Unsolicited Testimony.

Here is the unsolicited testimony of Mrs. C. A. Martin, of Granville, N.Y., concerning Dr. Hugo's Health Tablets for Women. We have her consent to publish her letter. It reads as follows:

I feel that I should tell you what wonders Dr. Hugo's Health Tablets have done for me. I had been running down, getting thin in flesh, and losing appetite for the past year, and though doctor's advice was sought and different remedies were used, there seemed to be no improvement. At length a friend who had received great benefit from Dr. Hugo's Health Tablets, advised me to try this remedy. I did so. In less than a week I began to see good effects. My appetite returned, my nerves began to get steady, my aches and pains began to leave me. I commenced to take on flesh, and I felt that I was being rapidly restored to health. At this moment I feel I am a new woman.

We want you to notice that the above letter proves our claims for Dr. Hugo's Health Tablets in two particulars.

First, that they will restore health after other remedies and even physicians have failed. Mrs. Martin had tried both. Second, that improvement begins at once. Mrs. Martin saw good effects within a week.

If you are suffering from a ground was the same and the same and the same are suffering from a ground.

If you are suffering from a run-down condition, or any weakness peculiar to your sex, you, too, can be made well and strong by these tablets.

Take them one week and note the improvement in your feelings and general health.

Dr. Hugo's Health Tablets Make Healthy Women.

CURED HER BOY OF PNEUMONIA

Newmarket Mother is loud in her Praises of the Great Consumption Preventative

"My son Laurence was taken down with Pneumonia," says Mrs. A. O. Fisher, of Newmarket, Ont. "Two doctors attended him. He lay for three months almost like a dead child. His lungs became so swollen, his heart was pressed over to the right side. Altogether I think we paid \$140 to the doctors, and all the time he was getting worse. Then we commenced the Dr. Slocum treatment. The effect was wonderful. We saw a difference in two days. Our boy was soon strong and well."

Here is a positive proof that Psychine will cure Pneumonia. But why wait till Pneumonia comes. It always starts with a Cold. Cure the Cold and the Cold will never develop into Pneumonia, nor the Pneumonia into Consumption. The one sure way to clear out Cold, root and branch, and to build up the body so that the Cold won't come back is to use

THE FACE ON THE CENT.

It Is Not That of an Indian, but of a Pretty Little Girl. Mrs. Sarah Longacre Keen, who lived and died in Philadelphia, came nearer being the queen of the American mint than any woman who ever lived. With the exception of Queen Victoria, whose image was engraved on every coin of the British and Indian empires, Mrs. Keen was first in the number of her metal photographs. Her face as a girl of twelve summers is to be seen on every American cent issued since 1836 from Uncle Sam's

coin factory. It is usually assumed that the face on the head side of the copper is that of an Indian, but a close look will reveal a Saxon profile. Just borrow a cent and look at it. The setting is that of an Indian

Between 1828 and 1840 James Barton Longacre was chief engraver in the United States mint in Philadelphia, In 1835 a competition was opened for sketches and engravings for the new copper cent that was to be issued and which has since been in service. There were over a thousand designs offered. The prize was a good one. Longacre racked his brain for some original and singular design that would strike the judges, but for months he failed to

One morning a number of Indians, with their chief, who had been to pay their respects to the great white chief in Washington, came to the city and were shown through the mint. They were introduced to the white chief's picture maker, who was just then showing his young daughter Sarah the great concern. The old chief was attracted by the sweet faced maiden and her interest in his feathers and paint. She childishly wondered how she would look in the feathered headgear. This was told the chief, who solemnly divested himself of his feathers and had them placed on the girl's head. The effect was so striking that the father took time to make a sketch of the picture, finishing it afterward for his own amusement.

At the last moment of the period given for sending in engravings he hethought himself of the possibility of the combination of Indian feathers and Saxon sweetness. He got it in, and much sport was made of the child at the time in the city because of the incident. The sketch passed through the seventh sifting and finally reached the last round. By one vote it won, and ever since Sarah Longacre's young face has served for the humblest of coins, than which no single coin in the world has such tremendous circula-

Telling the Time. One of the accurate ways of telling the time is to use your hand as an hour mark. Nothing simpler. armers not possessed of watches or clocks and who have some practical notions of common utilities not invent ed by man, but given to us by the Creator, know the rule. It is necessary to keep in mind the hour of sunrise and sunset and to hold the arm straight out from the shoulder, with the hand at right angles, bending from the wrist forward. If the sun sets at 7 o'clock and is still high in the heavens close one eye and make three measures of the width of the palm near the thumb. Each measure means one hour. Three measures mean three hours, so that the time thus obtained is 7 less 3, or 4 o'clock. With practice you can beat the average watch.

A Wonderful Island of Chalk. The English island of Thanet, forming a part of the county of Kent, is almost wholly composed of chalk. The island is ten miles in length and about five in breadth and has more chalk exposed on its surface than has any other spot of equal area on the globe. British geologists say that there are not less than 42,000,000,000 tons of chalk "in sight" on Thanet and that it would take 10,000 men and 5,000 horses and carts 20,000 years to move it, providing it were dug up ready to be carted away.

A Peculiar Tree. A singular maple tree on the left bank of the Oder, in Germany, is at least a century old and has been twisted and cut into a kind of circular house of two stories. A firm, leafy floor has been formed by causing the branches to become gradually woven together. Above this is a smaller second floor, similarly formed, and the ends of the branches have been woven into solid walls, in which eight windows on each story have been cut.

Catholic Priests and Marriage. Marriage by the clergy was first posi-tively forbidden in the year 1074 by Pope Gregory VII. The controversy, however, which had been going on for centuries on that subject was not altogether settled by Gregory's decree. The council of Trent in 1593 was the ec-clesiastical body which formally prohibited priests from forming marriage alliances. That permanently settled the matter.
