HOW TO BOIL POTATOES.

Mr. Cuthill, florist of Camberwell, gives the following directions for cooking indifferent potatoes. Score the skin of the potatoe with a knife lengthways and across, quite round, and then boil the potatoe in plenty of water with salt, with the skin on. The skin readily cracks where it is scored, and lets out the moisture, which otherwise renders the potatoe soapy and wet. The improvement to bad potatoes by this method of boiling is very great; and all who have tried it find a great advantage in it, now that good potatoes are very difficult to be obtained.
