to learn that a biography of George Filiot is about to be published. The writer is Miss Mathilde Blinde, and the work is to be the initial volume of the forthcoming series of "Eminent Women" to be edited by Mr. John H Ingram. The volume will give, for the first time, a faithful account of George Eliot's early life, and of much of her unknown literary labors and furnish new and interesting correspondence.

According to the Medical Times and Gazette, the oyster contains fourteen per cent of flesh forming material, this being almost precisely the amount obtained from the egg. Lean beef contains but five per cent more of muscle-making matter and but two per cent more of fat than the oyster. Among the many thousand species of shell fish there are only two or three known to be coisonous, yet but few kinds, such as cockies, periwinkies and mussels, are used besides clams and oysters. The consumption of periwinkies in London often amounts to 2 000 bushels weekly.

"My wife had a very severe attack of pleurisy and inflammation of the lungs about three years ago, and ever since has been subject to severe colds on the slightest exposure; in fact they were so frequent that her system was quite reduced. She tried several remedies but without any permanent effect, until she was induced to try Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda, and I am happy to say it has exceeded our anticipations. I have no hesitation in recommending it as a Royal Remedy for all affections of the lungs and chest, and for all classes of wasting diseases, and building up of weak constitutions."
