one in mourning, but the white hemstitched border must be very nar-

While it may be necessary occasionally to use borax, or some such cleanser, when washing the hair, it should be used sparingly unless your hair is very dark. A food hair-dresser will recommend for you a treatment that will cleanse without fading your locks. You will find much of your canned fruit can be utilized with good results in connection with your cereal dish at

breakfast. Fresh fruits are better of course, but the other is very palatable. With a fancy jacket for morning and house wear many partly worn dress skirts can be made to do service and save the expense of an entirely new gown.

There are young women who have been in golf and walking skirts for so long that they actually appear awkward in long dresses.

Among the ardent admirers of Oliver Wendell Holmes there are thousands of women, many of whom have never come across the following beau-tiful tribute to themselves from the genial writer of the Autacrat of the Breakfast Table:

An old method to get rid of cockroaches is both simple and efficient. This is by the use of the common red wafers that may be had at any stationer's and which are, it seems, a food much esteemed by the insec's. They eat them greedily and die from the effects.

Few housekeepers know what a good dish for supper is made by scalloping potatoes with Parmesan cheese. The bottom of a baking dish is covered with the sliced boiled potatoes, then pepper and salt and added, and a very pepper and sait and added, and a very little white sauce. A liberal amount of cheese is scattered over, and then another layer of potatoes. The cheese should form the top layer, and the whole should have a thorough cooking the cheese browning well at the last.

You talk of the fire of genius. Many a blessed woman, who dies unsung and unremembered, has given out more of the real vital heat that keeps life in human souls, without a spark flitting through her humble chimney to tell the world about it, than would set a dozen theories smoking, or a hundred odes simmering, in the brains of so many men of genius."

Canada will give as many more men and as much more money as may be necessary to see the South African war to a satisfactory finish.

A famous artist is said to have replied to an inquiring visitor, when asked with what he mixed his colors, "With brains, sir!"

A good rule for deciding the height of a workbench is as follows:-Hang one arm naturally by your side, bend your wrist so as to cause your hand to be at right angles with your body. When standing thus the hand should pass just underneath the two-inch board forming the top of the bench.

The Victoria cross measures one inch and two-thirds square. The actual weight of the metal is 434 grains, just three and one-half grains less than an ounce. Its instrinsic value is a penny, and it is illegal in Great Britain for a pawnbroker to accept it as a

pledge under any circumstances. Henry W. Fisher, a New York author, has brought suit against George Barrie & Son, of Philadelphia, for refusing to publish, after agreeing to do so, a book entitled "The Private Lives of William II and His Consort," in which he gave some sensational details, said to be taken from diaries.

Mr. Fisher indirectly accuses the Emperor of Germany of having caused the suppression of the book.

The attitude of the United States government in suggesting mediation to England seems to resemble the hint of Jeremy Diddler in "Raising the Wind." "Have you such a thing as a shilling in your pocket?" he timidly asked his friend. "Yes, I have, and it will stay there, too." "I only wanted to know," said Jeremy, hastily. The United States "only wanted to know," and found out quickly.

Speaking of the late Maud S., it is said that every evening at about 10 o'clock, Mrs. Maud Carey, of New York, calls up her father, Captain George S. For a Woman To suffer with skin disease than

it is for a man, for a smooth skin and a clear complexion are es-sential elements of female beauty.
When the taint
of scrofula is in the blood it will be sure to show itself soon or late. Often its are as repulsive as they are painful.

Many people have been cured of scrofula in its most malignant forms by the

use of Dr. Pierce's Golden Medica Discovery. This remedy is remarkable for its power to purify the blood. It absolutely eliminates the corrupting elements. It makes the blood clean and rich. It increases the action of the blood-making glands, and so increases the quantity of pure blood supplied to the body.

the body.

"I will forever thank you for advising me to take Dr. Pierce's Goiden Medical Discovery," writes Mrs. Jas. Murphy, of Fonda, Pocahontas Co., Iowa. "It has cured me of chronic scrofula, of twelve years' standing. I had doctored for the trouble until I was completely discouraged. I also had chronic diarrhea for twelve years. I am in good health now—better than I ever was in my life, owing to Dr. Pierce's Golden Medical Discovery. I took several bottles of the 'Discovery' before I stopped."
