Heinen Wants More Money for Taking Willard's Wallops and Quits.

TOLEDO, June 23.—Yesterday was the first big day of workouts in both the training camps of Jess Willard and back Dempsey for the title bout on July 4th. Willard was taken back somewhat by the absence of Jack Heinen, whom he knocked out of the ring on Friday.

As a result of Heinen's departure Willard was without an extra sparring partner. This in no wise discomfited the champion, who took on Walter Monahan for three rounds instead of the usual two. Jack Hempel also worked an equal number of rounds, while Joe Chip worked a pair of rounds.

The largest crowd of any day thus far attending the camp was on hand, despite the added price of admission. More than 4,000 persons crowded into the arena, while as many more stood under the trees of Casino Park, unable to get within the sidewalks.

This overflow crowd then departed.

### RIDLEY WINS FROM VISITORS

Successful in Annual Cricket Game Saturday With Upper Canada College.

The annual cricket game between Ridley College and Upper Canada College was played Saturday afternoon on the former's grounds. The Ridley team won by 170 for nine wickets to 108.

Barr with 55 retired, Scmerville 34, Cross 22 and MacMahon 21 were the best scores for Ridley, while Beatty 54, Cross 15 and Richards 12 topped for U. C. C. The scores: U. C. C. Short b Somerville 2

for the Dempsey camp, two miles away. They found there already a similar crowd within the training enclosure. Thousands of spectators from points in Northwestern Ohio had come early in automobiles and invaded the camp precincts of the champion and his challenger.

## The Silo in Western Canada

### On a Western Cattle Ranch.

To raise two head of cattle where only one could otherwise be raised—that is what thousands of farmers all over the American continent have been able to do with the help of silos. It is no wonder, then, that as the land in Western Canada is becoming more settled, silos should be making their appearance in greater and greater numbers there.

With plenty of unoccupied prairie land growing an abundance of nutritious grasses the cattle feed problem in Western Canada has not been a really difficult one in the past. During the summer months the stock could forage over a large section of the country and there was no need for the owner to compute how many acres would support a cow.

But the days of free range are drawing to a close. Already there are parts of the country where little or none is to be had. And as the country is getting more and more settled, and, moreover, as a system of mixed farming is becoming the rule throughout every province, even in those parts where for many years straight grain growing was practised, the need for some additional means of ensuring a steady supply of feed all the year round is beginning to make itself felt in various parts of Western Canada.

Silos will, therefore, continue to spring up throughout the country. Near Lacombe, Alberta, a ranching company, which has made a great reputation for the quality of beef it produces, is contemplating the erection of four new silos this year.

### One of the Recently Built Albertan Silos.

branches of the livestock industry, capable of producing sufficient food for the support of hundreds of thousands of horses, cattle, sheep or swine. Most of the farms are for Western Canada, on the small side, generally from 80 to 320 acres each. But the soil is wonderfully fertile, and with an assured supply of moisture made possible by irrigation, will grow abundant crops of grain and fodders, including wheat, oats, barley, alfalfa, various kinds of grasses and clovers, and also roots and vegetables. For ensilage purposes, corn, sunflowers, alfalfa, peas, oats, and many other crops can be grown.

In years to come this part of Alberta will be one of the greatest food producing areas in the world. West crops are used for ensilage purposes in Western Canada. In Manitoba corn is mostly used, but in Alberta peas and oats are most popular. Other crops used are sudan grass, millets, rape, buckwheat and alfalfa. Sunflower is also being tried, but at present it is only in the experimental stage. The success with which peas and oats are grown, the enormous yields and high feeding value of the mixture, together with its succulence, palatability and flavour, account for its popularity and it will always maintain a leading place with the farmers of the most westerly of the Prairie Provinces, no matter what strides may be made in the growth of suitable varieties of corn. Silos are coming to stay in Western Canada. Their appearance in slowly increasing numbers is a landmark in the development of the country. As they increase in numbers the prosperity of the country will grow, and, as one far-sighted man has put it, "Western Canada will then not only be the granary of the world, but a universal playground as well."
