He could get no more than thirty pounds a year on the two lives, and, as he put it, thirty pounds is neither here nor there for two people, but forty is something. It s queer if after a bit I can't make a few shillings to keep myself and any little ones God may send us, and she'll have all the more for herself and them if I go first.'

When 1877 came round it found Michael Grame's worldly affairs much improvstill childless, and paid secretary of the with growing weary of an ailing wife. As the years went on he had developed and improved mentally and had gathered to himself the admiration and confidence of the men around he got the secretaryship with a weekly salary of three nounds.

In 1877 there was no secretary of any branch of a trade's union in London more trusted or respected than Michael Grame. He was low-sized, keen, energetic, pale, slight, light bearded, and bent. Over the cavity beneath the right eyebrow he wore a black glass to conceal the unpleasant void. Over the other eye he wore an ordinary convex clear glass, for already he was growing long-sighted in the remaining eye. The dark patch made by to the full height of his stunted figure the one black glass lent his countenance Even those who knew him best and were in the habit of meeting him daily could never fully divest their minds of the idea that the spectacles with the odd glasses were assumed for a joke, and sooner o later Michael Grame would indicate the way in which the joke lay. When strangers met him they were always inclined to laugh, and generally did smile. at the deliberate comicality of his face.

But Michael Grame's joke never came, his face never relaxed. In all London it would be hard to find one man whose views of life and things were so sincerely grave. In his youth he had been ardent and melancholic His dreadful accident and years had tended to discipline his enthusiasm. He was religious without using any special forms of religion, puri- glass a pool of livid shadow striking on 'How long have you been awake Y'ap tanical without a code, sincere out of his natural temperament, and grave out of an unformulated theory that men who are not grave must be rascals.

For a man of his position and opportu nities he was well informed. In speech and manner he was thoughtful and pru dent. Now and then the fiery ardour of a reformer would break out in him, and for a few moments he would fill his listening fellows with wonder and send them away mentally reeling under the weight of some startling novelty in thought. He would sit still and talk most cautiously for an hour, then all at once, and just be fore departing, fling out some tremendous principle, or suggestion, or doubt, and then retire, leaving his astonished fellows gasping in the presence of some revolutionary principle which seemed to threaten all order that is, and to leave society once more in the chaos of barbar-

Throat and Lungs, such as Coughs, Colds Whooping Cough,

and Consumption The reputation it has attained, in consequence of the marvellous cures it has produced during the last half century, is a sufficient assurance to the public that it will continue to realize the happiest results that can be desired. In almost every section of country there are persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. All who have tried it, acknowledge its superiority; and where its virtues are known, no one hesitates as to what medicine to employ to relieve the dis tress and suffering peculiar to pulmonary affections. CHERRY PECTORAL always affords instant relief, and performs rapid cures of the

the more formidable diseases of the lungs. As a safeguard to children, amid the distress. ing diseases which beset the Throat and Chest of Childhood, it is invaluable; for, by its timely use, multitudes are rescued and restored to health. This medicine gains friends at every trial, as the cures it is constantly producing are too remarkable to be forgotten. No family should be without it, and those who have once used it
