**POPULAR SCIENCE.**  
**THE SCIENTIFIC AMERICAN**  
 TO BE GREATLY ENLARGED.

THIS widely circulated and Popular Journal of the  
 Industrial Arts and Sciences enters its twenty-  
 second year on the 1st of January next, and the  
 publishers propose to signify the occasion by en-  
 larging it to the size of the most costly Scientific  
 Journals of Great Britain, without, however, in-  
 creasing the subscription price.

It is almost superfluous to speak of the great value  
 of this Popular and Useful Journal to all classes, and  
 especially to Mechanics, Manufacturers, Inventors,  
 Engineers, Chemists, Agriculturists, and all who love  
 to read of the wondrous progress which now marks  
 every department of Mechanical Engineering and the  
 Industrial Arts and Sciences generally.

The editorial department is very ably conducted,  
 and many of the best writers in this country and  
 Europe are contributors to its pages. Many of the  
 articles have the charm of romance about them, and  
 inspire the mind with noble ideas.

The Scientific American has the largest circulation  
 of any similar journal in existence, but it ought to  
 have a million of readers in this growing country.

The engravings of New Inventions, Tools, Imple-  
 ments for the Farm, Workshop and Household are  
 very numerous and are splendidly executed by the  
 best artists in the world. This feature of the paper is  
 very striking, and has won the praise of the united  
 press of this country and Europe.

Another feature peculiar to the Scientific American  
 is the official publication of every Patent granted by  
 the Government Patent Office. Each number con-  
 tains the weekly issue of Patent Claims, with copious  
 notices of new inventions, together with Reviews of  
 Foreign Inventions and Discoveries in every depart-  
 ment of Science.

Whoever reads the Scientific American is instructed  
 and entertained, without being bothered with hard  
 words and dry details.

The American and European Patent Office, in con-  
 nection with the Scientific American, form an immense  
 Museum of Mechanical Novelties, which furnish con-  
 stant employment to a large corps of Scientific  
 Examiners who prepare drawings and specifications for  
 Patents.

This firm is no doubt the most extensive in the  
 world.

Now is the time to send in subscriptions to the  
 Scientific American, so as to begin with the new  
 volume.

The numbers for a year make up a splendidly  
 illustrated volume of 832 pages. Terms—\$3 per  
 annum: \$1 50 for six months; \$1 for four months;  
 Clubs of ten and upward, \$2 50 each. Canadian sub-  
 scribers, \$3 25 per annum, always in advance. Specimen  
 numbers sent free, also, a pamphlet of advice to  
 inventors. Address
