

V Conclusion

Opinions may vary on whether or not each of the five categories outlined above could be extended to encompass other space activities beyond those itemized. Opinions will also differ on the legal status of many of the themes listed. Much of the discussion surrounding what activities are permitted and what are proscribed focusses on certain key definitions such as "peaceful purposes", "free use", "militarization". Consideration of these definitions may facilitate the future deliberation of the CD on arms control and outer space.
