

We consider the establishment of a University Clinic in the Royal Victoria Hospital would cost in salaries:-

1 Full-time Professor	.....	.....	.....	.....	\$10,000
(with privilege to consult on cases in the private ward pavilion; or a larger sum, should it be considered best that such private practice would not be considered a part of his perquisites. It is believed important, however, that such a full-time Professor should come in contact with the public to some extent, and some arrangement might be made by which his fees could be appropriated by the hospital).					
1 Full-time Assistant	.....	.....	.....	.....	5,000
3 Part-time Assistants, in the Laboratory, at salaries varying from \$1-3,000,...	.....	.....	.....	.....	6,000
Technicians	.....	.....	.....	.....	5,000
Cleaners and Orderlies	.....	.....	.....	.....	2,000

Part-time teachers in addition to the above,  
 (3 in wards for final year, 4 in penultimate year, and 4 or 6 for junior outdoor teaching) about 15,000

about - \$43,000
