Race of people is to be traced through the father. If, for example, the father is French

and the mother Irish, the race of the child will be French.

The term "Relationship" in column 3 means the relationship to the head of the family accompanying. A wife joining husband already in Canada would be shown as "wife" and the children as "son," "daughter".

In filling in column 15 where more that one language is spoken, give first the mother tongue.

N.E.S. means not elsewhere specified.
