

**When The Corn Is Ready To Harvest For Your Silo**

you want an ensilage cutter that saves as much labor and time as possible—a cutter that does not require a powerful engine to operate nor clogs when feeding either green corn or dry fodder fast. The machine you need is the

**GILSON PAPEC Ensilage Cutter**

The one blower cutter you can operate successfully with as small as a 4 h.p. gasoline engine. Not chain driven—there is no lost motion—heavy gears transmit all the power. The "Papec" cuts silage into fine and uniform lengths without stalling. The throwing, blowing, lifting force carries the silage rapidly up into the silo in a steady, full stream, distributing so it packs perfectly. This helps keep the ensilage fresh and sweet.

**The Farmer's Cheapest Power**

The Fairbanks-Morse Eclipse Engine is positively the cheapest and most satisfactory engine built for producing power to run light machinery on the farm.

It will operate several machines at one time, as shown in the illustration, or any machine separately.

**"MADE-IN-CANADA" and "GUARANTEED FOR LIFE"**

The Eclipse is cheap in first cost, operation and maintenance—with ordinary care it will last a lifetime.

It is strong, light, easy to operate, absolutely reliable under the severest conditions and will save its cost many times each year.

Send for free book "Power on the Farm" and read what a practical farmer has to say about F-M Engines solving your help problem.
