# RANEY'S BILL WOULD TEND TO DISRUPT

Attorney-General Withdraws Measure Prohibiting Privy Council Appeals.

#### COMPENSATION ACT

After a lengthy explanation of the advantages that would accrue, Attorney-General Raney withdrew his bil last night, prohibiting appeals to the British privy council. He explained how the Law Society and Toronto board of trade had represented to the government that the measure should be left over until next session. government was agreeable, but would rtainly reintroduce it. In any event, Mr. Raney added, the first step should logically be taken by Ottawa.

ada was self-governed and self-governing, Mr. Raney, in answer to a question by R. R. Hall (Parry Sound) as to why this country did not chose its own governor-general, said the day would not be far distant when he would be appointed on the nominacouncil or parliament of Canada.

Appeals Are Irritant. It had been said that prohibiting appeals to the British privy council would tend to hurt the British connection, but Mr. Raney contended that appeals acted as an irritant rather than a link with the mother country. He added also that there were just great legal minds in Canada as there were in England.

Hartley Dewart could not understand why the time of the house should have been taken up with an explanation of a measure which it decidedly opposed to the provisions of the bill, the adoption of which would do incalculable harm and tend to dis-rupt the British Empire. This province had no right to take away the age-long privilege enjoyed of appeal-

ing to the crown.

Hon. Geo. S. Henry agreed with
the Liberal leader. He had heard no complaints against the British privy council, and he did not believe that ene was any public demand for bill before the house.

The bill was then withdrawn.

Workmen's Compensation.

The debate on the amendments to the workmen's compensation act was resumed at the evening session by

Hon, G. S. Henry. The present act had been carefully prepared and stood as a model. The house should be very careful in making any changes. Personally he could see no eason for a change.

whip, the premier said morning sessions of the house would be advisable so as to expedite business. The work of the committees would be over ithe early part of next week and then he would ask for morning sittlings.

Inquiring into O. T. A.

At the public accounts committee yesterday J. A. Pinard moved that all orders-in-council for remission of fines under the O. T. A. between April 30, 1919, and April, 1920, be produced at the next meeting of the committee.

Mr. Pinard and Col. Cooper initend to take up each case by itself, and make public the circumstances under which convictions were imposed, which afterward were annulled or in which the fines were returned to the convicted. They are convinced that in many cases they can prove that persons were convicted against whom very insufficient proof of guilt was lodged.

Game and Fishery Accounts.

In probing the accounts of the game and fisheries department, the committee learned from D. McDonald, the earth.

C.E.F. the Finest Men.

Brig.-General Davey, in praising the work done by the C.E.F., said the Canadian soldiers were the finest body of men who ever slept on the mother earth of England. The people of Canada, he declared, had a duty to perform towards the wounded boys who fought, not only for England, but for Canada, and preserved the dignity of the Canadian nation. (Cheers.) In referring to the brotherhood, the general said that it was new in Canada, but old be England. He foresaw, however, be the brotherhood help for the returned soldier. At the present time, said General Davey, there was danger that the aftermath of other mecessary at the present time to do everything possible to improve the relations between employer and employe. Times were abnormal just now and there was through the country and the country and there was through the country and the country and the country and undercurrent of unrest and unsteadiness. Everything possible should be done to aliay this feeling. The members should remember that the eyes of the country were on them in connection with this matter and when they went to their constituents there would be a reckoning.

Demanded Withdrawal.

Mr. Z. Mageau, Sturgeon Falls, thought it strange that men in the south of the province could obtain Lake Nipissing fishing privileges when old residents of Sturgeon Falls, thought it strange that men in the south of the province could obtain Lake Nipissing fishing privileges when old residents of Sturgeon Falls, thought it strange that men in the south of the province could obtain Lake Nipissing fishing privileges when old residents of Sturgeon Falls, thought it strange that men in the south of the province could obtain Lake Nipissing fishing privileges when old residents of Sturgeon Falls, the said, that a man who had given his all for his country should be left to exist on charity or die in a work-house. The promises made to the boys before they joined the ranks must be lived up to. (Cheers.) The brotherhood was cut to help the men of the world. The first duty was to help the re-turned soldier. (Cheers.) The general, in a dissertation on bad language, as used by the soldiers at the front, deciared that, after all, bad language as used by the soldiers at the front, deciared that, after all, bad language as used by the soldiers on an assessment of 150 per cent. of the real property. Under an order-incouncil, they paid no taxes from 1916 until this year, when the order-incouncil was revoked. The distillation of the world.

Hon. Mr. Mills: I have nothing to withdrawal.

Hon. Mr. Mills: I have nothing to with the property and distilleries on an assessment of 150 per cent. was danger that the aftermath of other

## CONCRETE SHIPS HAD SHEET METAL STRIKERS PROVED SEAWORTHY

Says Prof. Slater to Engineers' Club-Explains Extensometer Test.

The extensometer test on reinforced concrete was the subject of a highly technical lecture delivered to the Engineers' Institute of Canada, in the mining building at the university last night, by Prof. Slater of Washington. Prof. Slater, who is one of the highest authorities on concrete, pointed but the increased efficiency of this method. It was used to good advantage by the United States government, he said, during the war. The emergency fleet corporation had adopted this method entirely in the conditions of the condition of the cond struction of 7500 ton concrete ships, which had proven their worth during the war, and were carrying on as merchant vessels in peace times.
Dr. J. H. Ellis, late dean of Toronto University, was presented with the sequence in the city, will receive a gold badge of honor of the Engineermade by Mr. R. O. Wynne-Roberts, president of the institute.
