WHEAT

WHEAT
The growing crop is the dominant factor in the wheat situation just now. Though the visible supply or wheat, both in the United States and Canada has decreased materially of late, it has not strengthened the market. The effect of the improved condition of the growing crops, is shown by the ups and downs weeks and the order of the condition of the growing cops. It is shown by the ups and downs weeks and the order of the condition of the growing could be supplied to the condition of the con

HOLSTEIN CALVES

Toronto, May 23rd, 1908. — Although | 89c., or down to what it was before the spring is well advanced, business does not advance. Lower cables, more liberal of-88c, or down to what it was before the advance. Lower cables, more liberal of ferings, and the bright prospects for the crops, have had this depressing effect. They are also having the effect of causing farmers, who have been holding wheat, to bring it to market. If the 1906 pays to hold wheat. Locality, there is no material change in prices, which rule at \$1.05 cm. and the standard of the control of the con is easier with little change in quotations.
