

By the will of the late Lord Strathcona the Royal Victoria College for Women is the only department of McGill University to benefit, but during his lifetime he gave \$850,000 to the medical faculty, \$50,000 to the pension fund, and \$25,000, which made possible Strathcona Hall.

Verdun Protestant Hospital, Quebec, treated 477 men and 433 women during the past hospital year. There were 247 admissions, and of the 151 discharged, 74 had recovered, 45 improved and 32 unimproved, leaving in the institution at the end of the year 665 patients.

Volume XXVI. of E. MERCK'S ANNUAL REPORT of Recent Advances in Pharmaceutical Chemistry and Therapeutics.

This latest issue is even larger than last year's. The first article is a most instructive discussion on Lecithin, in which is brought out a good many not generally known uses for this valuable remedy. The volume is also supplemented by a timely article by Professor Dr. R. Heinz, of the Pharmacological Institute of the University of Erlangen, on the "Standardization of Digitalis Preparations."

The edition is limited, and is distributed principally among teachers of materia medica and therapeutics, and medical and pharmaceutical libraries. Generally, however, a few copies of each issue are left over after this special distribution, and physicians and pharmacists who make early application can obtain a copy by remitting the forwarding charges of fifteen cents, in stamps—no charge being made for the volume itself.

Merck & Co., 28 St. Sulpice St., Montreal.
