Review of the Year's Work of the Evening Technical Classes of the Calgary Schools Five Teachers Instruct the Foreign Born

HE remarkable progress which has been made by the technical classes comprising Calgary's night schools for industrial education was undoubtedly a revelation to the large audience which attended the closing exercises of this branch of education at Central school last evening.

The numerous exhibits on display were conclusive proof of the efficiency of the instructors and the diligent work of the pupils. The principal address of the evening was delivered by Dr. Mac-The points particularly brought out in his address were that

boys and girls are permitted to discontinue their education at too early a period in life, and that our present system of education did not afford the coming generation a sufficient training with which to cope with foreign countries such as Germany for commercial and industrial suppremacy.

Dr. MacRae cited the fact that in Germany the education of the students dove-tailed as it were with the industrial vocations to follow, so that the highest standards of efficiency were thereby attained. In the United States and Canada the loss in national wealth hy reason of children leaving school at too early an age was appalling, and if something were not done to remedy this evil we would eventually be outclassed by our foreign competitors in every branch of

Dr. MacRae summed the whole gist of his speech up in the short sentence that: "The efficiency of the nation depends upon the efficiency of the individual."

An important departure was the Prof. Kidner's Report. The report of T. B. Kidner, in charge opening of the commercial classes which, as may be noticed, attracted a

The report of T. B. Kidner, in charke of the various technical classes, was as follows:

It is once again my duty to present a serior of the work of Calgary's a the commendation of the work of Calgary's a the commendation of the work of Calgary's a complete the commendation of the work of Calgary's a complete the commendation of the work of Calgary's a complete the complete of the work of Calgary's a complete complete the complete complete

sood season's work being accomplished in each division. Shep mathematics was also transferred to the High school, and attracted so large a number than it was necessary to make two groups, each of which accomplished good results. Practical arithmetic was also carried on in the High school as well as the Central school, as in last year's program. In each of these classes the average attendance was remarkably good to the end, and much valuable work was done.

Course in Gas Engines.

Shortly after the opening of the session a request was received from a number of men for a course in gas, gaseline and ell engine practice, and the committee decided to equip a room in the Haultain school for the purpose. A very valuable lot of machinery was loaned by various firms, and so large a number of students were enrolled that two groups had to be formed on separate evenings. The course was most successful, and a number of the students have expressed their thorough appreciation of the instruction given. Special mention must be made of the assistance afforded by the leading garages and agricultural machinery houses, many special demonstrations for our students being arranged in these establishments.

HUDSONS BAY COMPANY

An Interesting Budget of Economy News from "The Bay"

A Noteworthy Display of Home Furnishings Which Will Provide for the Furnishing and Re-furnishing of Homes as They Should be Furnished

TO THOSE who have planned, or perhaps are planning right now, on furnishing a new home or refurnishing the old one, an hour or so spent in this new Carpet Section will provide almost endless suggestion to the newest and best ideas, and will probably impress most forceably the fact that prices, too, are a little lower here than in most stores. There's scarcely a day passes that does not bring to this big Carpet Section some new and beautiful production in handsome floor

One of the new arrivals unpacked as late as last Thursday, and worthy of special mention is a product of one of the most wonderful carpet looms yet invented. This clever machine weaves a rug, the like of which would defy an expert to tell it from a genuine hand tufted rug. The artistic and bewitching blending of color is to be found only in rare Oriental Rugs costing about ten times the price. These wonderful rugs, produced on a more wonderful machine, come in small but desirable sizes only, of a very rich, long pile, and decidedly distinctive in appearance. And best of all, these new rugs cannot be judged by their prices, as they have been marked to the level of much more commonplace productions. Sizes 27x54 inches, selling as low as \$7.50, with other sizes priced in like

For bedroom treatment in the most artistic homes the Art Noveau Rugs are foremost in favor this season. The soft blending of color in the border and the quiet plain centres rendering them most desirable for the dainty bedroom. Rich Wilton Rugs of a very fine quality close pile are here in exact copies of the gems of Turkey and Persia with all the marvels of color and design of old masterpieces, the originals of which having cost their owners all the way from \$10,000 to \$50,000 each. Copies of such valuable floor coverings are here at remarkable values and in a wonderful selection, not to be seen outside this store in the west.

In New York and London this season there is a great demand for rugs copied from antique Chinese creations that have cost their owners small fortunes. We have been very fortunate in securing the exclusive sale of one of the leading makers of these rugs in Calgary, and have gathered for the inspection of the critical buyer, some beautiful examples. One particularly handsome design, a copy of an old piece which cost its original owner \$50,000, is reproduced in a rich Wilton of very fine weave and priced at \$65.00.

PERIOD RUGS play an important part in the showing here. Some very notable productions to be seen in rugs, faithful in every detail to the periods of Louis XIV., Louis XV., Empire, Adam and other notable styles.

Bath Room Mats

Mats for the bathroom are considered a necessity in the modern home. These we tell of today are the best we could find to answer the purpose and answer it well. Made of specially prepared cotton, they wash well, keep

New "Colorfast" Floor Covering

"What in the world shall we cover the bedroom floors with? Rugs are nice, but I can't quite afford them just now, and linoleums are rather cold-looking." You often hear such remarks by housekeepers who are in doubt Now, let us suggest the new and very appropriate "Colorfast" floor covering, for we believe it will fill the bill admirably. This wonderful material comes in artistic shades of blue, brown and green and is fully guaranteed to hold its original color, even should it be nailed on the roof and left for months. It can be scrubbed like linoleum, yet has the appearance of carpet. And you'll wonder at the prices for such desirable floor coverings; 36 inches wide. Per 55C and 65C

The New Linoleums

Three very important features, apart from the immense showing of splendid Linoleums here, and important to every home planning new coverings for their

First, we are showing an Inlaid Linoleum that not only keeps its pattern to the last; but will wear clean and bright throughout. Second, we are showing Linoleums in parquetry designs that are wonderful resemblances to hardwood floors, and fill a long-felt want. Third, we have printed linoleums, the patterns of which are printed in a specially prepared oil color that resists the hardest wear. And yet the price is no more than you would pay for much inferior qualities elsewhere. Per square yard 45c 55c 60c.

Wonderful Values in Women's Hose Today

For no other reason than the mere fact that stocks are a little too heavy for this season to our way of thinking, have we cut prices to such remarkable proportions for this day's selling. And women who have become accustomed through months of experience to look to this store for the very best values in Hosiery will make the most of this opportunity, well knowing the splendid money's worth they represent at regular markings.

In the Central school, technical classes were carried on in the same subjects as last year, namely, building construction, elementary and advanced, the latter being offered for the first time; drawing for house carpenters; sheet metal drafting; painting and decorating; practical English and practical or workshop arithmetic. One new subject was undertaken, mechanical drawing, a preparatory course for the various subjects involving special drafting courses later on, which had a large enrollment and produced some excellent work.

The attendance in the sheet metal

BY TRADES DISPUTES

DURING MARCH

O TTAWA, Ont., April 14.—Industrial conditions were not very seriously affected by trade disputes during March, an improvement being evident as compared with the preceding month; while conditions were much the same as during the corresponding month of last year. There were in all fourteen disputes in existence, involving directly about 2.120 employees. The mining industry was considerably affected, disputes being in existence in Gobalt and Porcupine, Ont., Britannia Beach and Vancouver Island, B. C.

A satisfactory feature of the disputes and in practical and the same is to be reported of the class in practical English.

Co-operation General.

The atrendance in the sheet metal drafting class was not large, but a good season's work was accomplished. In painting class was not large, but a good season's work was accomplished. In painting and decorating a new feature was introduced in the form of a weekly lesson under the art supervisor of the Calgary schools. The display of some excellent work.

We cannot emphasize too forceably the importance . VOU'LL remember the remarkable values this store offered some weeks by eager buyers. These Verandah Mats were included in that consignment, which came to us direct from our own representative in Japan. Aid now we bring them forward for quick clearance at the very time they are most needed, and at prices we can never hope to better. You see, we bought them as samples, and as such at a great advantage in price. Furthermore, as samples they passed the customs. Hence, our position to offer them at such ridiculously low figures. Though quantities in each size are limited. there is generous choice, size and price, a few of which we quote below:

SAMPLE VERANDAH MATS

LESS THAN HALF THEIR REAL VALUE!

Size 8 feet by 10 feet. On sale today\$5.50 We'll Cut Cotton Delaines for Less Money Today

To those women who have planned to give themselves a neat new house dress, dressing sacque or a new house waist, this offering will come as a bit of the best of good news, for the saving on each yard from regular good value is worthy prompt consideration. Quantities of new goods have been pouring into this section so rapidly of late that some lines must find immediate sale, for space is greatly limited. Listen!

COLLARS and JABOTS

They're slightly shop-soiled, or you may be sure we could never offer them at such reductions. A little pure soap and a dip in a basin of clean water and you'd.
