

article of Drs. Clowes and Busch, of Buffalo, who perfected the product, together with other valuable scientific research matter pertaining to the serum treatment of hemorrhages and blood dyscrasiae.

THE RECOVERY FROM LA GRIPPE.

Since the first appearance upon our shores of that unwelcome infectious disease known as La Grippe, the medical journals have been filled with articles advocating different methods of treating the attack itself and its various complications. But little attention, however, has been paid to the important question of how to best treat the convalescent subject. Among all of the acute infections there is probably none that is as likely to leave the patient quite as thoroughly devitalized and generally prostrated, as does a sharp attack of La Grippe. For some reason the degree of prostration from grippal infection appears to be entirely out of proportion to the severity of the attack itself. This peculiarity renders it advisable and usually necessary to strengthen and support the general vitality of the patient during the period of convalescence. Complete rest, nourishing food, plenty of fresh air and stimulation according to indications are, of course, distinctly important measures. At the same time tonic and hematinic medication should not be neglected. Probably the most generally acceptable and efficient general tonic and hemic constituent for such patients is Pepto-Mangan (Gude), a bland, non-irritant and promptly absorbable combination of the organic peptonates of iron and manganese. This efficient blood-builder and reconstructive does not disturb digestion nor induce constipation, and is readily taken by patients of all ages.

INDISPUTABLE AUTHORITATIVE EVIDENCE.

Hayden's Viburnum Compound is compounded from remedies of acknowledged therapeutic value and so acclaimed by the leading therapeutists of this country.

The therapeutic action of the principal ingredients is attested to and so stated in recognized text books upon *Materia Medica* and *Pharmacology*.

A recent brochure, "The Reason Why," just issued by the New York Pharmaceutical Company, Bedford Springs, Bedford, Mass., presents, not only those conditions in which Hayden's Viburnum Compound has proven to be of particular service, but also an abstract from leading authorities attesting to the therapeutic activity of its principal component parts.

A card addressed to the above named firm will bring you this booklet.
