BIG DOCK AT VANCOUVER.

Great Northern to Build Pier 800 Feet in Length.-Cost \$700,000.

Seattle, Wash., July 14.—Bids have been asked by the Great Northern railway for the construction of a pier 800 feet long on the waterfront property in Vancouver, B. C., owned by the road The specifications require that the work be completed within four months.

The new dock will be equipped with modern machinery for the handling of cargo, and with warehouses, etc. It will probably be leased to one of the large shipping concerns operating on Puget Sound and at Vancouver and Victoria. A report that the new pier was designed for the use of the new trans-Pacific Steamship line was denied by the Great Northern officials

BAD WEATHER IN STRAITS.

Sakkarah Encounters Heavy Gale Passing From Magellan into Pacific.

Seattle, Wash., July 14.—One hun-fred and forty-four days out from Hamburg and having called at thirtyfive ports, the German steamship Sakkarah, Capt. Koppe, of the Kosmos fleet, arrived at Seattle to-day. The cluding 500 tons of nitrate and 145 European ports. Part of this was dis-

charged at San Francisco. The vessel encountered very rough weather while entering the Pacific from the Strait of Magellan and strong northwest winds and heavy seas while coming up the California coast. The big liner put in at Nanaimo on Wednesday night, for coaling.

WILL ENLARGE MILL PLANT.

New Westminster, July 13.-Great velopments are anticipated at the big plant of the Canadian Western Lumber Company at Frager Mills About \$300,000 will be spent by the owners in extensions. The company intends to put in a sash and door factory, and cedar shingle mill at an early date, in fact the piles are in position for the shingle mill. The sash and door factory will handle a section of the trade which is not yet done at the mills, turning out it is expected 100 doors a day. The shingle mill is to have a capacity of 75,000 feet a day. The mill is now cutting something

The question of labor is always ar mportant one in these big industrial undertakings, and in experimenting with French Canadian lumbermen and
