# In Woman's Interest

Helen.

A Housewives' Society.

Ten shining twenty dollar gold pieces were presented the other day to ten faithful servants by the German Housewives' Society of New York. The organization, which has a membership of about 600, is attempting to make the domestic problem" a simpler one for deserving maids and mistresses. The "German" in the name might be omitted, for there is no German clause in the requirements, and various nationalities are represented, among both the mistresses and the servants. The former pay an initiation fee of \$3, and annual dues of \$5. This entitles them to the assistance of the society's intelligence bureau in securing a servant. The servant pays no fee. After four weeks of satisfactory service with a member of the society, she is entitled to medical attendance free of charge, and receives other assistance if she needs it. At the end of two years' service in one household, a servant re ceives a prize of \$20. The first issue of these prizes took place last September, when sixteen girls completed their "two years' course." The ten who have just been rewarded are the second installment. As the society has been formed only a few years, this is a record which promises uncommonly

There are penalties, however, as well as rewards. "An obstinate servant, or one who willfully neglects her duties, will not be recommended by the soclety, and will lose all her privileges if she relapses into the same fault." As for the mistresses, "those who treat their servants unjustly, and do not rectify their conduct, will be expelled." For three years' continous service in one place the prize is \$30; and so on up to \$100 for ten years. The success the New York society has led to the establishment of a similar one in Philadelphia, and a plan for one in

#### Back to Mittens.

The wind of fashion seems to have whipped around to an old quarter, if one may judge from the significant little straws of rumor and of prophecy which come floating in from all sides. An English paper, for instance, announces the appearance of the "mitt." "Dear mitten!" it says. "Suggestive of quaint old-world days when things

were less artificial than now, and when our grandmothers' principles were as upright as their high-backed

Possibly the girl of today may resent this somewhat invidious comparison, but that is another story. The point of immediate interest is that The the return of the mitten is not the only sign that fashion is going back to pick up some of its old ways. Ear-rings are again in favor. Very high-heeled shoes are being worn abroad. English women of fashion are trying to introduce the tall walking-sticks, which are the natural accompaniment of high heels. Even the charming flowered bandboxes of our grandmothers have come into favor again.

"Haven't felt right since I had the grippe, is an expression one hears on

every hand just now. This terrible scourge leaves in its train weak hearts, shattered nerves, im-

poverished blood, and a general rundown, debilitated condition of the system. Thousands of people throughout Canada are just now needing the timely assistance of Milburn's Heart and Nerve Pills. This remedy has a wonderful way of strengthening, invigorating, and building up the

bealthafter lagrippe or any serious illness.

Mrs. Eliza Cook, who lives at 109 Palmerston Ave., Toronto, says: Seven years ago I had the grippe, followed by inflammation of the lungs. I have been afflicted ever since with heart trouble. To walk any way fast would make me gasp for breath, and many a time I have had to stop on the Street to

regain my breath.
"I had smothering feeling at night, and my nerves were unstrung. Anything annoying or worrying me produced extreme weakness, and would set my heart beating so fast that I thought I was dying I would become so nervous as to tremble

like a leaf. "I began taking Milburn's Heart and Nerve Pills some time ago, and have been getting better ever since. My nerves are much stronger. I can walk without difficulty, and the palpitation, fluttering of the heart, shortness of breath, and

pervousness troubles me no more. "I gladly recommend these pills as the best medicine I know of for heart and nerve troubles, and the after effects of grippe on account of the great good they have done in my case."

years of suffering and success. Every dress is turned wrong side out and sunned by an open window once a week. Her under linen is arranged at night on chairs, so that each piece and part receives a measure of air. Her shoes are put on the windowsill in the sunshine, and cleansed as well as may be. Her veils are washed, if the fabric permits, or else pinned across the window and relieved of all atoms of dust. She washes out her stockings every other day, and dries them in a current of air and sunlight. The dress shields are washed after a few wearings; this involves a set of half a dozen and a package of tiny safety pins, but both are cheap enough to warrant buying and using. The bath should never be slighted. Such care of the person is possible to all except poverty's poorest slaves, since it is not among the rich that we find those who know best how to live. 0+0

#### Mme. Lehmann's Circular.

I wish to quote here the circular which was placed among the programmes at her second song recital, given the other day, and if other Canadian papers will but quote this part of the Globe they will be doing something for the cause of humanity and good taste. When women of Madame Lehmann's distinction have the cour-age to be faithful to their convictions of duty and kindness, than the humbler women in the land can follow in the path marked out for them. The circorner is the madallion portrait of Audubon, with this lettering as a frame: "Audubon Society, State of New York, for the Protection of Birds.' Across the page is a design of three birds in flight. The circular is headed, "An Appeal to Women." Here are its words:

"I beg all women wear birds or birds' feathers on their hats any more. Every year 25,000,000 of useful birds are slaughtered by this terrible folly. The farmers are already suffering from it, and women enjoy wearing feathers like savages. Flowers and ribbons are a thousand times more beautiful and more becoming. It is the duty of every woman and man to battle against this gruesome folly. For years my hats have had no feathers.'

The circular ends with a face-simile autograph of Mme. Lehmann. All men and women of culture and taste honor such a circular as this and wish for it potent and far-reaching influence.

#### How Janet Was Cured.

It was the uneasy time of the day. It was likewise the time when the hands of the clock went around altogether too fast to suit Janet.

"You seem to love to say it's my bedtime." looking crossly at the big clock.
"I wish I could sit up once in a while and see what a good time the grown folks have after we have gone to bed." "We" meant Janet and her dolls.

"You can sit up tonight if you wish, just as long as you like," said Janet's

"Truly," said Janet.
"Truly," said her mother.
"Oh. thank you, mamma. Won't we

have a good time, though?" Then she went to tell the dolls.

"Dear ones," she said, after she had collected them all together, I know and I long have known just how you feel about going to bed so early. So tonight you shall sit up just as long as you like and we will see for ourselves just what good times the grown-up people have." Then they all went down-stairs to the library where the family were. It was very quiet there, Janet thought. The older children were studying their lessons for the next day, grouped around the long table in the middle of the room, and her father and mother were reading.

"Do tell me a long story, please, mama." said Janet, bringing her little chair up beside her mother's; but her mother shook her head

"It would disturb the children study-"Can I have an opera with my dolls?"

"No. dear." "Isn't there anything to amuse me?" and there were tears in Janet's voice. "No. little daughter, this is the quiet hour for the grown people and you will

have to keep still." So Janet sat down and looked soberly at the fire.

By and bye her head rested against her mother's knee. "I don't think grown folks-" she began, and that was all, until her father was carrying her upstairs- "have very good time at all," she murmured,

Since then she goes to bed cheerfully. "For it's really better for all of us, my dears," she told the dolls.

#### 0+0 A Spectacled Dog.

Not long ago an account of a dog who wore spectacles went the rounds of the press, but it was without the interesting conclusion which a similar story, recounted by a Frenchman, Ernest Blum, has. Monsieur Blum relates that, being somewhat fond of the chase, he was presented by a friend with a magnificent hunting-dog.

This animal proved to have the great qualities of a dog of that profession, his scent was keen and discriminating, he was obedient, he was brave, not in the least gun-shy, and would retrieve to perfection. He had, indeed, but one fault, and that was serious.

In coursing through the woods he often ran against trees, and in the house would strike against chairs, tables, doors and other objects that came in his way. His owner wondered what could be the matter with him and he took him to a veterinary. This man kept the dog a few weeks and returned him with his bill and the information that he was near-sighted.

"He needs a pair of glasses," said the veterinary, with a grin. The advice was good, and the dog's master acted upon it at once. He reflected that by so doing he might make

and he then wore them with great pride and satisfaction.

They had a wonderful effect on his vision, enabling him to see as much as any other dog. When he went hunting he had no longer to depend solely on his scent for his mastery of the game, but saw as well as scented, and pursued his game with swiftness and sureness. People began by laughing at the animal, and ended by admiring him and envying his possessor.

The dog appeared to gain every advantage from his glasses which human beings have not; he could lick his glasses with his tongue. This was very convenient in times of fog and rain, since he had no handkerchief to wipe them with.

One day, alas, the dog's owner went to hunt with him in the wood where there were wild boars. The dog came upon one of these ferocious creatures and valiantly attacked him. In the midst of the combat the boar drove his tusk through the glasses, and not only this, but so filled the poor dog's eyes with fragments of glass that from that time he was totally blind.

Fly to him. Bid him delay not!

Then when he comes to me, I must sit quiet; Still as a stone— All silent and cold. If my heart riot-Crush and defy it! Should I grow bold. Say one dear thing to him, Cling to him-

What to atone Is enough for my sinning! This were the cost to me, This were my winning-That he were lost to me.
