MINARD'S
"KING OF PAIN"
LINIMENT

Extract from a letter of a Canadian soldier in France.
To MRS. R. D. BAMBRICK:
The Rectory, Yarmouth, N.S.
Dear Mother:-
I am keeping well, have good food and well protected from the weather, but have some difficulty keeping uninvited guests from visiting me.
Have you any patriotic druggists that would give something for a gift overseas—if so do you know something that is good for everything? I do—Old MINARD'S Liniment.
Your affectionate son,
Rob.

WILL BOOST THE MOVEMENT TO BUY IN CANADA

Unequivocal support for a "buy-in-Canada" movement that will be extended from coast to coast was voiced at a representative meeting of Montreal bankers, brokers, bond dealers and transportation companies.

"To promote the purchase as much as possible of goods produced in our country, work has been going on for ten years," said J. H. Fortier, Dominion President of the Canadian Manufacturers' Association, following the meeting. He declared that if a national movement having this for its aim were once started its result would be immediately felt in the great boost that it would give to native industry.

Agriculturists and other producers and consumers will be approached to lead their aid.

Drummondville will be the scene of a large meeting in connection with the movement on August 12, and thereafter meetings will be held in all the principal centres of Quebec.

A similar campaign is being conducted in Ontario, and when the Central Provinces have been thoroughly organized the movement will be extended to embrace the Maritimes, the Prairie Provinces and the Pacific coast.

Ferocious Hurricane In The Alps

Turin, Aug. 5—A hurricane raged through the Alps today tearing up houses and trees and endangering the lives of dwellers among the peaks.

From Monterosa came word that two Alpine climbers had been swept away by the swirling force of the storm. One of them was blown down into an abyss, while the other, for a fleeting moment, clung in safety to a rope above the gaud chasm. Then a stronger blast swept him, too, down to the depths.

Customs House Burned

Another tale of tragedy came in from Everea, relating the fate which had befallen Montegarone, 2500 feet above sea level. There the pious villagers were celebrating the fast of the Redeemer when the hurricane roared in from the mountains, knocking down houses and tearing up trees.

In its path wind seized a woman, dashing her as though she were no more than a blade of straw down the abyss below.

From Bolzano on the border of the Tyrol came the report that customs houses had been burned with an enormous damage.

IN THE WORLD OF INDUSTRY

Kansas Claims a Champion Wheat Grower

Tempico is the largest seaport and chief industrial city of Mexico.

United States consumes 75 per cent. of all the rubber grown in the world.

One hundred years ago the only known use for rubber was for removing pencil marks.

The only cobalt mine in the United States is located near Fredericktown, Missouri.

Many valuable products come from the mangrove forests of Siam, which cover an estimated area of 320,000 acres.

Largest and most powerful motor vessels in the world, the Royal Mail liner Asturias (22,000 tons) has just been launched at Belfast.

Castle soap, although made in Spain, is little used in that country, for toilet use the Spanish taste requires a highly perfumed soap.

The bricklayers' union, which took over the marble setters' union ten years ago, is now credited with an ambition to absorb the plasterers.

Sugar-cane was first grown in territory now constituting the United States in 1751, and seven years later the first American sugar mill was built near New Orleans.

An official report just issued by the Ministry of Labor shows that on July 1 there were 1,304,300 unemployed registered in Great Britain, or nearly 300,000 more than a year ago.

Northwestern Kansas claims a champion wheat grower in Albert Weaver, of Bird City. Mr. Weaver has harvested 4,200 acres of wheat this year, amounting to more than 80,000 bushels. He expects the crop to net him in excess of \$120,000.

In celebration of the centenary of the first railway and in honor of the memory of its builder, George Stephenson, the British Institution of Mechanical Engineers has decided to give an annual prize, and to raise a fund for research fellowship.

The first United States patent for a sewing-machine of which there is any existing record was granted to John Greenough on February 21, 1842. This machine employed two needles that were pulled entirely through the cloth by pincers, and the stitch was formed with two threads. The machine was used principally on leather work.

The present coal crisis in England has served to recall the methods employed by the miners in bringing their grievances to public attention more than a century ago—in 1815. At that time the workers made their protest in person. They dragged loads of coal to London and demanded to see the Prince Regent. But the magistrate sent for them, told them they must not bother London's august personages and bade them get back to their work. And they went back home, carrying their loads behind them.

Russell Scott Declared Insane

CHICAGO, Aug. 6—Russell Scott today won his last fight to escape the gallows.

A jury of the Court of Superior, Judge Joseph B. David found him insane.

The jury reached its verdict after deliberating three hours and 40 minutes. Its first ballot was reported to have been seven to five for insanity and thereafter the vote gradually swung to the insanity verdict.

Scott immediately was committed to the Chester Asylum for the insane.

MINERS VOTE TO RETURN TO WORK

Halifax, Aug. 5—The miners of Nova Scotia employed by the British Empire Steel corporation agreed by a majority of 1,133 in a plebiscite today to return to work under the proposals of the provincial government. There were 6,693 votes polled 3,913 for and 2,780 against, many of the miners abstaining from the balloting. The directors of the corporation meeting in Montreal today to consider the same terms, characterized by the government when they were presented last Friday as "final proposals," adjourned to meet again tomorrow. It is still undecided therefore, whether or not there is to be an early resumption of work in the five-months idle mines of the Province. The resumption, as proposed by Premier Rhodes and his cabinet will be under interim six months contract pending a thorough investigation of the industry. Wages paid would be those of 1922 or a reduction of six to eight percent from 1924 rates, and working conditions would be those of 1924. The government would rebate one-fifth of their coal royalties and the controversial collected by the company would be submitted to a referendum held by the government.

Final figures will probably show some slight changes but the approximate results were given by the United Mine Workers headquarters in Glace Bay.

The large southern areas of Cape Breton, New Waterford excluded, gave a majority of about seven hundred for the proposals. New Waterford voted them down by about 150 votes and Pictou county on the mainland did likewise by a narrow majority of ten. Cumberland county gave a majority of 384 votes and the northern Cape Breton areas a majority of 151. A notable vote against, was that at Reserve, in the southern area, 69 for 317 against.

The proposals went to the miners with the endorsement of their district board, whose acceptance was given with the stated understanding that the terms did not prejudice the case which the miners would later submit to the commission of investigation. President John W. McLeod, of District 26, United Mine Workers, stated that the executive would resign if the pronouncement was not favorable.

BIRD'S ROOFS

Art Craft Roll Roofing

Lay Bird's Art Craft Roll Roofing right over your old roof!

1. Save time—laid without ripping off old shingles with consequent litter and dirt.
2. Makes a permanent, double roof that keeps out the cold in winter and the scorching heat of summer.
3. Is waterproof, spark-proof, and handsome. Comes with decorative red or green slate surfacing.

Bird's Art Craft Roll Roofing is made by Bird & Son, Limited (Est. 1795), manufacturers of Neponset and Canadian Twin Shingles, Paroid Roofing, Neponset Black Building Paper and Combination Wall Board. There's a Bird product for every sort of building.

We are headquarters for Bird's roofing, building papers and wall board.
