HOW THE HITCH CAME ABOUT

In the Arrangements for the Behring

Dingley Party in Congress is to Secure

London, Sept. 27.—Announcement was made this afternoon confirming the despatches of the Associated Press of Saturday last, that the Marquis of Salisbury has not withdrawn from the Behring Sea Conference, but has simply objected to the presence of Russia and Japan. Negotiations on the subject are proceeding. Great Britain is willing to take part in the conference, and is endeavoring to secure the acquiescence of Canada. The United States Ambassador, Col.

John Hay, and the British Ambassador to the United States, Sir Julian Pauncefote, visited the Foreign Office this afternoon. The whole hitch seems to be
due to the failure of the Marquis of
Salisbury to respond to Colonel Hay's
note of July 29, acknowledging the Marquis of Salisbury's agreement to "a
meeting of experts," and in which Col.
Hay stated the President expected Russian and Japanese representatives would
be present at the conference. No exception being taken to this, Colonel Hay
concluded the matter was settled, until
Wednesday last, when an objection was
received from the British side, it being
pointed out that the Marquis of Salisbury never contemplated taking part in
a conference at which Russia and Japan
were represented, having always contended, as shown in his despatch of
May 9, that they had no locus standi.
It is also pointed out that the Marquis of Salisbury's letter of July 29 distinctly says Great Britain had agreed to
a meeting of British, Canadian and
American experts.

The Japanese Minister here said to a
representative of the Associated Press
to-day: "While no formal communications have passed between Japan and

London, Sept. 28.—The Daily Chronicle says: The general relations between the United States and Great Britanian

"It is obvious that a conference between the United States, Russia and Japan, without England, could not in the smallest degree affect the binding Character of the Paris award. A revis-

ion of the award should be determined by the common agreement of the Governments of the United States and Great Britain. No other powers have any right to a controlling voice therein. It may be added that, as the American claim was founded originally on the contention that the United States is the successor in title to all the rights of Russia in the Behring Sea, it seems a strange proceeding to contend that Russian interests in that quarter justify a demand for the separate representation of a power not implicated in the award. "When Great Britain has settled with the United States, whether the regulations are to be revised and in what way, there will be nothing to prevent the Governments from negotiating their extension to the western coasts of the Pacific Ocean, where the sealing grounds are under the authority of Russia and Japan."

After dealing at length with the events leading to the accession to the throne of the young Princess, Dr. Wright said:

Purity of the Court.

"Hers is the only court where the law of purity is the law of favor and the requirement of fashion. Hers is the one palace into which every house in Christendom may safely look to find a model family. Mr. Dufresne strongly advises no one to go to the Yukon without at least \$500 in loose money over and above provisions necessary. Still he says no one ever starves in a mining camp, unless he gets lost and cannot find any other human being. Every man's supply of provisions is free to anyone who requires food. All provisions are common property when necessity comes, and actual starvation is impossible unless the scarcity, should become universal. Speaking of the wealth of Klondike, Mr. Dufresne said that when he was in Dawson City he saw many miners take out \$1000 a day. Everybody had a sack of gold instead of a roll of bills, and when anything was bought paid for it in gold dust. Ottawa, Sept. 27.—The lumbermen at the Chaudiere were somewhat surprised to-day when they were notified by Sir Farmer Boecker Murdered Louis Davies that they would require to stop dumping sawdust in the river after July 1 next. The law passed some four years ago but never permitted to go into operation would be allowed to go into force on that date. There would be no more suspensions. There are two important firms principally affected here. They are J. R. Bootn and Bronson & Weston. Both of these firms, on being interviewed to-day, said that they cannot get their mills put in shape so as to use incinerators, and they do not know what to do. "It is just possible," said Fred.
