ROSSLAND WEEKLY MINER, THURSDAY, MARCH 23, 1899.

2

<page-header><page-header><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text>

inoney on Wall street spring afore last." "Yes?" I replied interrogatively. "He's a fine man, an' his darter's as fine a gal as she is good lookin'—an' that's sayin' a good deal." "It is, indeed," said I, looking admir-ingly at the lithe, graceful figure and beautiful face of the girl, who at that mo-ment was swinging out on the bowsprit

"It is, indeed," said I, looking admiring the second of the water all the pack that spirt and spr Rosettes of the same gauze trim the cor-sage and a fimly scarf hangs carelessly from the left shoulder. Another costly and unusual touch is given to the gown by yards of fine gold fringe mingling with the embroidery down the front of the dress. The effect over the lace is like a shower of gold. A most effective dancing gown has an odd shaped overskirt of real lace. The foundation of the gown is pink silk. It is made with a series of flourices of pale pink mousseline de soie powdered with golden sequins. There is so little of the bodice that it hardly deserves to be dig-nified with a name. It is a soft draped affair of mousseline and lace held in place by priceless strings of large pearls which act as bands over the shoulders. The pearls are a fit necklace for a princess. No one, not even Lauy Curzon herself, has had the courage to refer to the lace frills as sheaves. <text><text><text><text><text><text><text><text><text><text><text><text> has had the courage to react firils as sleeves. Just as remarkable as her outer gar-ments will be the linens and muslins un-derneath, covered with lace and embroid-eries, flimy and light, most suitable for the Orient. Some of them might be al-most drawn through a finger ring. There are a dozen pairs of open work corsets of Parisian manufacture. Two years' sup-ply of boots and slippers is included in

Latest Estimate of the Loss From the

The Death Roll as Far as Known Is

New York, March 18.—Through the in-cessant rain today, their efforts hindered by a choking smoke that arose from the half quenched ruins, more than 200 men from the building, police and fire depart-ments, sought, but with only half satis-fring results the hodies of the persons. ments, sought, but with only hall satis-fying results, the bodies of the persons believed to have perished in yesterday's terrible fire at the Windsor hotel. Most of the time the smoke was so dense that the workmen could scarcely see their hands before their faces. The heat from the mess of debries glowing red in places hands before their faces. The near from the mass of debris, glowing red in places, held the rescuers almost beyond its lim-its. Besides, the remnants of the walls, left standing, were so shaky and threaten-ing that it would have been dangerous to allow the workmen to prowl about the mass of riveted iron and bricks. Efforts mass of riveted iron and bricks. Efforts were concentrated on clearing away the debris, removing weak walls, drilling the chimneys and other parts, the blasting making the way safe for the men to dig in the ruins for bodies. No more bodies were taken from the ruins today. The latest estimate tonight is 16 dead, 66 miss-ing and 57 injured. the time within which such undertaking and works are to be commenced in fixed at nine months from the date hereof, and the date by which such works shal be completed in fixed at two years from the date hereof. Dated this 2nd day of February, 1899. Water Commissioner. Lands and Works Department,

New York Fire.

ing and 57 injured. It is believed that the men will be able to proceed with the gruesome search to morrow with some assurance of satisfac-tory results. Several fire engines had kept their stations all night long, throwing heavy streams of water on the ruins. Occasionally a mass of flames would strug-cle up from some unputted spot like a

gle up from some unnoticed spot like a great bubble, and burst away as the streams were played upon it. Through the day explosions of gas punctured the continual pumping sound of the engines. The scene of devastation in the immediate

The scene of devastation in the immediate vicinity of the fire can scarcely be imagined Broken and blackened windows, wrecked doors, smashed railings, dirt and general debris surrounded almost every house. Thousands of spectators, pouring from every street and from every transit line that passed near the scene of the great

THE SPRING CLEANING.

Health Officer Reddick Will See That The Laws Are Enforced.

Under the new laws governing the questions of health in the province, there are some important changes made. Of course the most important change made is course the most important change made is that the governor in-council is the pro-vincial board of health, and the fossils are out of office. The 11th section of the act to amend the health act, repeals sec-tion 35 of the old act, and substitutes therefor the following: "There shall be a local board of health in each municipality, and such board shall consist of the council of each municipality. The duties of the medical health officer are not interfered with, and he is clothed with almost ab-solute powers, he is in a position to do

olute powers, he is in a position to do

with, and he is crotted with almost ab solute powers, he is in a position to do good work. Dr. Reddick, the health officer of Ross-land, will shortly issue instructions about the annual clean-up in premises in the city, and he states that he and Sanitary Inspector Forteath will enforce the law to its fullest extent. "The backyards must be as clean as the front yards," he said to a Miner reporter. "The health of the city depends upon it, and I am charged with the duty of looking after it, and shall be no respecter of per-sons. In a few days the laws bearing on the matter of the annual spring cleaning will be printed, and every house holder will have a copy, and they will be pub-lished in the daily papers. Failure to comply with the provisions of the law will simply result in the person who is derelict, being brought up before the po-lice magistrate, where he will be liable to a heavy fine. Rossland should be, and shall be, clean."

The Rossland Rifles Are Waiting.

The Rossland Eifles Are Watting. The Rossland rifle company is still wait-ing for its rifles, which should have been here last week. The officers and men are getting somewhat tired of the continued delay in getting any material with which to work. One day it is the Ottawa de-partment which is to blame and the next the Canadian Pacific railway, but all the same the wherewithal does not come.

Bank of Montreal Building.

Preliminary work is going on now at the Bank of Montreal building and the snow is being cleared off the material pre-paratory to commencing work and by the beginning of the week work will be rehandsome structure will sumed and the soon be finished.

"One of Thousands."

"One of Thousands." Miss Lily Cox, 2 Gladstone avenue, To-ronto, contracted acute catarrh through taking a very severe cold some two years ago. Her suffering was very dis-tressing at times. She tried several rem-edies, but none gave her any real relief. Dr. Agnew's Catarrhal Powder was rec-ommended to her—one application gave instant relief, and when she had used four bottles she says she was entirely eured. For sale by Goodeve Bros.
