NOTICE TO PARENTS AND TEACHERS

SCHOOL BOOKS SCHOOL BOOKS THE Substriber has since his entering into the stationery and book business commenced by his father, endea-voured to furnish and keep up a supply of suitable School Books; and while he has kept in view the difficulty experi-enced by a want of uniformity in the series of works in use, has studied to improve those formerly used; and in adopting new ones, has been guided by the leading members of the Board of Education, and some of the best teachers who have given their sanction to his publications. Many of the books imported from the Mother* Country, being found to be too ex-pensive, and the reprints from the neighbouring provinces, not given their sanction to his publications. Many of the books imported from the Mother² Country, being found to be too ex-pensive, and the reprints from the neighbouring provinces, not only incorrect, but badly printed, it was thought than attempt to print some of them at home, might meet with success. In order to be able to sell the books at a price within the reach of the balk of the people, a large number of each work has been printed of those books in creneral use. The Irish national series, imported by the Board of Education as one of the cheapest sets of books that could be procured, has been taken as the basis of the series of books now reprinting. They have been made applicable to the circumstances of the country by alterations only in such passaged as have appeared to require them. In order to suit them to the locality of the Island a ful-ler and more correct abstract of the Geography of North America, has been substituted, and several slight errors in Spelling and Grammar amended. The books already published are— Murrays first Book, Murray's Second do, with an appendix from Professor Sullivan's Spelling book. Irish National Second, Third, and Fourth books, Lennie's Grammar. GEO, T. HASZARD.

There is a time, just ere the frost Prepares to pave old Winter's way, When Autumn in a reverie lost, The mellow day-time dreams away. When Summer comes, is musing mind, To gaze once more on hill and dell, To mark how many sheaves they bind, And see if all is ripened well : With balmy breath she whispers low, The dying flowers look up and give Their sweetest incense ere they go, For her who made their beauties live.

She enters 'neath the woodland shade, Her zephyrs lift the lingering leaf, And bear it gently where are laid The loved and lost ones of its grief.

POB PRT.

THE INDIAN SUMMER.

She seeks the shore, old Ocean heaves In gladness huge his mighty breast; Prisons his with winds in their caves, And basking in her smiles, is blest.

At last old Autuma, rising, takes Again his sceptro and his throne, With boist'rous hand the treos he shakes, Intent on gathering all his own.

Sweet Summer, sighing, flies the plain, And waiting Winter, gaunt and grim, Sees miser Autumn hourd his grain, And smiles to think it's all for him !

The true riches of a nation are the products of the soil, and the labour of the people : the former is the natural, the latter the ac-quired wealth of a nation. The foundation of national property is agriculture, or the art of calitizating land so as to render it as fraitful as possible, and it is the parent of all other arts, and the source of the natural riches of

the parent of all other arts, and the source of the natural riches of any nation. Next in the scale of national importance are the useful arts and manufactures, by which the acquired riches of a state are aug-mented by the most profitable exertion of the labour of the people. The cultivation of the liberal and polite arts contributes to the prosperity of a nation, because they calighten and embellish socie-ty, and are sometimes carried to such perfection, as to contribute to the relative riches of nations; but their usefulness cannot bear comparison with the mechanic arts, though their professors are ge-nerally held in higher estimation. Agriculture is the most essential to a nation because, independent of its being absolutely necessary to the subsistence of any people, the trade that issues from it is more certain and more profitable : it increases population, and thus augments the relative riches of a nation.

it increases population, and thus augments the relative riches of a nation. It is the most certain, because the sale of absolute necessaries must be much more certain than that of superfluities. It is the most profitable because, by a judicious system of hus-bandry, the produce of the earth may be increased to an almost indefinite extent; and because the sale of that produce is almost al-ways certain, and the returns immediate. Agriculture deserves the attention of a wise legislature, in the highest degree; for, however floarishing the commerce may, it is constantly liable to serious check, and even to total destruction; but a nation can never be reduced to the extremity of distress while due attention is paid to this most important art. A neglect of agrigulture injures other branches of industry. For when from a carcity of the necessaries of life, they become dear, the price of labour in our manufactories, must be related in propor-tion. This of course enhancer the price of unsunfactured goods, and affords foreign nations an opportunity of underselling us in the market.

and affords foreign nations an opportunity of underselling us in the market. The seat principle on which an extensive commerce depends is, the establishment and support of manufactures. Thus, in the early stages of occiety, the real wants of manufactures. Thus, in the early stages of occiety, the real wants of manufactures. Thus, in the early subsistence,—thus roots, fruits, water, milk, fowl, and fish, pre-pared in the most simple manner, served for food, the skins or fur of animals for clothing; and a few rude instruments to fit these for their several uses. But as society enlarged and grow more refined, imaginary wants multiplied upon them; and notions of property be-ginning to be entertained, those who had none endeavoursed to ob-tain a share, by exerting their ingenuity in administering to the lux-urise of these who had. The first advantages of manufacturing are many.—First, a ma-ufacturing nation will procure, from its own immediate territories, more of the satural products of the soil, than one that has no manu-factures. Secondly, the art of giving new form to, and improving those natural products, will furnish increase of employment, and thus en-courage population.

natural products, will furnish increase of employment, and thus en-courage population. Thirdly, many of the works of art, being sought for by other nations, will be the means of bringing great wealth to the manu-facturers, either in foreign products or money. Forthy, this increase of wealth and population will render a ma-nufacturing nation stronger, and more capable of defending, itself against its enemies—*cateris paribus*—other things being equal— than another that has no manufacturies. It is essential to the establishment of a manufactory, that if on diligent enquiry a reasonable expectation of success may be enter-tained, an advantageous situation for its establishment maat first be obtained, the defects must be remedied as much as possible by art.

HEALTH AND EDUCATION .- The official stat FIGALTH AND FDUCATION.—The ement statistics of ino Prench departments prove that the average duration of human life is from six to eight years longer, in the districts which are the most advanced in respect to education. In like manner, the inhabitants are most healthy in those departments where agriculture is most improved, manufactures most extended, and commerce most active.

A Scotch paper relates, that a young man who left Paisley about three years ago for Australia, on recently returning home, found his mother engaged winding weft on weavers' pirms. After mutual greetings, he produced a bank cheque for £100,000, the produce of his industry at the Australian gold-diggings.

Its powers have been already tried on the most distant groups of stars and found to be prodigious, and may be expected to help us to a farther insight into the nature of the heaven! Negrets, and lately separately published by the Mears. Longman. In that article the worthy Doctor urges undry reason—based on or observation and knowledge of the planets, and also on the opport destars, and which have fallen upon our earth—for dont-ing whether any thing resembling or organic or terestrial life exists, upon the stars, and which have fallen upon our earth—for dont-ing whether any thing resembling or organic or terestrial life exists, upon the stars, and which have fallen upon our earth—for dont-ing whether any thing resembling or organic or terestrial life exists, upon the stars, and which have fallen upon our earth—for dont-ing whether any thing resembling or organic or terestrial life exists, upon the stars, and which have fallen upon our earth—for dont-ing whether any thing resembling or organic or terestrial life exists, upon the stars, and which have fallen upon the whole bearing a upon the stars, and whic

*

AUSTRIAN BANDITTI.—The Vienas journals contain an ac-count of a very herrido affair: A peasant of Galileian Podolis went the days ago to the fair of Zharaz to sell a pair of ozen. On his re-turn, having been drinking rather too much, he placed his money in a girdle, which he fastened round the body of his daughter, who ac-companied him. On passing through a wood a mian stopped them and imperatively demanded their measy or their lives. The pea-eant declared that he had no money on him; but five time, knowing

stamp, by its sanction, the proposed ceremon ies, with great

stamp: by ideanaction, the proposed ceremonies, with greater eo-lemnity. It was conjectured, that it would devolve upon Lord Brougham to pronounce the late Duke's calogium in Parliament. Her Majesty's departure for Ealmoral Castle, was fixed for Mon day the 11th metant. Her Majesty and the Royal Household went out of mourning for the late Duke of Wellington, on the 20th alt. A Free Trade Banquet was to have been held in Manchester, two days previous to the meeting of Parliament. The leading Free Trade Members of the House were to have been invited. Seven armed desperadoes, which were named the 'Northern Banditti,' were recently prowling about the streets of Landon, four of whom have been arrested.

Banditti, ' were recently proving about the streets of London, four of whom have been arrested. Emigration to Australia continues unabated—300 Dutchmen re-ently saited from Gravesend for Port Philip, in a Dutch vessel amed the Six Sisters-chartered by Government. Lady Lovelace, Lord Byron's Ada, was lying dangerously ill— having been given over by her physicians. The hervest in England has not proved abandant, but, notwisth-standing, the country seems to advance in prosperity, at an almost suprecedented iste. Wield and have raged in the English Channels during the American reported is the 'Emporism,' from America, which went eacher on the coast of Northamberland;—crew and passengers, in-claing three females, saved. The pares are full of especilation on French and American af-fisr, quite to the exclusion of local. It is ramoured that farifis-ment will be summoned for basiness on the 21st October. The London papers are rabid against Captain Jewett's expedition to the Labos, seeing in it a deep-leid scheme for the annexistion of Pera ! The West India mail steamer La Plats at Southampton, Wed-rest, 21,374,766, of which §229,717, were on account of the Mesican dividends.

FRANCE.

FRANCE. The public mind appears to be under up in favour of the imme-diate proclamation of the Empire. It is even said, that Louis Na-poleon will return to Parie as Emperor, and that the Profilmation will be at Tours, the ancient capital of Touraise, on the 14th inst., His reception at Toulon, Avignon and Marseilles was enthusiantic, He was met and cogratulated by the envoys of Piedmont, Naples, and the Pope.

He was not and cogratumes or not strip Emperor of Austria has and the Pope. The Gazette de Brealan says, that the Emperor of Austria has demanded the hand of the Princess Vasa, and that the Emperor of Russia is using his influence to win over the same hady for Prince Adalbert of Bavaria, brother to the King of Greece. This, have-

Adalbert of Bavaria, brother to the King of Greece. This, howe-ver, is discredized in Paris, The Belgian Ministry have again resigned, and the Chambers are adjourned till 26th instant. The cause of vesignation was the election of M. Delshayes over M. Verhagen, the Ministeria Candi-date to the presidency of the Chamber of Deputies. The events regarded as a triamph of the French party.
