THE "CLIMAX"

Has Been Reached and Every Doubt Removed.

Fawcett's Furnace is the Best!

I NOW TAKE GREAT PLEASURE IN OFFERING MY

"CLIMAX" Wood Furnace

to every one desiring of obtaining a first class Heating Apparatus at a moderate cost. This Furnace has been thoroughly tested throughout the New England States and has given perfect satisfaction, besides a large number of them have been in use in the Maritime Provinces for the past two years and from the experience of those using them, I do not hesitate in recommending them to be

Far Superior to any Furnace in the Market.

The fire BOX is made wholly in one piece and heavily corrugated; thus giving it great strength and a large heat radiating surface. The RADIATOR is of cast iron jointed only at the base in same style as the Fire Box, so that smoke cannot possibly escape into the heated room, as is the case with many of the Wood Furnaces in use. An examination of most of the Wood Furnaces in use, will reveal to you the fact that they are all more or less warped and cracked with but one or two seasons' use, and cases exist where the so called cheap Furnaces have proved useless and had to be renewed within the space of one year.

I WARRANT THE "CLIMAX" to last longer than any two Furnaces of other makes, give more heat with less quantity of fuel and so very compact that it can be set up in many places where other Furnaces could not possibly be placed. The price has been reduced which gives the "CLIMAX" the preference far before all others. Estimates furnished and every Furnace put in Warranted to give entire satisfaction.

A CAREFUL INSPECTION OF THE "CLIMAX" IS SOLICITED.

SERIOUS ACCIDENT.—A serious and somewhat singular accident took place last Saturday at the mill of George W. Towns, Abouhagan Road. Robert Read, aged thirteen, son of Frank Read, of Hartford, was fishing with some other boys from the water wheel, when a ten year-old son of Mr. Towns made an excursion to go into the mill, and lifted the gate of the mill-race with the intention of giving the boys a wetting. When the wheel started young Read was thrown down and his head was caught between one of the buckets and the casing of the wheel. His screams were heard by young Towns, who had sufficient presence of mind to shut off the water, and Read was soon rescued from his perilous position. His face was badly cut and he sustained a compound fracture of the lower jaw, but he is doing well under Dr. Trueman's treatment and is likely to recover.

A DARING THIEF.—One of the boldest pieces of sneak thieving ever known in this locality, was done early on Friday morning last, in the residence of Rev. Dr. Burwash. About two o'clock, Mrs. Burwash was awakened by the smell of fire, and was horrified to see a blaze in a small closet adjoining the room. The flames, however, were soon extinguished, and the cause of the fire ascertained. By some means, some person or persons had obtained entrance to the house and proceeded to inspect every room, by lighting matches. The course taken could be easily seen by the burnt matches dropped on the floor. The burglar entered the room occupied by Dr. and Mrs. Burwash, lit several matches, the burst and one of them being found on their bed—and went into the room adjoining to search the clothes hanging there. Apparently, a burning match thrown down, caught a dress and set fire to it; hence the blaze. Nothing was taken except ten cents which was in one of the pockets. There was considerable jewelry in the house, but the visitors were apparently, after money only. There was no clue to the parties.
