

Poetry, &c.

THE WITHERED LEAF. O! mark the withered leaves that fall In silence to the ground; Upon the human heart they call, And preach without a sound.

They say, "so passes man's brief year! To-day his green leaves wave; Tomorrow, changed by time, and care, He drops into the grave."

Let wisdom be our sole concern, Since life's green days are brief; And faith and industry hope shall learn A lesson from the grave.

PAUPERS, &c.—In Sweden, where the population is about three millions five hundred thousand individuals, remarkable for the simplicity of their manners and their taste for agriculture, there are only three beggars in every four hundred inhabitants, while in Norway there are five to a hundred, in Denmark four, in Wurttemberg five, in Switzerland ten, in Italy thirteen, in France fifteen, in the British Islands seventeen, in England alone ten in a hundred.

By Her Majesty's Royal Letters Patent. DELL'S Hydro-Pneumatic Apparatus, TO ANSWER EVERY PURPOSE OF Warming & Heating, Manufactured of various sizes and constructions for Hot Water Stoves, Carriage Warmers, Bed Warmers, &c. &c. A GREATLY improved and more decided fixture than any ever used, and is constructed from the use of the best Bed Warmers. Unlike any other attempts to heat beds by hot water, which is very inefficient, however applied, in consequence of their warming merely the clothes, in fact, or whatever immediately touches their surface, DELL'S PATENT BED WARMERS are so constructed, that they will heat the bed itself, and will render them so impalpable in Cabbages, Hotels, Boarding-houses, &c. Professional gentlemen and all persons of scholarly habits will find this apparatus exceedingly desirable; placed in their apartments it acts like the hot water system, heretofore noticed, in small rooms, an agreeable and healthy warmth, as no vapour, smell, or other annoyance can possibly be experienced by using this contrivance for producing an agreeable summer heat.

Persons returned from hot climates, experiencing the effects of cold, will find the comfortable temperature afforded by this invention particularly grateful; and all aged or other persons who are unable to get up, will find it a most valuable and effectual remedy for their ailments, as it is a couch, or in any easy chair, and thus receive the full benefit of the genial warmth communicated. And in cases of fever cold one of these Bed Warmers, covered with a flannel, and applied to the soles of the feet for two or three successive nights, will be found to give infallible relief. It is a well known fact, that numerous persons who have purchased, have never passed a single cold night without one in bed.

One great advantage of the Bed Warmers is, they are so light and portable that they can, without the slightest inconvenience, be carried by persons travelling, who have only to order the Boiling Hot Water to be put in, and the apparatus placed in the bed previous to their going to rest, to ensure a warm and that greatest of desiderata—a dry bed.

The invention is already extensively patronised by the medical profession, and is being introduced into Hospitals and other public Institutions for the relief of the aged and infirm.

In all cold countries abroad, in the Colonies, and in the East Indies, where Cholera, Ague, and like complaints prevail, these Bed Warmers will be found to be a most valuable and effectual remedy for their ailments, as it is a couch, or in any easy chair, and thus receive the full benefit of the genial warmth communicated. And in cases of fever cold one of these Bed Warmers, covered with a flannel, and applied to the soles of the feet for two or three successive nights, will be found to give infallible relief. It is a well known fact, that numerous persons who have purchased, have never passed a single cold night without one in bed.
