

FIGURE 3.

CORNER HAY RACK.

This Rack holds sufficient hay for any ordinary horse, but if desired it can be made larger by using narrow wainscotting from the top of Rack to the ceiling it then forms a Drop Rack.

We suggest placing one of these Racks on each side of alternate stall partition Guards, this forms a half circle and causes only one hole to be cut in the loft floor to supply the two Racks. No waste of hay or dust from this style of Rack.

Price painted \$2.50.

THE ABOVE GALVANIZED OR BRONZED TO ORDER.
