Minard's Liniment Cures Distemper.

IN FASHION'S REALM.

Draw Toques Are Much Worn—Em-
broidered in Smarter Than Lace.
Straw toques are to be worn a great
deal this summer, as much so in fact
as the larger shapes. These little
toques are usually made of some bright
colored material, satin straw or flow-
ers, and if of straw they are simply
decorated with straw rosettes or soft
satin bows and quills.
Bands of embroidery are being used
more than those of plain lace. This
embroidery is rarely openwork, except

GREEN STRAW TOQUE

in the case of English embroidery or the
Tenerife drawn work. The preference
is for raised embroidery.

Both on blouses and skirts cording is
much used. Checks of every descrip-
tion are very smart. Even on veiling
these checks appear in dull rubbed in
effect, and they give a changeable ef-
fect when combined with a bright lin-
ing.

Some of the most effective picture
hats are made of black guipure edged
with velours and trimmed with one
long plume brought around the brim
and falling down upon the shoulders.
Some of the hats are worn straight
off the face; others have a decided
downward tilt.

A magnificent evening toilet may be
fashioned of cream chiffon gauze over
rich sulphur colored silk. The corsage
should be trimmed with spiderweb lace
medallions, from which falls a white
silk fringe, the sleeves terminating in a
deep fall of accordion plaited chiffon,
relieved by shirred chiffon and lace me-
dallions. Effective touches of gold
cord may be introduced into this costume.

The picture shows a toque of green
straw trimmed with a rosette of soft
silk and two quills.

JUDIC CHOLLET.

WHAT IS WORN.

Sleeves Are Very Wide and Much
Filled in With Lace.
Sleeves are still very wide, and the
fullness either hangs bell shaped or
it is plaited into a loose cuff, which is
filled in with lace. The newest sleeve
frills are of plaited lawn edged with
color embroidery or yellow lace valen-
ciennes. Some of the new sleeves are

TAILOR MADE GOWN.

decorated with from three to five frills
of lace, which reach almost from the
elbow down.

The heavy coats now worn by monor-
lists are giving way to coats of shan-
ting of pale colored mohair and silky
alpaca. These are made long enough
to cover the entire costume, with be-
coming bertha and collar arrange-
ments and very wide sleeves, having
lace and plaited frills put into the new
lace cuff.

Lace veils lined throughout with
tulle are fastened on draped toques of
tulle or silk or satin straw. Some of
these new shapes are very becoming
when relieved by touches of red or
bright blue.

The bolero is still the most popular
coat. It is deservedly so, as it is al-
most universally flattering to the fig-
ure, much more so, in fact, than the
breasted military coat which dressmak-
ers tried to introduce in the spring.

The model shows a tailor made suit
of green silk trimmed with strappings
of white silk. It has the long shoulder-
ed effect, which is so smart at present.
JUDIC CHOLLET.

In the good
old days the
old man announ-
ced a death in
the community
by a stroke on
the church bell
for every year of
the life that was
gone. People
expected, then, to live to old
age, and speculation at the
first tap of the bell took a
narrow range including only
those who had lived the al-
lotted time. There is no rea-
son why people should not
have the same expectancy of
age to-day, except for the
neglect and abuse of the one
organ on which all the other
organs depend—the stomach.
Dr. Pierce's Golden Medical
Discovery enables men and
women to be strong and
healthy, by curing diseases of
the stomach (and other or-
gans of digestion and nutri-
tion), which prevent the
proper nourishment of the
body.

"I had been sick for two years
with indigestion and nervous
debility, and had taken
medicine from my family
doctor for a long time
without much benefit,"
writes Mrs. W. E. Pe-
bles of Lucknow, S. C.
"I was induced to consult Dr.
Pierce by letter. You
advised me to take
'Golden Medical Discovery'
'and Favorite Prescription,' which I did,
and to my great sur-
prise, after taking six
bottles I was cured."
The Medical Ad-
viser, in paper cov-
ers, is sent free for
31 one-cent stamps to
pay customs and
mailing only. Ad-
dress Doctor R. V.
Pierce, Buffalo, N. Y.

Gorillas in Battle.

"The prevailing belief that gorillas
use clubs when they attack each other
or their enemies is an entirely erro-
neous one," writes a traveler. "They
do nothing of the sort, and how such
an impression ever came to exist or
how old time African explorers ever
came to formulate such a theory is be-
yond my comprehension. During a
long sojourn in that country I had am-
ple opportunities to learn the truth
about them, and what I discovered
was subsequently confirmed during
a protracted hunting trip in Bor-
neo."

"The fact is that in fighting each
other or in attacking or defending
themselves from enemies they de-
pend entirely upon their teeth,
which are abnormally strong and
sharp and cut like a razor. They are
clumsy on their feet, but the enormous
strength of their powerful arms more
than makes up for this deficiency. In
fighting they almost invariably attack
the faces or the limbs of their adver-
saries."

"In the case of human beings or
members of the monkey tribe the gorilla's
favorite point of attack is the
hand and especially the finger."

A Unanimous Election.

There was then known as the toughest
part of creation who went by the name of
Big John. I doubt if he ever had any
other name. We had a little settle-
ment we were going to make a town
out of and concluded that the first
thing to do was to choose a marshal,
which we proceeded to do. There were
several candidates. Big John among
them, and when the pieces of paper
dropped into a wide brimmed hat Big
John walked up, coolly took the votes
and put them into his pocket and said:
"This is the quickest way. All them
as votes for me come to this side." Not
a man hesitated. It was the most
unanimous election ever held. He
made a good officer, though, and we
kept him in till we pulled up the town
and moved on to the next terminus of
the railroad.

It makes a woman very indignant
with a man when she crowds up too
close to him in a street car.

ANOTHER VOICE ON THE PRAIRIES

Tells of Diabetes Cured by
Dodd's Kidney Pills.

W. G. Bartleman Could Get No Re-
lief Till He Tried the Great Cana-
dian Kidney Remedy.

Wapella, Assa, N. W. T., Aug. 22.
—(Special).—This thriving town fur-
nishes one of the most remarkable
cures of Kidney Disease that has ever
been reported on the prairies. Mr.
Wm. G. Bartleman, well-known
farmer, is the man cured, and he
makes the following statement:

"I had Kidney Trouble and it de-
veloped into Diabetes. I went to the
doctor but his treatment was of no
use whatever to me. I began to take
Dodd's Kidney Pills in December, 1902.
I took them all winter and summer
while I was unable to work my farm.
I took twelve boxes in all and in
August I was able to work."

"Now I am quite strong. I work
all winter without pain in my
back or any part of my body. Dodd's
Kidney Pills cured me."

If the Kidney Disease is of long
standing it may take time to cure it.
But Dodd's Kidney Pills will do it.

Every new privilege is accompanied
by a new duty.

Every girl starts out with the idea
of having an elaborate church wed-
ding.

SELECTIONS

TO COUNT BY EIGHTS.

Society for the Propagation of the
Optimal System.

A society is about to be formed in
England for the propagation of what
is called the optimal system, or count-
ing by eights.

The most natural to multiply and
divide is to double or halve. It is sim-
plest itself to take one apple (for any-
thing you please) and multiply it by
placing another by its side; you multi-
ply again by adding two more, and so
you go on doubling. In the same way
you divide by halving.

Now, in the decimal system it is not
possible to do anything so neat as that.
You must get to your unit, or base, or
ten, and it is impossible to do that by
the simple process of doubling the low
figures. You can certainly halve one
in the same way as in the new optimal
system, but if you take ten you get
down to two and a half very soon—a
very broken figure—and it gets worse
as you go lower.

Not so with the eight. It was con-
tended by its opponents that the pro-
cess of dividing or multiplying by sim-
ply shifting the point is not possible.
In decimals, thirty means thirty, but
3.0 means three, which is an easy meth-
od of dividing by ten, but how would
this be in the new enumeration?

To this the optimalists reply that the
figure of ten is quite arbitrary, that the
most natural figure is eight and that if
we had been taught to count by eights
we should have experienced no diffi-
culty.

In that case thirty would be equal to
twenty-four, while 3.0 would be three,
as at present. Further—and this is
where they think they score—3 would
be three-eighths, not three-tenths,
which they stigmatize as a very diffi-
cult division to obtain naturally.

It is all very well when we have it
marked out for us on a scale, but just
think of the difficulty of splitting an
apple into ten equal parts and then
compare that with the simplicity of
obtaining eight parts by merely halving!

Supporters of the decimal system say
that the human hand was the basis of
calculation, there being ten digits, but
optimalists point out that there are
only eight fingers; that the thumb is a
special part of the hand.—Pearson's
Weekly.

Artificial Snails.

As escargots, or snails, are not much
eaten in this country, the discovery
that artificial snails are made will not
worry American epicures. In France it
is different. Public knowledge of this
enterprise came through the suit
of a Paris workman against his em-
ployer for injuries received in manipu-
lating a machine for fabricating snails.
It was explained that the employer
bought empty snail shells from the
dust men and ragpickers. Having
cleaned out the shells, the defendant
and his people filled them with "meat"
—that is to say, lights, or cat's meat.
This soft, spongy stuff before being
crammed into the shells was cut in'o
corkscrew shape by very improved ma-
chines. When the shell was filled some
liquid fat or grease was poured into it,
and the trick was done. The fabricated
snails were sold usually at 20 centimes
the dozen.

Balked on Their National Hymn.

King Edward, while visiting at the
residence of one of his subjects re-
cently, saw proof that not many Eng-
lishmen know the words of their na-
tional anthem. He was waiting at
the station for his train when a few
of the ultraloyal began to sing "God
Save the King," but each in suc-
cession came to a sudden pause and lam-
bentably broke down. A desperate
final attempt failed most ignominiously,
greatly to the amusement of his
majesty, who vainly tried to conceal
his smiles under cover of a paternal
chat with his noble and slightly em-
barrassed hostess.

Time to Smoke in Australia.

Builders and contractors in Austr-
alia have hit upon a successful plan to
oblige their employees by allowing
them to stop during working hours
and have a smoke.

At 10:30 in the morning the whistle
blows or the bell rings, and the fore-
man calls out, "Smoke!" Instantly
all work is stopped, and the men take
out their pipes and smoke for about
five minutes. At 3:30 in the afternoon
they are allowed to smoke again. The
time so lost is made up by the extra
energy with which the men work after
they have had a smoke.

The Stingless Bee.

Apiculturists have been experimen-
ting to determine whether a compara-
tively rare stingless bee that is a na-
tive to North and South America could
be bred to replace the common honey-
bee. The former, according to the
investigators, was found to use no wax
in the construction of the nests, and
the honey stored by them is greatly in-
ferior to that of the common honey-
bee. The domestication of this species
apparently does not look very promis-
ing.

A Big Cycling Contract.

The champion wager of the moment
is possibly that upon which one Herr
Schweigerhausen has entered to the
amazement of less active and less im-
aginative Europeans. He is to cycle
70,000 miles in five years, he is to come
in contact with three kings, to kill a
wild animal in each country, to write
a hundred articles, take a thousand
photographs and deliver a hundred lec-
tures.

Your Money Back with Sunlight Soap

Sunlight Soap is guaranteed perfectly pure, genuine, and free from
adulteration—all dealers are authorized to return purchase money to anyone
finding cause for complaint.
Therefore you lose nothing by trying

Sunlight Soap

and you will agree with millions of other women that the Sunlight way is the
only way to wash clothes.
\$5,000.00 reward will be paid to any person who can prove that Sunlight
Soap contains any form of adulteration or contains any injurious chemicals.
Just rub Sunlight Soap on your clothes and let them soak in tepid water,
then rinse out in fresh water. It is equally good in hard or soft water.
