The warm weather of yesterday and last night produced a very bearish feeling on the scalping crowd, especially as the general idea prevailed that there would be a small increase in the visible. Receipts in the Northwest, 500 cars, were not large, but the footing for 11 primary points since the last session showed 605,000 bushels, which was very discouraging to bulls. A telegram from Nebraska intimated that the State Board of Agriculture had discovered the reserves of wheat in farmers' hands to be much larger than expected. The trading has been fairly active and market closed firm.
