must be paid.

"The German office has provided a general extension of time for three months from the first of August last for the filing of amendments to pend-ing applications. This appears like a sublime confidence on the part of Ger-mans in a short and successful cam-

mans in a short and successful campaign. Canadians having patent applications pending in Germany will not suffer, for the present at least, by the inability of their attorneys to do business in Germany, and if the war continues, further relief may be given.

May Be Infringed.

"The stories of the confiscation of British patents held by Germans and Austrians seem to be untrue. We have no official advices of cancellation. It is not a probable course of action, as a government has the right to use any patented inventions it may need, and also the right to set the compensation, but as the citizens of a country with which we are at war have ne legal status in our courts, infringement would necessarily go unpunished."
