The Government Interested in the Edmonton Way - Surveyors Will Immed ately Investigate.

[Special to The Advertiser.] Ottawa, Feb. 23.-A large delegation waited on the government today in the office of the premier in favor of constructing a wagon road from Edmonton leading towards the Yukon. The ministers present were Premier Laurier, Sir R. Cartwright, Mr. Sifton and Mr. Dobell. The delegation was introduced by Mr. Jamieson, M.P., and the other M. P.s present were: Messrs. Rutherford, Richardson, Davis, Lister, Douglas and others. Mr. Bole, of Winnipeg, was the first speaker. He started out by saying that the delegation was antagonistic to any route. A wagon road by Edmonton would be the poor man's route. It is well known that it was cheaper to travel by the old ox carts than it was by rail. Such a road would not only divert more Yukon trade to Canada, but would build up settlements along the route, thereby adding permanently to the western country and the growth of population. He recognized that the coast railway was necessary at present on account of the urgency which had arisen. They did not ask for the railroad, although that could be built later on, connecting with the proposed line at Glenora. He estimated from the folder of the Hudson Bay that it took \$78 to outfit a miner. The amount necessary for provisioning and outfitting would be \$169. There were at present over 60,000 people booked in Europe for the Klondike. Altogether he estimated that about 200,000 people would go to the Yukon next season. This would mean \$32,-882,000 would be necessary to outfit and obtain provisions for one year. Bacon and flour could not be shipped from the east on account of the freight rates. In this connection he said that the Canadian Pacific Railway had promised to reduce the rates at present about 10 per cent. The Yukon trade was obtained by Canada on the Pacific coast. When all the barriers against that trade had been removed, as he understood they now were by the government, the amount of trade which the coast would get would not be more than 20 per cent. If the government built the road, Winnipeg, Edmonton and Prince Albert would do the advertising. Mr. Bole pointed out that the road would be an \$1 in gold taken out of the country, there would be \$3 left.

Pessimistic Views Taken by Brokers-General Decline in Stocks on 'Change.

New York, Feb. 24.—Conditions were decidedly nervous on the stock exchange this morning, owing to the pessimistic view of the Spanish-American situation taken by brokers. Everybody wanted to sell stocks, and apparently there were no buyers, or if there were they could not make themselves heard in the pandemonium on the floor. The excitement was not conmake a rush to sell. became a struggling tangle. There was not so much noise as when horseplay is in order, and the nervous strain was visible in the brokers' faces

The Spanish-American Situation Dr. Gatling, of Gun Netoriety, Says So.

> It Would Take a Year to Make Propes Preparations Along the Coast. Cleveland, Ohio, Feb. 24.-Dr. R. J.

Gatling, the inventor of the famous gun which bears his name, has just arrived in Cleveland to conduct the finishing touches to the big guns being constructed for the government In an interview Dr. Gatling said: "I shall make every endeavor to hasten

the work upon the guns, in view of the present situation. Although nothing has yet been said to me by the government on the subject, I know the feeling, and the efforts that are everywhere made to hasten preparations. "As to the readiness of this country for emergencies, I am sorry to say that our preparation is not what it should be. If we should try with all our might, it would take fully twelve as the air of repression quickly gave months to get into desirable shape along the coast."

General Miles, the head of the United States army, and other members of thebureau of ordinance will be in Cleveland in a few days to see the final work on the new type of big coast defense guns.
