The St. John branch of the Engineering Institute of Canada, at its regular meeting last night, through the chairman, C. C. Kirby, appointed a committee to look into the proposal that the city of St. John should take part of King square, on the west side, for a school house site, and if necessary appear before the common council in opposition to the project. It was felt that the west side would continue to grow in future years and that the square should not be taken away from the people, when a more suitable site was available and with little extra cost.

published in the Slovenian capital of Ljubljana. They return to the Yold Country," it says, with full trunks and full wallets, but they have forgotten that the buying power of money is not what it used to be.

They are anxious to buy land and settle down, but in these uncertain times whith the European prefers to hold on to his solid material wealth rather than to exchange it for uncertain paper money.

Land, therefore, is not for sale in any quantity in Jugo-Slavia, and the returned emigrant finds himself in a difficult position. Sometimes he wants to start back at once to America, but finds that after his experiences with high prices in Europe and with the expensiveness of crossing each frontier and changing his money into a new currency, he is unable to buy a return passage. The Slovenec notes that since letters giving these facts have been sent to America by a number of returned emigrants, the tide has greatly decreased, with regard to both Slovenia and Croatia. Tiere are still, however, a number of Serbians who are returning to their mother country from the United States.
