Tel: (416) 825-0122
Telex: 06-982298

Thomas M. Gleason
Director of Marketing

Madsen Electronics (Canada) Limited, established in 1968, produces medical instruments for the diagnosis of hearing disorders. The company initiated the first

commercially available electro-acoustic impedance bridge. Today the Madsen product line encompasses screening and clinical pure tone and impedance audiometers, both portable and for office use, and systems for evoked potential measurement, speech training and real ear measurement. Madsen has manufacturing, research and development facilities in Canada and Denmark.

Mallinckrodt Canada Inc. manufactures a variety of radiology accessories, enema administration kits and diagnostic X-ray contrast media. The company enjoys a long-established reputation for providing quality medical products to the hospital and health care industries in Canada and the U.S.

Mallinckrodt products are conveniently packaged in volumes just the right size for most procedures. The company's quality-control personnel ensure a consistently high-quality product.

Manrex Limited, Pharmacy Consultants
1752 St. James Street
Winnipeg, Manitoba
Canada R3H 0L3

Tel: (204) 633-6609
Telex: 07-57332

Fiona M. Webster
Sales Manager

Manrex Limited, a Canadian company incorporated in 1973, has grown to supply every province in Canada with its medication delivery systems. Manrex has also expanded its operations to serve overseas hospitals and nursing homes.

In addition to medication handling programs, Manrex supplies computer software for a computerized medication charting system used in nursing homes, as well as a selection of educational materials for the health care industry. Manrex's P.C.I. Controlled Dosage System is a systematic method of controlling the distribution of medication at the pharmacy and nursing levels, with a minimum of time and error. This concept in drug administration ensures that each patient receives the proper medication at the right time in the correct dosage.
