

HEART PALPITATION.

Quebec Lady Released From Great Suffering.

Had Tried Many Medicines Without Avail, But Ultimately Found Cure Through the Use of Dr. Williams' Pink Pills.

Few bodily afflictions are more terrible than disease of the heart. To live in constant dread and expectation of death, sudden and with last words unspoken, is for most people a more awful lot to contemplate than the most serious lingering illness. The greatest excitement brings suffering and danger to such people.

Several years Mrs. Gravel, wife of E. A. Gravel, foreman in Barry's factory, St. John's suburb, Quebec, was such a sufferer, but thanks to Dr. Williams' Pink Pills she is now in the enjoyment of good health. Mrs. Gravel says:

"My general health was bad for several years, my appetite was poor and I was easily tired, but it was the frequent sharp pains and violent palpitation of my heart which caused me the greatest alarm. I tried many medicines, and was treated by several doctors, but in vain. Finally I became so poorly that I was not able to do any household work, and was frequently confined to my bed. At the suggestion of one of my friends I decided to try Dr. Williams' Pink Pills. After taking a few boxes I began to gain new strength and vigor. The sharp pains in my heart were less frequent and less severe, and in every way my health was improving. I continued using the pills until I had taken eight boxes, when I had completely recovered my health. I have gained in flesh; my appetite is good, and I am able to do all my household work without feeling the awful fatigue which was before subject to. I am very thankful to Dr. Williams' Pink Pills for they have truly released me from much suffering, and I hope that others may be induced to try this wonderful medicine."

Dr. Williams' Pink Pills cure by getting to the root of the disease. They reorganize and build up the blood, and strengthen the nerves, thus driving disease from the system. Avoid imitations. The wrapper is enclosed in a wrapper bearing the full trade mark. Dr. Williams' Pink Pills for Pale People. If your dealer does not keep them they will be sent postpaid at 50 cents a box, or six boxes for \$2.50, by addressing the Dr. Williams' Medicine Company, Brockville, Ont.

AGES OF GENERALS.

Did Men May be Good Men to Lead Young.

The generals who made their name on the side of the North during the Civil War were all young men. Grant was 40 when he came to the front; Sherman was 33 when he received command of the cavalry of the Army of the Potomac; Sheridan, one of the best, if not the very best, men that the war produced on either side, was only 44, when he started forth upon his immortal Atlanta campaign. On the side of the South, too, the generals were young by modern standards. Joe Johnston was only 52 at the outbreak of the war; Lee was 54; Jew Stuart was 28; Stonewall Jackson 37. From 17 to 40, the side went with lightning rapidity. Sheridan opened the war as a humble lieutenant, closed it as a major-general; Grant began as a captain, ended as lieutenant-general and savior of the Union. It was a time when it might truthfully be said, what, as in Napoleon's day, a career was open to the general and soldier alike, what his birth or source was that the army attracted an enormous proportion of able men. When the war could, and did, rise to brilliant generalship, a couple of years, a force was created which had all the fire and enthusiasm of the French revolutionary armies, and which fought superbly till it was shattered, and, decimated and broken in morale by Grant's fearful series of frontal assaults on entrenched veterans.

If we turn to our own British field army to-day, are there any such men? One of the officers in high command in South Africa is under 40. These are the ages: Gen. Buller, 61 years; Gen. Gatacre, 57; Gen. Lord Methuen, 55; Gen. Buller, 62; Gen. Buller, 48; Gen. Buller, 60; Gen. Buller, 60; Gen. Buller, 65; Lord Roberts, 68; Lord Kitchener, 60.—National Review.

NERVINE.

Unrivalled as a Household Remedy.

Relieves and Cures: Headache, Neuralgia, Toothache, Rheumatism, Headache, etc.

Embarrassing: When the new minister, a handsome unmarried man, made his first official call at the Posticks, he took Anna up in his arms and tried to kiss her. But the child refused to be kissed; she struggled loose and hid into the room, where her father was putting a few finishing touches to her adornment before he took her to the parlor to greet the "young man."

"Mamma," the little girl whispered, "the man in the parlor wanted to kiss me."

"Well," replied mamma, "why didn't you tell him I was your mother?"

"I was," replied Anna, promptly. "Mamma says she will."—Harper's.

THE STORY OF ASPHALT.

A Mining Concession for a Wedding Present.

ROMANCE OF BLACK PITCH

Gilson Willets, in the Metropolitan Magazine. When considered as a pavement, asphalt is probably the finest of subjects. In all other respects the subject contains all the elements that arouse human interest—a romance or love, a thousand tragedies, no end of perilous adventures, heroic sacrifices, financial scandals, and fortunes lost and won. I will dispose of the romantic side first, in order to clear the stage of the fair ones who make romance possible, and to make way for sterner stuff. On New Year's Day, 1883, Guzman Blanco, President of the United States of Venezuela, sat in the office of his palace at Caracas, reading a petition that had been sent to him by an Englishman named Horatio R. Hamilton. In the history of asphalt this Hamilton was destined to play an important part; for it was to him that Guzman Blanco eventually granted the famous concession to all rights of the asphalt products of the State of Bermudez, in Venezuela. Perhaps Blanco, on that New Year's Day, was figuring how he could add to the millions which had already come into his hands through clever manipulation of the Venezuelan treasury, and which he could add to the millions which he had already received in gold, as fast as it poured into his private coffers. Just as he finished reading the petition the President of the man did not remove his silk hat, and Blanco probably assured himself that here was one who would not accept "no" for an answer until he had turned Venezuela upside down. Nevertheless, on that famous New Year's day Blanco refused to grant the concession. No sooner had Hamilton departed than a young girl entered the room. She was distinctly a daughter of Venezuela, with coal-black eyes, shining raven hair, and a supple form. She was also the daughter of the President of Venezuela, for in that few minutes' interview with her father she freely expressed her views regarding the Bermudez concession, saying that to grant it would be for the good of Venezuela, and that her father had better not longer refuse in the expectation of a further increase in the price of his "yes." Still Blanco said "no" to his daughter, just as he had a few moments before said "no" to his petitioner. This daughter afterwards married a distinguished French nobleman, and now the Duchess de Morny, a star in the fashionable firmament of Paris, London, and New York. It seems that Hamilton had fallen in love with the niece of President Blanco. The future Duchess de Morny one day said to Hamilton: "The concession you wish would be a pretty wedding present, would it not? I Hamilton forthwith accepted the marriage; and one of the first wedding presents he received was the concession of the rights to the asphalt products of the State of Bermudez. The future duchess had evidently carried the day by appealing to the romantic side of her father's nature. Such is the romance in the history of asphalt.

The "natural products" alluded to in the concession included the pitch lake from which comes fully half of the asphalt with which the streets of the cities of the United States are now paved. This lake is considered one of the greatest natural curiosities of the world. Hamilton and his friends were probably the first party of English-speaking people to visit that lake. About twenty miles from the coast of Venezuela, the asphalt covered with grass. This was the lake of asphalt. There was a path that led toward the middle of the lake. It was crisp and hard under their feet. They passed patches or pools of pitch where the grass could not grow; these were breathing holes. After going some distance they came to what appeared like a river of black pitch winding through the grass. Their Indian guides cautioned them against going on this, as these were soft places in which one would sink. This vast deposit of pitch had been reserved by nature for some beneficial purpose. While it had been known to the natives for ages, the only use they made of it was to pitch the bottoms of their canoes. The very path that Hamilton's party took to the lake was the one that had been used by the natives for centuries. This Venezuelan pitch is practically inexhaustible, being continuously, through the action of the sun, the State of Bermudez, itself in on the coast of Venezuela, about one hundred miles from the island of Trinidad and the pitch lake is in the very centre of the State.

After Hamilton, the next hero of asphalt was A. H. Carter, a civil engineer. After the concession Hamilton's company confined itself principally to the export of timber. As this did not prove profitable the company behind Hamilton decided to send a civil engineer and explore the country and see what could be done with the pitch lake. Carter was the man selected. He was an expert in the development of such enterprises, and to him should be given all the credit for the development of the pitch lake of Venezuela, and for the great task of clearing a path through the wilderness, building a railroad, and making possible the transportation of the asphalt to the markets of the United States. It was a work requiring great physical endurance and determination, skillful management and untiring zeal. Carter and his wife shared the hardships and self-sacrifices in opening the wilderness between the pitch lake and the coast, and to them all praise is due for establishing the pitch lake settlement, Guanaco; for the little village owes to the Carters its existence, name, and present state of thrift and activity. Now, for thirteen consecutive years Carter has lived and toiled in the wilderness, suffering all the privations to be expected of such a place.

The new Cunard Line steamer Ivernia arrived at New York to-day, from Liverpool and Queenstown, on her maiden trip, with 182 cabin and 1,735 steerage passengers. She averaged 16.8 knots.

The business section of Gatineau Point was swept by fire, the loss amounting to \$30,000.

THE HELIOGRAPH IN WAR.

A Wonderful Development of Optical Telegraphy.

Before the war of 1870-71 optical telegraphy comprised signaling by means of flags by day and by means of lanterns or torches by night; but in that war the heliograph proved its efficiency. The electric light was at once suggested to make the system independent of sunshine and fair weather, but the difficulty of having it on hand in the field was then too great, so other sources of light (such as improved petroleum lamps), were used. England, however, adhered to the heliograph, and had great success in its use in India and in South Africa. In some cases for distances of more than 100 miles. Ordinarily, however, the heliograph, using as it does the sun's rays as the source of light, is limited to a range of about fifty-five miles; but by means of relay stations, it can, of course, be used to much greater distances. However, in the field such relay stations are liable to interruption by the enemy's cavalry, the messages can often be intercepted at certain points by interposing a cloud of smoke made by burning brush or damp straw, and, finally, the number of repetitions increases the chances of error. The electric-arc light is far more efficient, is independent of the weather and can be used by night as well as by day. By its means the range of the heliograph is extended to more than 100 miles. In the Transvaal war the British made use of this purpose of the electric search-light from the ships, and this was, indeed, the only means of communication with the external world relied upon by the beleaguered garrisons of Ladysmith and Kimberley.—John P. Wisner, in The Engineering Magazine for May.

I know MINARD'S LINIMENT will cure Diphtheria.

JOHN D. BOUTILLIER, French Village.

I know MINARD'S LINIMENT will cure Croup.

J. F. CUNNINGHAM, Cape Island.

I know MINARD'S LINIMENT is the best remedy on earth.

JOSEPH A. SNOW, Norway, Me.

Williams Was Schmidt.

The identity of Harry Williams as Julius Schmidt, son of Julius Schmidt of Detroit, has now been established by the Toronto Detective Department beyond a doubt. His parents cannot be convinced that Williams and their son were the same person, but others who knew the young man are confident that the man hanged here on Easter Saturday was Julius Schmidt, Jun.

Miller's Worm Powders cure fever in children.

Boarer Was a Torontonian.

The man whose body was found a few days ago in a decomposed state in Buffalo Creek, Buffalo, has been identified as Charles Boarer, of Toronto. He was a resident of that city for several years. The only permanent employment he is known to have had was the position of porter at the "Clarendon Hotel, King street, west, Toronto. He had no relatives in the city.

Minard's Liniment Cures Sore Erythema.

She Was Accepted.

"You are really anxious to go to South Africa to nurse the sick and wounded? But, my dear young lady, have you any experience in nursing the sick and wounded?"

"Rather! Four of my brothers play football, and my father took up cycling at 76"—Cassell's.

A dose of Miller's Worm Powders occasionally will keep the children healthy.

The Mining Industry of Greece.

Of all the industries in Greece mining takes the foremost place, and doubtless will assume larger proportions in the future. The country is rich in all kinds of minerals, such as lead, manganese, brown coal, antimony, and especially emery. Rich deposits of fine marble also occur in many districts. In 1898 the value of all the minerals exported from Greece was about one-fourth of the total exports of the Kingdom.

Minard's Liniment Cures Dandruff.

The centre section of the 8-holed Woollen & Knitting Mills at Oshawa, was destroyed by fire. The loss is about \$25,000.

How Are Your Corns?

Do They Sting? Are They Painful? Do They Make You Limp?

A Painless and Radical Cure for Corns of Every Description.

PUTNAM'S PAINLESS CORN AND WART EXTRACTOR.

A Sure, Safe, and Reliable Remedy That is Guaranteed to Remove Corns Without Pain or Discomfort in a Few Days.

The principle upon which Putnam's Painless Corn Extractor acts is entirely new. It does not sink deep into the flesh, thereby producing soreness, but acts directly upon the external covering of the corn, separates it from the underlying tissue, removes the direct pressure from the part, and at once effects a permanent cure without pain or discomfort.

Let those who are suffering from corns, yet sceptical of treatment, try Putnam's, and by the complete cure of the cure they will be ready to recommend it to others. Beware of dangerous, poisonous acid substitutes, and take only Putnam's. It never fails to cure. Sold every where, or by mail for 25c from N. C. Polson & Co., Kingston, Ont.

EFFECT OF CLIMATE.

The Great Lakes Influence on Weather Conditions in Southern Ontario.

Variable Nature of Climate in Lake Region the Cause of Kidney Disease.—Mrs. R. Fitzsimmons, of Nelson, Halton Co., Cured by Dodd's Kidney Pills.

Burlington, April 23.—The County of Halton at the head of Lake Ontario is not the least fruitful field for Dodd's Kidney Pills in the Upper Province. It has its share of Kidney Disease like every other district in the north half of this continent. No village, town or city in the northern zones has ever escaped. Climate is the principal cause of Kidney Disease, though, of course, there are various causes.

In Ontario, Kidney Disease in all many forms is the most common ailment, and the commonest cause of Kidney Disease in this Province is the variable nature of the climate. These two facts probably explain the case of Mrs. R. Fitzsimmons, of this place. Halton County being under the trying influence of the Great Lakes, Mrs. Fitzsimmons tells of her experience with Dodd's Kidney Pills.

"Some time ago I got a very bad pain in my side. It was that kind of pain I was hardly able to walk, and nothing that I took seemed to do me any good. As it seemed to be getting worse I thought I would try your Pills, and before I had used one box I began to feel better. By the time I had used two boxes the pain all left me, and I felt better than I have for over a year. I tell all my friends of the good Dodd's Kidney Pills have done for me."

Not All Taffy.

"Can you tell me who Ananias was?" asked the proprietor of the proprietor of the book store.

"Of course I can," was the reply. "He was the champion liar of the world at one time. Did anyone call you Ananias?"

"Yes, sir. Yes, called me Ananias; and darn my buttons if I didn't think he was giving me a bushel of praise. Next man calls me Ananias won't know what house fell on him."—Washington Post.

To Cure a Cold in One Day.

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Groves' signature is on each box.

Could Not Hold Title.

At a church meeting in one of the suburbs of Chicago, held for the purpose of taking measures for increasing the interests of members and strengthening the church, an inquiry was made whether a certain lawyer of the congregation, whose financial affairs were somewhat involved, had "got religion." To which another lawyer present responded, "No, I think not, unless it's in his wife's name."

A chemist says: "On examination of the many tonic pills on the market, I find Miller's Compound Iron Pills to possess the greatest strengthening properties. They are undoubtedly the best medicine to build up the system."

He Spoke Advisedly.

Returned Fighter—And as I was being carried away in the ammunition wagon.

Listener—Don't you mean the ammunition wagon.

Returned Fighter—No, sir; I was sitting in the hot seat when they put me in the ammunition wagon.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O. We have discovered a new and powerful remedy for the last 15 years and believe it perfectly honorable in all business transactions and generally able to carry out any obligations made by their firm.

WATERBURY, Wholesale Druggists, Toledo, O. WATSON, Wholesale Druggists, Toledo, O. Hall's Family Pills are the best.

Almost Human.

"Oh, George," tearfully exclaimed his wife, "I'm missing him at the door. 'That's just you brought home the other day!'"

"What's the matter with him?" asked Mr. Ferguson.

"I don't know, but he won't tell me. When I ask him what the trouble is he just swears drowsily!"

Good for Missionaries.

The Oxydonor, patented by Dr. Sauche, formerly of Montreal, appears to be a most serviceable instrument, especially for those living in outlying districts.

By causing the blood to absorb oxygen from the air, it purifies the system entirely and cures without medicine or pain. Seeing that it makes use of nature's great restorative, it is not remarkable that it should have such great success in all classes of disease and especially in those of the lungs. Physicians are beginning to rely more on oxygen than ever before. It is to disease what liquid air is to power.

To Soften Hands Quickly.

First wash them thoroughly in tepid water till every vestige of dirt is removed. Then before drying them well rub in glycerine and lemon juice mixed in equal proportions. Then dry thoroughly with a soft towel, and powder with almond or oatmeal.

Minard's Liniment Cures Burns, etc.

Smyrna Figs.

For good years the average fig crop of the Smyrna districts amounts to about 26,000,000 pounds, but last year the yield was only 18,000,000 pounds. The harvest time in Asia Minor is November. The figs are chiefly shipped three months later.

Miller's Worm Powders are the best laxative medicine for children; as nice as sugar.

The ice on the Saskatchewan at Edmonton moved out on Friday the earliest in years.

A Chatham man says: "I treated for four years with physicians for pains in my back and stomach, trouble without relief. Miller's Compound Iron Pills cured me."

Right Rev. Wm. Faret, Bishop of the Protestant Episcopal Diocese of Maryland, was married in Baltimore. He is 73 years old.

QUEEN'S DRAWING ROOM.

Numerous questions are often asked by women anxious to attend a royal drawing-room as to the rules and regulations necessary to be observed. When a drawing-room is to be held a woman, on seeing the intimation of the date, should at once write to the lord chamberlain a note, informing him of her intention to be present, and if she is going to make a presentation she should at the same time inform him of the fact, and the name of the woman she is to present.

No unmarried woman, whatever her age or rank may be, can make a presentation; this is a privilege accorded to the married only, and they can at a drawing-room present only one woman in addition to their own daughters or daughters-in-law. The woman who makes the presentation must attend the same drawing-room as does the person she represents. A married woman can make a presentation at the same drawing-room at which she herself has been presented, but when she does so the person she presents must enter the presence chamber after, and not before her.

A woman who merely attends a drawing-room—that is, who has been already presented—simply courtesies to Her Majesty as she passes, but those who are presented kiss the Queen's hand while courtesying. They do not take Her Majesty's hands in theirs, but place their ungloved right hand beneath the Queen's hand, which she extends to them to kiss. When the Princess of Wales holds the drawing-room for Her Majesty those who are presented do not kiss her hand, but merely extend their hands to her, and both after they have made their obeisance to the princess who represents her, courtesy as they kiss the presence chamber of the royal family on passing them, in the order in which they stand.—Chicago News.

The weak, fluttering heart becomes strong and regular when Miller's Compound Iron Pills are used.

Contrary Evidence.

"However, no man disleges, the majority of us Americans are genuinely patriotic."

"Oh, I don't know. I notice that most of us turn to the South African war for our patriotism. A number of the Philippines."—Harper's Bazar.

Miller's Grip Powders cure.

Gets His Dinners Anyhow.

First Veteran Actor—Well, how goes it? Good engagement, I suppose good pay?

Second Veteran Actor—Well, old friend, you know how these things are. Salary, properly speaking, I don't get, but I eat the whole of an enormous beefsteak in the second act.

Miller's Compound Iron Pills; only 25 cents for 50 doses.

Fifty-two Years Without a Drink.

Some animals can live many years without water. A parrot lived 52 years in the London zoo without taking a drop of water. A number of reptiles live and prosper where there is no water.

Minard's Liniment Relieves Neuralgia.

The Montreal Harbor Board has declined to accept the plans of the Commissioners syndicate for improving the harbor on the ground that they do not comply with the agreement.

The slaves who left their masters in the Sudan are in no case compelled by the inspectors or by the courts to return.

Local Launches \$200.00 seaworthy, reliable, no fire, smoke or heat. Send stamp for Catalogue. ELECTRO-VAPOR LAUNCH CO., HAMILTON, ONTARIO.

PERMANENTLY CURED BY DR. KILM'S Great Nerve Syrup. No fits or nervousness after first day's use. Send to 827 Arch street, Philadelphia, Pa., for treatise and free \$2 trial bottle. For sale by J. A. Harter, 1780 Notre Dame street, Montreal, Que.

Mrs. Winslow's Soothing Syrup should always be used for Children's Teething. It soothes the child, softens the gums, curbs wind colic and is the best remedy for Diarrhoea. Twenty-five cents a bottle.
